Answers for infrastructure and cities.

Our world is undergoing changes that force us to think in new ways: demographic change, urbanization, global warming and resource shortages. Maximum efficiency has top priority – and not only where energy is concerned. In addition, we need to increase comfort for the well-being of users. Also, our need for safety and security is constantly growing. For our customers, success is defined by how well they manage these challenges. Siemens has the answers.

"We are the trusted technology partner for energy-efficient, safe and secure buildings and infrastructure."

Future-proof building control for energy-efficient and comfortable rooms

Dear Customers and Partners,

Energy efficiency is a constant topic of discussion in business, politics and society. Some European countries have already decided to phase out nuclear energy, while others have placed the transition to the new energy policy high on their political agendas. But switching to renewable energy alone will not protect our climate. We must also begin to use existing resources more responsibly and energy more efficiently. Only then can we slow down the rate of climate change and preserve the planet for future generations. At the same time, it is important to maintain productivity and quality of life.

With innovative and environmentally friendly technologies, Siemens Ltd has been promoting environmental protection and the conscientious use of energy in buildings and rooms. All products and systems are designed for maximum comfort and minimum energy consumption.

GAMMA building control ensures optimum and energy-efficient control of energy resources in rooms. This includes the new flush-mounted Symaro™ sensors, which increase efficiency and room comfort thanks to their accurate measuring technology. A pleasant room temperature, glare-free lighting that maximizes the use of daylight, and on-demand ventilation do not have to be incompatible with energy-efficient room automation. Control functions are handled by new innovative control units that can be easily integrated into the environment. Easy operation, high-quality design and preprogrammed scenes help room occupants select a comfortable atmosphere in the room.

Benefit from our comprehensive range of innovative products, systems and tried-and-tested applications to enhance energy efficiency and comfort in rooms and to protect the environment.

Best regards,

Can old buildings be just as energy-efficient as new ones?

Intelligent and energy-efficient building technologies from Siemens reduce emissions and costs, in any building.

Setting a course for energy efficiency and comfort

Intelligent technologies for sustainable buildings

Industrial nations today are facing an enormous challenge: increasing energy efficiency and lowering CO₂ emissions without sacrificing comfort and quality of life. The answer is to use resources responsibly and switch to renewable energy sources.

Efficient energy use can slow down the rate of climate change and preserve our planet for future generations. Siemens believes it has a special responsibility in this context. Smart products and systems play a crucial role in saving energy around the world and using existing resources as efficiently as possible – without sacrificing comfort.

Future-proof KNX-based electrical installations

GAMMA building control plays a crucial role in making buildings and rooms more efficient. Energy and operating costs can be sustainably reduced by automatically controlling and regulating lighting, shading and the room climate.

For building operators, this means lower maintenance costs without sacrificing user comfort.

Thanks to the use of the internationally recognized KNX communication standard for home and building control, additional functions can be added easily and flexibly – without having to lay new lines.

Highlights

- Maximum comfort with reduced energy consumption
- Interdisciplinary building and room automation lowers maintenance costs
- Investment protection and flexibility, thanks to the open KNX communication standard

KNX-capable flush-mounted Symaro sensors

The communicating flush-mounted sensors measure multiple measured values and have an LED display for air quality status.

Page 12/XX

Room controller UP 204 Contouch

Control all disciplines in the room with a multi-function device in four new colors.

Page 1/XX

Room operator unit UP 227

The versatile room operator unit UP 227 controls and switches all room functions such as heating, ventilation, air conditioning, lighting and shading and electrical equipment.

Page 1/XX

KNX-based room thermostats

The flush-mounted RDF600KN is suitable for heating and cooling applications with fan coil systems and heat pumps.

Page 1/XX, 7/XX

Universal dimmer

Stage effective light scenes with the universal dimmer main modules and add-ons.

Page 5/XX

KNX/DALI Twin gateway

The KNX/DALI Twin gateway ensures maximum flexibility by controlling the lighting with both KNX- and DALI-capable sensors.

Related products	Contents
Mall Internet information and ordering platform: www.siemens.com/industrymall	All automation, drive and installation products, including the products in the HVAC and GAMMA portfolios.
HVAC products and building automation and control systems	Standard controllers, software and communications control units, room automation, home automation systems, sensors, valves and actuators, damper actuators, variable speed drives, counters and consumption data acquisition.
Technical documentation for GAMMA products www.siemens.com/gamma-td	Here you will find all technical information about KNX products from Siemens, from product databases for ETS, descriptions of the individual application programs, technical product information, operating and installation manuals, bid texts and CE certificates.
HIT – HVAC Integrated Tool www.siemens.com/hit	This tool provides more than 300 preconfigured, standard HVAC configurations classified according to energy saving potential.
EPC – Energy Performance Classification Tool Contact your local Siemens representative for more information.	The EPC tool helps users determine the actual state of an existing building automation system and rates it according to one of four efficiency classes (A through D). Another function of the EPC tool is to help users determine the profitability of modernization measures and to quickly prepare customized documentation.
DIN-Bauportal www.din-bauportal.com/siemens	This tool lets you compile product descriptions and specifications and download them in various formats – online and STLB-Bau-compliant.
Training for ETS and KNX www.siemens.com/gamma	We offer a wide selection of courses for qualified training and future-proof specialization: KNX basic and advanced courses, KNX/DALI diagnosis/troubleshooting, KNXnet/IP fundamentals, KNX trainer seminar, course for migrating from ETS2/3 to ETS4.
Technical support	Trademarks
Expert consulting on technical issues with a wide range of demand-based services relating to our products and systems. Overview and selection guides

Pushbuttons bus transceiver module (BTM)

Modular bus transceiver module and flush-mounting actuator

A key feature of the GAMMA *instabus* is its uniform bus transceiver module. The bus transceiver module (BTM) can be used as a stand-alone unit, as well as a combined version in various devices of the flush-mounting actuator range.

Implementation of the BTI interface (Bus Transceiver Interface) with the bus transceiver module (BTM) ensures maximum flexibility and an impressive range of functions. Bus coupling units (BTM) and flush-mounting actuators with integrated bus transceiver modules (BTM) enable the use of GAMMA display/operator interfaces, such as pushbuttons, text displays, room temperature controllers and operation units in a wide range of designs. Thus, all GAMMA instabus operator interfaces with BTI interface in the design lines i-system and DELTA style/profil can be combined with either a bus transceiver module (BTM) or a flush-mounting actuator with bus transceiver module (BTM).

This reduces planning work and facilitates installation and commissioning. The application programs of the flush-mounting actuators are identical to those of the functionally equivalent devices from the modular room control range. This means that all devices have the same standard application program - regardless of mounting type - whether flush-mounting, with or without mounting frame - or whether designed for installation in the room control box and automation module box.

Pushbuttons with IR receiver decoder

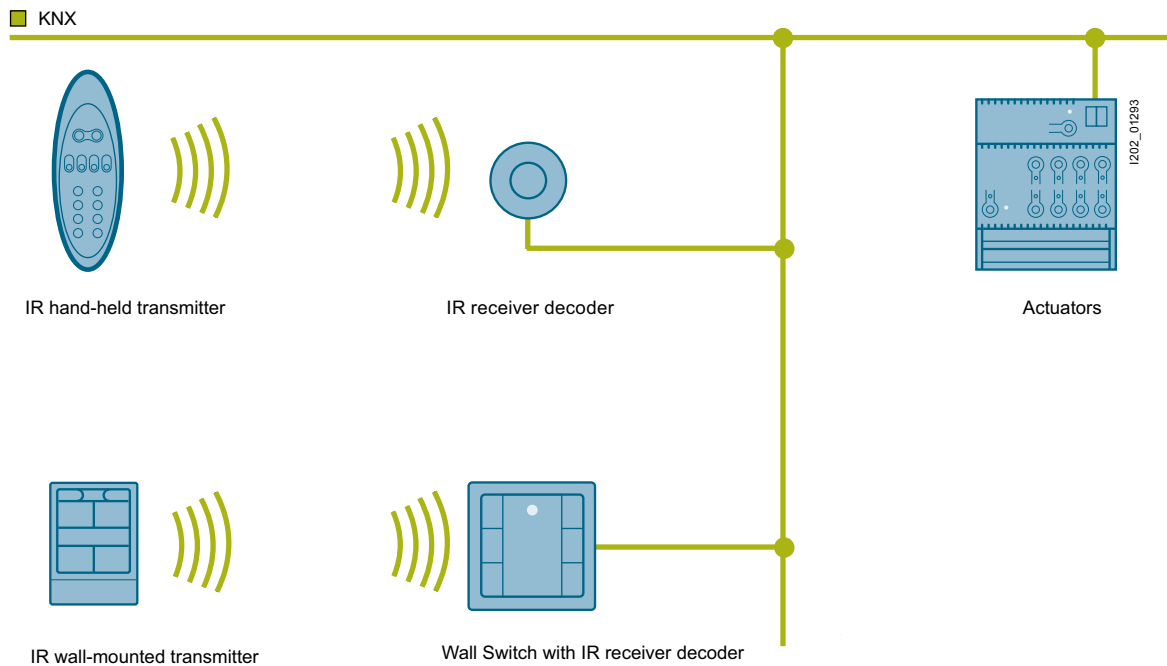

Overview IR products

IR products are available for the remote control of room functions. Compared to radio solutions, IR is particularly interesting because

- there are applications in which radio-based remote control is not permitted (e. g. hospitals)
- the frequencies used are not allowed in all countries

Application

- Remote control of room functions: Lighting, sun protection, room climate, scenes, etc.
- Mounting on "movable" walls
- Use in hospitals where radio solutions are often prohibited
- Additional room functions which can be operated only by remote control (e. g. by service personnel, doctors, teachers, etc.)

Visualization, software

Overview ComBridge Studio Evolution

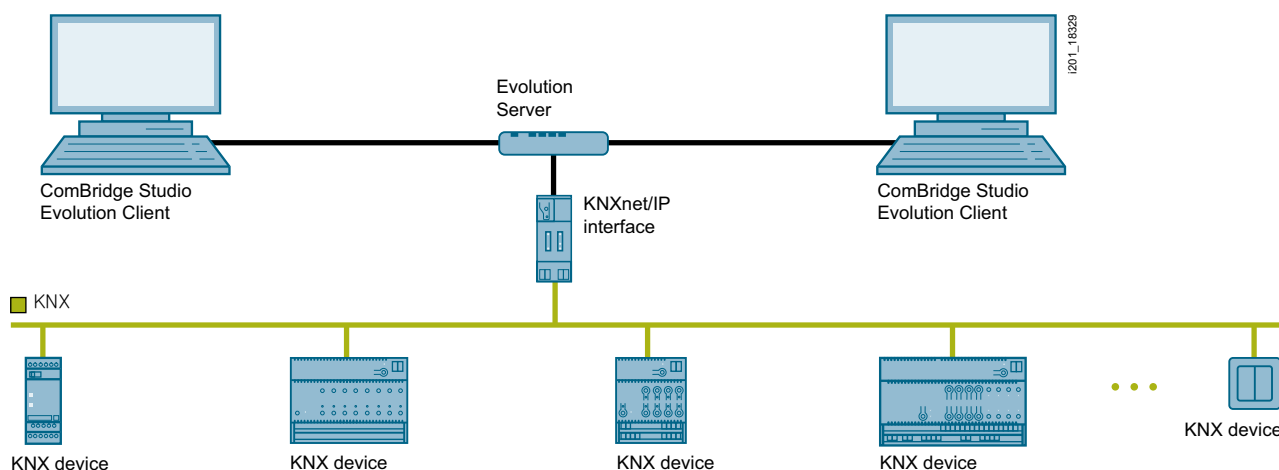

IPAS is one of the leading providers of web-based visualization. With ComBridge Studio Suite, the HTML-based visualization software, IPAS was already able to offer solutions for individual large-scale projects, such as airports, shopping centers, administration buildings and distributed locations.

All this experience flowed into the latest development of ComBridge Studio Evolution, which now permits extremely high quantities of data, or hundreds of KNXnet/IP interfaces in a project with several hundred users to be realized. As well as the representation of statuses and the operation of functions, ComBridge Studio Evolution offers optimum support for the configuration of complex functions, such as scenes, yearly programs, graphical logics and much, much more. Based on Adobe Flash, it now couldn't be easier to insert design-oriented elements and functions in visualizations, so that mapping the actual situation is child's play.

ComBridge Studio Evolution also now enables the representation of even complex database analyses in an individual and attractive design. A particular highlight of ComBridge Studio Evolution is the Smart Metering module. This module analyses consumption data that are stored in the database. Based on current consumption data, the Smart Metering module calculates the probable weekly, monthly and yearly consumption, so that users are always informed as to what costs are generated by their energy consumption in a given period. It is also possible to graphically compare different periods and evaluate them. The consumption data can be evaluated directly from KNX counters, such as Siemens energy counters (see Chapter Counters).

Another huge advantage is that it is operating system-independent ComBridge Studio Evolution is configured directly on the ComBridge Studio Evolution server. The application tool is a standard browser in connection with Adobe Flash Player. Adobe Flash Player can be downloaded free from the Internet.

Fan-coil unit controllers for hotels, i-system

- For the display and operation of the room temperature control using a REG 540 fan-coil unit controller
- 5 yellow LEDs for the display of manually set fan speed step or automatic speed input
- 10-pole BTI plug (BTI - Bus Transceiver Interface) for plugging onto a bus transceiver module (BTM) or UP actuator with bus transceiver module (BTM)
- Pushbutton for setting the required fan speed step or for automatic entry of the speed step by the fan-coil unit controller
- Rotary button for setting the room temperature setpoint value within the range of 16...26 °C
- 2 green LEDs for indicating whether the room is being heated or cooled
- Design: i-system

Dimensions (W x H x D)

55 x 55 x 16 mm

Range overview UP 237F

Product Title	Stock No.	Product No.
Fan-coil unit operator panel hotel, titanium white	5WG1237-2FB11	UP 237F11
Fan-coil unit operator panel hotel, aluminum metallic	5WG1237-2FB31	UP 237F31

The bus transceiver module (BTM) (see Chapter System Products and Accessories) or flush-mounting actuator with bus transceiver module (BTM) must be ordered separately. The matching design frame must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

Fan-coil unit controllers for offices, DELTA style

UP 254E

- For the display and operation of the room temperature control using a REG 540 fan-coil unit controller
- 5 yellow LEDs for the display of manually set fan speed step or automatic speed input
- 10-pole BTI plug (BTI - Bus Transceiver Interface) for plugging into a bus transceiver module (BTM) or UP actuator with bus transceiver module (BTM)
- Pushbutton for switching the room operating mode between comfort and energy-saving mode and for setting the required fan speed step or the automatic input of the speed step by the fan-coil unit controller
- Rotary button for setting the room temperature setpoint value within a user-defined range
- 3 green LEDs for the display of the current room operating mode (comfort, energy-saving or protection mode)

Dimensions (W x H x D) 68 x 68 x 16 mm

Range overview UP 254E

Product Title	Stock No.	Product No.
Fan-coil unit operator panel office, titanium white/metallic silver	5WG1254-2EB11	UP 254E11
Fan-coil unit operator panel office, platinum metallic	5WG1254-2EB41	UP 254E41

The bus transceiver module (BTM) (see Chapter System Products and Accessories) or flush-mounting actuator with bus transceiver module (BTM) must be ordered separately. The matching design frame must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

Fan-coil unit controllers for hotels, DELTA style

UP 254F

- For the display and operation of the room temperature control using a REG 540 fan-coil unit controller
- 5 yellow LEDs for the display of manually set fan speed step or automatic speed input
- 10-pole BTI plug (BTI - Bus Transceiver Interface) for plugging onto a bus transceiver module (BTM) or UP actuator with bus transceiver module (BTM)
- Pushbutton for setting the required fan speed step or for automatic entry of the speed step by the fan-coil unit controller
- Rotary button for setting the room temperature setpoint value within the range of 16...26 °C
- 2 green LEDs for indicating whether the room is being heated or cooled

The bus transceiver module (BTM) (see Chapter System Products and Accessories) or flush-mounting actuator with bus transceiver module (BTM) must be ordered separately. The matching design frame must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

Display and Operation Units

Room temperature controllers

i-system

UP 237K..

Temperature controller, i-system

- Integrated room temperature sensors
- Control can be set as a two-point control and/or continuous-action control (P or PI algorithm), for heating only, for cooling only, or for heating and cooling mode
- Operating modes that can be switched via KNX: comfort mode, pre-comfort mode, energy-saving mode and frost or heat protection mode
- Presence pushbutton to locally switch between comfort and pre-comfort mode or comfort and energy-saving mode and to extend comfort mode after operating energy-saving or protection mode
- Pushbutton for switching over between manual and automatic mode
- The room temperature setpoint value for comfort mode can be set via an interchangeable rotary button (+/-) on the controller and via the KNX
- Basic setpoint of the room temperature for comfort mode which can be set via the KNX
- Setpoint value for comfort mode in °C which can be set via an interchangeable rotary button on the controller
- Adjustable dead zone between the heating setpoint and the cooling setpoint for comfort mode
- Two-level heating or cooling
- Output of the control variable(s) either as an on/off switch command or as a positioning command in the range of 0...100 %
- 5 LEDs to display manual mode and the current operating modes
- 4 LEDs to display heating/cooling valve open, dew point alarm and open window
- For plugging onto a bus transceiver module (BTM) or a flush-mounting actuator with bus transceiver module (BTM)

Dimensions (W x H x D)

55 x 55 x 16 mm

RDF..KNX Semi Flush Mount

Semi Flush-mount room thermostats with KNX communications, 2-/4-pipe fan coils or DX type equipment

Semi Flush Mount room thermostat with LCD for fan coil units and compressors in DX-type equipment

- KNX communications
- Operating modes: Comfort, Economy and Protection
- For heating and/or cooling applications
- 2 or 3-position control outputs
- Output for 1-speed or 3-speed fan
- 2 multifunctional inputs for keycard contact, external room / return air temperature (QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- Automatic or manual heating/cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Color of housing: signal white (RAL 9003)
- Backlit display

Application selectable:

- 2-pipe system
- 2-pipe system with electrical heater
- 4-pipe system

Operating voltage	AC 230 V
Setpoint setting range	5...40 °C
Analog inputs, number	2
Relay outputs, number	5
Relay outputs	Fan: N.O. contacts, non-floating Valve: N.O. contacts, non-floating
Relay output, switching voltage	AC 230 V
Relay output, switching current	5 (2) A
Type of fixing	Recessed rectangular conduit box BS4662 with fixing centres of 60.3 mm (ARG71)
Degree of protection	IP30

Range overview RDF..KNX Semi Flush Mount

Product Title	Dimensions (W x H x D)	Stock No.	Product No.

RDU341

Semi Flush-mount room thermostat for rectangular conduit box with KNX communications, for VAV application

Semi Flush-mount room thermostat for VAV application

- KNX communications
- Output for a DC 0...10 V actuator and AC 230V electrical heater (ON-OFF)
- 2 multifunctional inputs for keycard contact, external room / return air temperature (QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- Operating modes: Comfort, Economy and Protection
- Modulating PI control
- Control depending on the room or the return air temperature
- Automatic or manual heating/cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Adjustable minimum and maximum limitation for air flow signal DC 0...10V
- Output signal inversion as an option

Application selectable:

- Single-duct system
- Single-duct system with electrical heater

Operating voltage	AC 24 V
Setpoint setting range	5...40 °C
Analog inputs, number	2
Analog outputs, number	1
Analog output, signal	DC 0...10 V
Analog output, current	Max. ±1 mA
Relay outputs, number	1
Relay outputs	N.O. contact, potential-free
Relay output, switching voltage	AC 230 V
Relay output, switching current	Max. 5 (2) A
Type of fixing	Recessed rectangular conduit box BS4662 (ARG71) with fixing centres of 60.3 mm
Degree of protection	IP30

Room thermostat with KNX communications, AC 230 V, for fan coil units and universal applications

RDG100KN

- KNX communications
- 3 multifunctional inputs for keycard contact, external room / return air temperature (QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- Operating modes: Comfort, Economy and Protection
- 2-position, 3-position or PWM control outputs
- Automatic or manual fan speed for 1-speed, 3-speed fan
- Automatic or manual heating / cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Backlit display

Application selectable:

- 2-pipe system
- 2-pipe system with electrical heater
- 2-pipe system and radiator / floor heating
- 4-pipe system
- 4-pipe system with electrical heater
- 2-stage heating or cooling system

Operating voltage	AC 230 V
Switching differential	Heating: 0.5...6 K Cooling: 0.5...6 K
Setpoint setting range	5...40 °C
Analog inputs, number	2
Analog input, signal

RDG160KN

Room thermostat with KNX communications, AC 24 V, VAV heating and cooling systems

RDG400KN

- KNX communications
- Output DC 0...10 V for VAV actuator and auxiliary output ON/OFF, PWM or 3-position or 3-position for VAV actuator and auxiliary output DC 0...10 V
- 2 multifunctional inputs for keycard contact, external room / return air temperature (1x, QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- 1 input DC 0...10 V for damper position feedback
- Operating modes: Comfort, Economy and Protection
- Modulating PI control
- Control depending on the room or the return air temperature
- Automatic or manual heating / cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Minimum and maximum limitation of air flow signal
- Output signal inversion (DC 0...10 V) as an option
- Backlit display

Application selectable:

- Single-duct system
- Single-duct system with electrical heater
- Single-duct system and radiator / floor heating
- Single-duct system with heating / cooling coil

QMX3..

Wall-mounted room sensors and operator units for KNX

The wall-mounted room unit QMX3.. consists of:

- Base plate
- Sensor or room operator unit

The following functions are (depending on type):

- Temperature sensor or multisensor (T, r.h., CO₂)
- Backlit display or LED display
- Touchkeys
- Switching and control of lighting, blinds, scenes

Measuring range, temperature	0...50 °C
Sensing element, temperature	NTC
Degree of protection	IP30
Mounting	Wall-mounting
Dimensions (W x H x D)	88.4 x 133.4 x 18 mm

QMX3.P02

Room operator unit KNX with temperature sensor, configurable touchkeys, LED display

Functions:

- Temperature sensor
- Configurable touchkeys with LED display
- Switching and control of lighting, blinds, scenes
- Window for labels
- Temperature control, adjustable as PWM control and/or modulating control (PID algorithm), for pure heating mode, pure cooling mode, heating and cooling mode
- Operating modes switchable via KNX or display: Comfort mode, Pre-Comfort, energy savings and protection mode
- Adjustable commissioning and control parameters for radiated heating, slow and fast, floor heating slow and fast
- Integrated bus coupling unit
- 3 independently adjustable switching values for CO₂ concentration and relative air humidity for air quality control
- Output for 1, 2, or 3-stage fans (humidity and CO₂)
- Output for 1, 2, or 3-point positioning signal (humidity and CO₂)
- Setpoint for room temperature and relative humidity and CO₂ concentration adjustable via KNX

Stock No.	Product No.
S55624-H107	QMX3.P02

Room operator unit KNX with temperature sensor, segmented backlit display, touchkeys

QMX3.P34

Functions:

- Temperature sensor
- Segmented backlit display and touchkeys
- Temperature control, adjustable as PWM control and/or modulating control (PID algorithm), for pure heating mode, pure cooling mode, heating and cooling mode
- Operating modes switchable via KNX or display: Comfort mode, Pre-Comfort, energy savings and protection mode
- Adjustable commissioning and control parameters for radiated heating, slow and fast, floor heating slow and fast
- Integrated bus coupling unit
- 3 independently adjustable switching values for CO₂ concentration and relative air humidity for air quality control
- Output for 1, 2, or 3-stage fans (humidity and CO₂)
- Output for 1, 2, or 3-point positioning signal (humidity and CO₂)
- Setpoint for room temperature and relative humidity and CO₂ concentration adjustable via KNX

Pushbutton, quadruple, with status LED, with scene controller, with IR receiver decoder, aluminum metallic	5WG1287-2DB45	UP 287/45

The bus transceiver module (BTM) (see Chapter System Products and Accessories) or flush-mounting actuator with bus transceiver module (BTM) must be ordered separately. The matching design frame must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

Display and Operation Units

Pushbuttons with IR receiver decoder

S 425/72

IR remote, silver

IR hand-held transmitters:

- For wireless control of actuators via infrared signals, e.g. for switching on/off/toggle, dimming, send value, control solar protection or recall/save scenes
- 1 LED per group for control of transmission and battery
- Infrared wave length: 890 nm
- Infrared frequency: 455 kHz
- Transmission range: 20 m, non-directional
- Power supply by two commercially available 1.5 V batteries type Alkaline LR03/AAA

Dimensions (W x H x D) 55 x 154 x 24 mm

The 2 batteries of type LR03/AAA (1.5 V) required for operation are included in delivery.

Stock No. Product No.

5WG1425-7AB72 **S 425/72**

AP 42../13

IR wall switch, titanium white

- For wireless control of actuators via infrared signals, e.g. for switching On/Off/Over, dimming, value transmission, shutter/blind control or call up/store scenes
- 1 LED for control of transmission and battery
- Red LED cover
- DIP switches for selection of the channel number (1...64)
- Infrared wave length: 890 nm
- Infrared frequency: 455 kHz
- Transmitter range: 8 m, non-directional
- Power supply by two commercially available 1.5 V batteries type Alkaline LR03/AAA
- Mounting frame for mounting on a flush-mounting wall box, on a wall surface or with adhesive tape on an even surface

Dimensions (W x H x D) 82 x 115 x 21 mm

Range overview AP 42../13

Product Title	Stock No.	Product No.
IR wall switch, single, titanium white	5WG1420-3AB13	AP 420/13
IR wall switch, double, titanium white	5WG1421-3AB13	AP 421/13
IR wall switch, quadruple, titanium white	5WG1422-3AB13	AP 422/13

The 2 batteries of type LR03/AAA (1.5 V) required for operation are not included in delivery.

IR Receiver decoder

S 450/03

- For receiving IR signals transmitted from IR wall-mounted transmitters or IR hand-held transmitters
- Conversion of IR signals received from up to 32 IR channels into bus telegrams
- Configurable evaluation of the IR signals per IR channel as single button or as button pair
- Per IR button selectable functions
 - Switching on/off/over
 - Switching on or off at either rising or falling edge
 - Single button dimming
 - Single button sun protection control
 - 1-/8-bit scene control
 - 8-/16-bit value
 - Percentage value
 - Temperature value
 - Brightness value
 - Positively driven operation
- Depending on the selected main function
 - Per IR button selectable additional function executed either after a time delay (time delay configurable from 100 ms to 6550 s) or alternatively on a long button press
- Per IR button pair selectable functions
 - 2-button dimming with stop telegram
 - 2-button sun protection control
 - Transmission variable percentage value
 - Transmission variable 8-bit value
 - 1-/8-bit scene control
 - Positively driven operation
- Depending on the selected main function: per IR button selectable additional functions
 - Switching on/off
 - 8-16-bit value
 - Percentage value
 - Temperature value
 - Brightness value
 - Recall/save 1-bit scene 1
 - Recall/save 1-bit scene 2
 - Recall 8-bit scene
 - Positively driven on/off/deactivate
- Blocking can be selected for each IR button and configured individually
- Integrated bus coupling units, Bus connection via bus terminal
- Bus-powered electronics
- Including clamping spring and rosette for installation in ceilings, walls or lights
- For commissioning when mounted, a magnet is required, such as a 5WG1 590-8AH01 programming magnet

Dimensions (W x H x D) 25 x 26 x 75 mm

Stock No.	Product No.
5WG1450-7AB03	S 450/03

The programming magnet must be ordered separately.

Programming magnet for IR receiver decoders

S 590H01

Programming magnet for S 450 IR receiver decoders

Stock No.	Product No.
5WG1590-8AH01	S 590H01

1 Display and Operation Units

Multifunction devices

UP 204/..1

Room Controller Contouch, incl. bus coupling unit

- Multifunctional display/operating device for KNX, with 320 x 240 pixel, 2.8" LCD color display
- For the display and operation of at least 18 configurable room operator functions:
 - Switching On/Off/Over
 - Pushbutton function (bell function)
 - Switching on/off and dimming
 - Shutter/blind/roller control
 - Value transmission: 1 byte in %, 1 byte integer without prefix, 1 byte integer with prefix, 2 byte integer without prefix, 2 byte integer with prefix
 - Positively driven operation
 - Scene control: Store and call up scene 8 bit, store and call up scene 1 bit
 - Text display
 - Warning and alarm indications
- Operation using touch screen and/or by turning/pushing rotary/push button
- RGB LED as orientation light or for signaling alarm indications
- Buzzer for acoustic alarm indication or as feedback when operating touch screen
- Integrated room temperature sensors
- Analysis and weighting of an external inside temperature sensor
- Room temperature control can be set as a two-point control and/or continuous-action control for heating only, for cooling only, or for heating and cooling mode
- Operating modes that can be switched via KNX: comfort mode, pre-comfort mode, energy-saving mode and frost or heat protection mode
- Local displaying of active operating modes or automatic or manual modes
- Local displaying of heating/cooling valve open, dew point alarm and open window
- Local switchover between automatic or manual mode, and between comfort, pre-comfort, energy-saving and protection modes
- Local, time-adjustable extension of comfort mode
- The room temperature setpoint value for comfort mode can be set via a rotary button on the room controller
- Basic room temperature setpoint value for comfort mode which can be set via the KNX
- Outdoor temperature-based tracking of temperature setpoint value in cooling mode
- Adjustable dead zone between the heating setpoint and the cooling setpoint for comfort mode
- Two-level heating or cooling
- Output of the control variable(s) either as an on/off switch command or as a positioning command in the range of 0...100%
- Local displaying of manually set fan speed step or automatic speed input
- Fan speed step can be set via the rotary button or entered automatically by the controller
- Weekly scheduling program for controller operating modes and for 18 room operator functions
- At least 16 time switching points per function per weekday
- Display of date and time
- Selection of at least 4 different design templates as operator and display interface
- Local activation of a cleaning function to lock the touch screen and the rotary/push button
- Slot for a micro SD card for transferring firmware and configuration data
- incl. bus coupling unit (included in delivery)
- Bus connection via bus terminal
- Connection of the separate 24 V DC boost voltage, power consumption approx. 50 mA
- Flush-mounting device for mounting in a Ø 60 mm installation box, with screw fixing

Dimensions (W x H x D)

86 x 116 x 30 mm

Room Control Unit

- Multifunctional display-/control panel for KNX with Dot-Matrix LCD display 96 x 128 pixels
- For the display and control of at least 10 adjustable room control functions:
 - Switching toggle/On/Off
 - Door bell function On/Off
 - Dimming
 - Solar protection control
 - Send 1 Byte/2 Byte value
 - Display 1 Bit/1 Byte/2 Byte value
 - Forced control
 - Display text messages
 - Recall and save scenes
 - Warning and alarm messaging
- 8 capacitive touch buttons for horizontal operation, blocking selectable for each function and configurable for each function depending on the value of the blocking object
- Green/red LED als Orientierungslicht, as orientation light, as status indication, as a response to pressing a button respectively to the signalling of alarm reports
- A signaler for acoustical alarm reports respectively as a status of the touch operation
- Integrated room temperature sensor
- Evaluation and weighting of an external inside temperature sensor
- Room temperature control configurable as two-step control and/or continuous control, for exclusive heating operation, exclusive cooling operation or heating and cooling operation
- Selectable operating modes over the KNX:
 - Comfort
 - Pre-comfort
 - Energy-savings and protection
- Local indication
 - Of the active operating modes or automatic- respectively manual mode
 - Inside temperature or outside temperature
 - Heating or cooling mode
 - Dew point alarm
 - Open windows
- Local switching between
 - Manual- and automatic mode
 - Comfort, pre-comfort, energy-saving- and protection mode
- Adjustable time-limited extension of the comfort mode
- Adjustable room temperature setpoint shifting for comfort mode
- Via KNX set basic setpoint value of the room temperature for comfort mode
- An outside temperature based temperature setpoint value tracing in the cooling operation
- Adjustable dead zone between the heating setpoint value and the cooling setpoint value for comfort mode
- Transmission of controller output(s) either as On/Off switching commands or as control commands in the range 0...100 %
- Local display of the manually selected fan rotational speed respectively of the automatic adjustment of the fan rotational speed
- Adjustable fan rotational speed respectively automatic adjustment of the fan rotational speed on the controller
- Weekly schedule programme for controller- operating modes, automatic mode and at the least 8 room control functions
- At the least 40 schedule tasks
- Display and set of the date and time
- User control of LCD background lighting and Background color
- Display system settings and room temperature controller in the languages: German, English, French, Italian od Spanish
- User setting of at least 3 operating languages
- Integrated bus coupling unit, bus connection via bus terminal
- Flush mounted device for the mounting in an flush wall box Ø 60 mm, for fixing on the mounting plate AQR2500NF via lateral springs (separately specified)

Text display, i-system

- Horizontal operation of three pushbutton pairs
- Up to nine freely configurable operator functions
- Switching on/off, switching toggle
- Switching on/off and dimming
- Value transmission
- Sun protection control
- Store and call up 1-bit scenes with the respective scene modules
- Store and call up 8-bit scenes
- Text display
- Warning and alarm indication
- With distinction between short and long button press for dimming, scenes and the control of sun protection equipment
- An LCD with two lines, each with 11 characters, which are assigned as a block to the upper two pushbutton pairs
- LCD contrast and brightness can be user adjusted
- LCD backlighting as orientation light
- Four LEDs for switching status indication
- Buzzer for acoustic alarm indication
- Display and input of date and time
- 10-pole BTI plug (BTI - Bus Transceiver Interface) for plugging onto a bus transceiver module (BTM) or UP actuator with bus transceiver module (BTM)

Dimensions (W x H x D) 55 x 55 x 11 mm

The bus transceiver module (BTM) (see Chapter System Products and Accessories) or flush-mounting actuator with bus transceiver module (BTM) must be ordered separately. The matching design frame must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

Touch Panel

UP 588/..3

- Multifunctional display/operating device for the KNX, with 320 x 240 pixels, 5.7" TFT color display and touch screen
- Dimming of LED background lighting over the operator interface
- For the display and operation of at least 210 communication objects on at least 20 display pages
- An additional page for the display and acknowledgement of at least 16 alarms
- Time program as weekly program for at least 110 communication objects and at least 10 switching tasks per weekday
- Presence simulation for at least 50 communication objects
- A trend module for storing and displaying graphics of the status values
- 1-bit or 8-bit scene control for at least 64 scenes
- At least 32 AND/OR operations, each comprising up to at least 4 communication objects
- At least 16 reference conditions for tripping one switching task respectively
- Individual password protection for each display page
- Buffered real-time clock and display of time and date
- Selection of at least 4 different design templates as operator and display interface
- Display of a loadable image as a start screen page or with display of a slide show containing at least 100 loadable images instead of a start screen page
- USB interface for loading images and symbols
- USB cable, 1 m long and a transfer rate of 480 MBit/sec.
- Pushbutton for device reset
- Integrated bus coupling units, Bus connection via bus terminal
- Flush-mounting device in flush-mounting/hollow-wall box

Dimensions (W x H x D) 161,5 x 135 x 64 mm

The matching design frame must be ordered separately.

The flush-mounting/hollow-wall box must be ordered separately.

IR remote, silver

S 425/72

IR hand-held transmitters:

- For wireless control of actuators via infrared signals, e.g. for switching on/off/toggle, dimming, send value, control solar protection or recall/save scenes
- 1 LED per group for control of transmission and battery
- Infrared wave length: 890 nm
- Infrared frequency: 455 kHz
- Transmission range: 20 m, non-directional
- Power supply by two commercially available 1.5 V batteries type Alkaline LR03/AAA

Dimensions (W x H x D) 55 x 154 x 24 mm

Accessories for pushbuttons UP 223 and UP 287 with IR receiver decoder

The 2 batteries of type LR03/AAA (1.5 V) required for operation are included in delivery.

	Stock No.	Product No.
	5WG1425-7AB72	S 425/72

IR wall switch, titanium white

AP 42../13

- For wireless control of actuators via infrared signals, e.g. for switching On/Off/Over, dimming, value transmission, shutter/blind control or call up/store scenes
- 1 LED for control of transmission and battery
- Red LED cover
- DIP switches for selection of the channel number (1...64)
- Infrared wave length: 890 nm
- Infrared frequency: 455 kHz
- Transmitter range: 8 m, non-directional
- Power supply by two commercially available 1.5 V batteries type Alkaline LR03/AAA
- Mounting frame for mounting on a flush-mounting wall box, on a wall surface or with adhesive tape on an even surface

Dimensions (W x H x D) 82 x 115 x 21 mm

Accessories for pushbuttons UP 223 and UP 287 with IR receiver decoder

The 2 batteries of type LR03/AAA (1.5 V) required for operation are not included in delivery.

N 151/01

IP viewer

- Interface converter between a KNX and an IP network, with the following simultaneously executable functions:
- As a WebServer for monitoring and control of up to 40 states and values transmitted via the KNX network, which can be displayed on up to 5 image pages of a PC connected to the IP network using Internet Explorer 6.0, 7.0, 8.0 or Firefox 3.0 (for other browsers, see documentation at www.siemens.com/gamma-td)
 - For the parameterization of a KNX system using ETS3.0f/ETS4
 - For communication between the KNX network and a ComBridge Studio visualization software
 - Special WEB page for the multilanguage adaptation of the presentation of an image page and a special WEB page for firmware upgrades
 - Ethernet interface for connection to the IP network using the Internet Protocol
 - RJ45 socket for connection to Ethernet 10 Mbits/s
 - 2 LED displays for indication of ready-to-run state and for IP communication
 - Integrated bus coupling units
 - KNX bus connection via bus terminal
 - Electronics powered via an external 24 V AC/DC power supply unit
 - Connection of external power supply unit via an extra-lowvoltage terminal
 - Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

Details AC1, AX, AC3, C load

The industrial and building control sector have seen the establishment of a range of different switching capacities and outputs. These tend to be specific to the respective applications and are specified in the corresponding national and international standards. The tests are defined such that they reproduce typical applications, such as motor loads (industry) or fluorescent lamps (buildings).

The AC1 and AC3 details are switching capacity specifications which have become established in the industrial sector:

- AC1: refers to the switching of overwhelmingly resistive loads (p.f. = 0.8)
- AC3: refers to an (inductive) motor load (p.f. = 0.45)

These switching capacities are defined in the standard EN 60947-4-1. "Contactors and motor starters – Electromechanical contactors and motor starters". The standard describes starters and/or contactors, which are originally used in industrial applications.

The designation AX has become established in building controls:

- AX: refers to a (capacitive) fluorescent lamp load

Switchable capacitive loads (200 µF, 140 µF, 70 µF or 35 µF) are mentioned in conjunction with fluorescent lamp loads. This switching capacity refers to the standard EN 60669 "Switches for household and similar fixed electrical installations – Particular requirements", which is primarily implemented for applications in building control.

A test with 70 µF is required for 6 A devices and with 140 µF for devices larger than 6 A. The switching capacity specifications AC and AX cannot be directly compared with each other.

In short, it is generally true that users who

- are primarily involved with industrial applications tend to refer to an AC3 switching capacity, whereas
- come from the building control and lighting sector generally refer to an AX switching capacity or C load (200 µF Loads)

Switching capacity differences must be taken into account when selecting a switching actuator.

Modular switch actuators

The modular design of the GAMMA switch actuators guarantees the flexible design for each use and requirement page. The integrated load current detection enables a wide range of new application options.

A switch actuator main unit can be simply expanded, if necessary, from a triple to a 6/9/12 or 15-times switch actuator and can be adjusted flexibly to the number and size of the loads to be switched. Using the coding bridge, up to four switch actuator expansions can be connected to the 6-pole interface on a main unit.

There is a broad spectrum of functions of the application software: It ranges from a multi-stage fan control, operating hours and switching operations counter, through scene control and thermal drive control to load detection and monitoring of the load current for each channel.

The extensive application program controls both the outputs of the main units and the outputs of all connected expansions. This includes:

- Recording and monitoring of load current per output for load failure or overload
- Simultaneous switching of all three outputs
- Implementation of a rotational speed stated as a percentage, in 1 to 3-stage switching commands (fan speed control)
- Implementation of a valve position stated as a percentage in a pulse width modulated switching command (thermal drive control)
- Switching operation and operating hours counter with limit monitoring per output
- Integrated 8-bit scene control, for which each output can be integrated in up to eight scenes

Block diagram: Switch actuator 15-times¹⁾²⁾

¹⁾ The block diagrams shown here are just an example of how modules can be interconnected and interfaced. For more detailed information, please refer to the technical documentation available at: www.siemens.com/gamma-td

²⁾ All modules with the label 10 AX, 16 AX and 20 AX are compatible and therefore can be used with each other.

Application

Switch actuators for rail-mounting are the KNX devices most used, both in non-residential and residential construction

- Switching of loads up to 20 AX per channel
- Three-phase switching of drives/loads
- Control of 1 to 3-stage supply air / ventilation systems
- Load current detection
- Detection of a significant equipment failure
- Preventive detection of failures through continuous current monitoring
- Recording of operating hours and switching operations
- Report of maintenance or service work
- Detection of circuit interruptions

Switch actuator, main module

N 562/11, N 512/11, N 513/11

- 3 Floating relay contacts
- Rated contact voltage, 230 V AC
- Interface for connecting a switching actuator submodule and software for controlling up to 4 switching actuator submodules
- Selectable 3-phase switching function (simultaneous switching of 3 outputs)
- Direct operation (local operation)
- LED for indicating direct operation
- LED for indicating the selected device
- LED for status indication per output
- Selectable 1- to 3-stage fan speed control function
- Function for controlling thermo-electrical drives
- Integrated 8-bit scene control
- Time functions: off delay, on delay, timer mode (automatic stairwell switch), night mode (lighting for cleaning), Warning of impending off
- Logical functions: Positively driven operation, Logic function (2 objects), Can be inverted per output (NO contact/NC contact)
- Per channel: transmitting status, Operating hours counter with limit monitoring, Switching cycle counter with limit monitoring, Load current recording, Load current monitoring
- Power supply for its own electronics and for the electronics of the connected switching actuator submodules via the bus voltage
- Bus connection via bus terminal

Dimension width (1 MW = 18 mm) 3 MW

Switch actuator

- One potential-free relay contact per output channel
- Electronics powered via an integrated power supply unit for 230 V AC
- Pushbutton for switching between bus operation and local operation
- A yellow LED indicating local operation
- 1 red LED per output channel to indicate switch status
- One pushbutton per output channel to activate the output through a UM-function in local operating mode
- Operational with an 230 V AC supply, (even with no bus voltage and faulty or not activated bus communication)
- Choice between identical or individually parameterized outputs
- Operating mode selectable for each channel (normal operation, time switch operation)
- Adjustable switching on/off delay
- Selectable logic link (AND/OR) between two communication objects and presettable logic operator for bus voltage return
- Possibility to add an additional night operation object per output channel for time limited activation of output (lighting) at night
- Selectable warning signal prior to imminent switching off in form of three times short off/on switching (flashing)
- Possibility to add one additional status indicator object per output channel, sending of status objects on request and/or automatically after change
- Possibility to add additional object to drive the integrated 8-bit scene controller, integrated 8 bit scene control and linking each output channel to up to 8 scenes
- Unchanged switch state for all output channels in case of power failure
- Selectable switch state after return of power for each output channel
- Integrated bus coupling units, bus connection via bus terminal or contact system to data rail, only 50% of standard busload
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

The data rail must be ordered separately. See chapter System Products and Accessories - Data rails.

N 511/02

Switch actuator 8 x 230 V AC, 16A

- One relay contact per output as switching element
- Rated operating voltage of relay contact: 230 V AC
- Rated current of relay contact: 16 A, p.f. = 1
- Integrated power supply for the electronics, connected to 230 V AC
- Push button to switch between bus operation and direct operation
- Yellow LED to indicate direct operation activated
- 1 red LED per output to indicate the switching state
- One push button per output to switch the output via a toggling function in direct operation mode, functional if 230 V AC present, (even if bus voltage absent or interrupted or bus communication not yet activated)
- Selection whether outputs are to be configured identically or individually
- Operation mode selectable for each output (normal mode, time switch mode)
- Selectable switching behaviour for each output (NO contact/NC contact)
- Adjustable On and Off delay times
- Selectable logic operation (AND/OR) for two communication objects and variable start value of the logic operation at bus voltage recovery
- Selectable additional night mode object for each output for time-limited switching on of the illumination at night
- Adjustable On period for night or time switch operation mode
- Selectable warning signal prior to imminent switching-off by means of three-times short off and on switching (flashing) at night or time switch operation mode
- Possibility to add one additional status indication object per output for status reporting
- Sending of status objects on request and/or automatically after a change
- Integrated 8-bit scene control and linking of each output into up to 8 scenes
- Unchanged switching state of all outputs if there is a power failure
- Adjustable switching state per output after mains voltage recovery
- Integrated bus coupling unit
- Bus connection both via bus terminal and contact system to a data rail
- Only half a standard bus load
- Rail-mounted device for mounting on rail TH 35 according to DIN EN 60715

Dimension width (1 MW = 18 mm) 8 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

5WG1511-1AB02	N 511/02

Switching actuator, 1 x 230 V AC, 20 A, 16 A, C load

RL 512/23

- 1 floating relay contact
- Rated contact voltage, 230 V AC
- Rated contact current 16 AX / 20 A
- Modular installation device for mounting in AP 118 automation module box or AP 641 room control box
- Switching operation and operating hours counter
- Configurable behavior in the event of a bus voltage failure/recovery
- Unchanged switching state of outputs in the event of system voltage failure
- Integrated 8-bit scene control
- Time functions: off delay, on delay, timer mode (automatic stairwell switch), night mode (lighting for cleaning), Warning of impending off
- Logical functions: Positively driven operation, logic function (1 object), logic function (2 objects), can be inverted per output (NO contact/NC contact)
- Transmitting status per channel
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal

Dimensions (W x H x D) 86.5 x 47.8 x 36.2 mm

The AP 641 room control box and AP 118 automation module box must be ordered separately.
See chapter Quick-Assembly System - Room Control Box.

Switch actuator

UP 5..

- Rated contact voltage 230 V AC
- 2 binary inputs for potential-free contacts
- 20 cm long wires for connecting phase conductor, output, inputs and bus
- Output to be configured as NO or NC contact
- Selectable preferred output state at bus voltage failure and recovery
- Switching status object
- Selectable additional functions:
 - On/off delay
 - Time-switch
 - Logic operation, function forced positioning
 - Forced position
- Selectable function of the binary inputs:
 - Acting as secondary inputs directly on the switching outputs or acting as independant binary inputs with bus communication
 - Free allocation of the functions switching, dimming, solar protection control, send value and scene control to the inputs
 - Two independent switching objects per input
 - Blocking object for each input
 - Separately selectable behaviour per input at bus voltage recovery
 - Telegram rate limitation for both inputs
- Integrated bus coupling units, bus-powered electronics
- Enclosed bus terminal for bus connection
- Installation in a flush-mounting wall or ceiling box with 60 mm diameter

Dimension (Ø x H) 53 x 28 mm

N 502/02

**Combi switching actuator, 8 x AC 230 V, 16 A, 8 x binary inputs**

- 8 inputs 12...230 V AC/DC
- 8 relay contact outputs
- Rated contact voltage 230 V AC
- Rated contact operating current 16 A, p.f. = 1
- Electronics power supply via an integrated power supply unit for 230 V AC
- Device functional even without bus connection or if bus voltage absent or bus communication interrupted or not yet activated
- Green LED to indicate operational readiness
- Push button to switch between bus and direct mode
- Yellow LED to indicate direct mode activated
- Push button for each output to switch the output in direct mode via a toggling function by a short actuation and for changing the output mode between remote control relay and time switch relay by holding down the push button for some seconds
- 1 red LED per output to indicate the switching state
- 1 red LED per input to indicate the current signal state
- Device preset at the factory for direct switching of an output through a toggling function via the input of the same name
- Selectable function for each input when using the Engineering Tool Software (ETS):
 - Switching status / binary value transmission
 - Switching, short / long operation
 - Single button dimming, single button sun protection control, 1-button group control (sequence control)
 - 1-bit scene control
 - 8-bit scene control, 8-bit value, edge-triggered, 8-bit value, short / long operation
 - 16-bit floating point value, edge-triggered, 16-bit value, short / long operation, 16-bit value, edge-triggered, 16-bit floating point value, short / long operation
 - Selectable function for each pair of inputs: 2-button dimming with stop telegram, 2-pushbutton shutter/blind control
 - Selectable blocking / releasing of each input via a corresponding blocking object
 - Sending of the input objects after a change of status
 - Selectable logic operation (AND/OR) for one input with a further communication object and with variable start value of the logic operation at bus voltage recovery
- Setting by means of the ETS, whether all outputs are to be configured identically or individually
- Selectable mode for each output (normal mode, time switch mode)
- Optional addition of a night mode object for each output for time-limited switching On of the output (and hence the illumination) at night
- Variable On and Off delay times for each output
- Variable On period in night mode or in time switch mode
- Selectable warning signal prior to imminent switching-off by means of three-times short off and on switching (flashing) in night mode or in time switch mode
- Status object for reporting direct mode
- Optional status object per output for status reporting
- Sending of status objects on request and/or automatically after a change
- Integrated 8-bit scene control and linking of each output with up to 8 scenes
- Selectable switching state for each output at mains or bus power failure as well as after bus or mains voltage recovery
- Integrated bus coupling units with only half a standard bus load
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 8 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

N 562/01

Binary Output, 2 x 230V AC, 10A

- with one potential-free relay contact per output
- rated voltage 230 V AC
- rated current 10 A at p.f. = 1
- with selectable programs for the independent switching on/off of electrical loads, either with direct operation or with forced control, with status objects
- with operation as time switch or with on/off delay
- with logic operation (AND/OR) of two communication objects for channel A
- with selectable relay operating mode (NC contact / NO contact)
- with control of an electro thermal valve actuator or electrical heating
- with monitoring of the room temperature controller
- with adjustable characteristics of thermal drive (valve opened or closed for isolated drive)
- with communication object for reception of up to three window contact data per channel and closing of the valve if the window is open
- with communication objects for the reception of a frost alarm signal per channel
- with activation of the heating to 50 % of the On period (corresponds to a half-opened valve) if a frost alarm is received and on failure of communication with the room temperature controller
- with configurable output state in case of bus voltage failure and bus voltage recovery
- with bus-powered electronics
- with integrated bus coupling unit, bus connection via contact system to data rail
- for mounting on DIN rail EN 60715-TH35-7.5.

Dimension width (1 MW = 18 mm) 2 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Binary output devices, 2 x 230 V AC, 10 A (ohmic load), modular installation device

- 2 Floating relay contacts
- Rated contact voltage 230 V AC
- Rated contact current 10 A
- Integrated bus coupling unit
- Modular installation device for mounting in AP 118 automation module box or AP 641 room control box
- Bus-powered electronics
- Bus connection via bus terminal, Integrated bus coupling units
- Configurable behavior in the event of a bus voltage failure/recovery
- Unchanged switching state of outputs in the event of system voltage failure
- Integrated 8-bit scene control
- Time functions: off delay, on delay, timer mode (automatic stairwell switch), night mode (lighting for cleaning), Warning of impending off
- Logical functions: Positively driven operation, Logic function (1 object), Logic function (2 objects), Can be inverted per output (NO contact/NC contact)
- Transmitting status per channel
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal

Dimensions (W x H x D) 50.2 x 48.8 x 35.5 mm

The AP 641 room control box and AP 118 automation module box must be ordered separately. See chapter Quick-Assembly System - Room Control Box.

Universal I/O module

- 2 universal inputs/outputs, each adjustable as
 - Analog input 0...10 V DC, Analog output 0...10 V DC
 - Binary input for 10 V DC, Binary output for 10 V DC
- Analog input with limit value monitoring and signaling, with adjustable limit values and hysteresis
- Analog output with adjustable lower and upper limit of the output voltage with adjustable voltage value in the event of bus voltage failure and recovery
- Binary input with pulse edge evaluation
- Binary output with adjustable switching position in the event of bus voltage failure and recovery
- 2 inputs for the connection of temperature sensors²⁾ with Pt1000 measured element for temperature measurement in the range -25...+45 °C, with limit value monitoring and signaling, with adjustable limit values and hysteresis
- 2 binary outputs, relay contacts rated for 230 V AC, 10 A at p.f. = 1, with
 - Configurable actuated position (NO contact/NC contact)
 - Positively driven operation
 - Configurable switching position in the event of bus voltage failure and recovery
- Electronics powered via an external 24 V AC/DC power supply unit, power consumption approx. 100 mA
- Integrated bus coupling units
- Bus connection via bus terminal and contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

	Stock No.	Product No.
	5WG1670-1AB03	N 670/03

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

For physical sensors, see Chapter, Physical sensors - without KNX connection.

N 26..E/..1

Binary input device

- Length of unshielded connecting cable per input of max. 100 m
- Integrated power supply for 230 V AC to supply the electronics
- Integrated bus coupling units, Bus connection via contact system to data rail, bus connection via bus terminal
- LED per binary input for status display
- Input functions: Telegram rate limitations, configurable debounce time, locking of inputs using blocking objects, adjustable duration of long button press, Configurable contact type (NO contact/NC contact)
- Transmission parameters: Adjustable cyclic transmission, Configurable transmission in the event of changes to the input, Configurable transmission in the event of bus voltage recovery
- Short/long button press can be evaluated
- Switching on/off/over
- Value transmission 8 bit, 16 bit
- Dimming: single button dimming, 2-pushbutton dimming with stop telegram (4 bit)
- 1-/2-pushbutton shutter/blind control
- Store and call up scene, 1-bit in conjunction with scene module
- Pulse counting with/without limit value monitoring (8 bit, 16 bit, 32 bit)
- 1-pushbutton group control

N 26../01

Binary input device

- Max. cable length, unshielded, twisted 100 m
- Configurable function per single input:
 - Switching state/send binary value
 - Switch edge, switching on short / long pulse
 - 8-bit value edge
- Configurable function per pair of inputs:
 - 2-pushbutton dimming with stop telegram, 2-pushbutton shutter/blind control
- Transmission of the input objects after a change of status
- Configurable cyclic transmission of the input objects
- Bus-powered electronics
- Integrated bus coupling units, bus connection via contact system to data rail

RL 260/23

Binary Input, 4 inputs for 12 ... 230 V AC/DC

- 4 Inputs for AC/DC 12...230 V
- Max. cable length, unshielded, twisted 100 m
- screwless terminals for connection and through-wiring of untreated single-core, stranded or multi-core conductors, 0.5 ... 2.5 mm [I/2]
- The following functions can be selected per input:
 - Switching state/send binary value
 - Switch edge/short/long switch
 - Dimming, shading control, single button group control
 - 1/8-bit scene control
 - 8-bit value edge
 - 8-bit value short/long
 - 16-bit floating-point value edge
 - 16-bit floating-point short/long
 - pulse counting with/without limit value monitoring (8/16/32 Bit)
- The following functions can be selected per input pair:
 - 2-pushbutton dimming with stop telegram (4 bit)
 - 2-pushbutton shading control
- Optional blocking of each input by means of the respective blocking object
- Transmission of the input objects after change
- Optional cyclic transmission of input objects
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal

Pushbutton interface

- Inputs / outputs each configurable for potential-free contacts or for control of an LED
- Generation of the sensing voltage for potential-free contacts
- For inserting into flush-mounting switch and socket boxes with Ø = 60 mm
- Inputs max. 10 m cable length, unshielded, twisted
- Bus-powered electronics, Bus connection via bus terminal
- Bus connection via bus terminal
- Input functions: Locking of inputs using blocking objects, Adjustable duration of long button press, Configurable contact type (NO contact/NC contact)
- Transmission parameters: Adjustable cyclic transmission, Configurable transmission in the event of bus voltage recovery
- Short/long button press can be evaluated
- Switching on/off/toggle
- Value transmission 8 Bit, 16 Bit
- Single button dimming
- 2-pushbutton dimming with stop telegram (4 bit)
- 2-pushbutton dimming with cyclic transmission (4 bit)
- 2-pushbutton dimming with value setting (8 bit)
- 1-/2-pushbutton shutter/blind control
- Scene store and call up scene: 8 Bit, in conjunction with scene module 1 Bit
- Pulse counting with/without limit value monitoring (8 bit, 16 bit, 32 bit)
- 1-pushbutton group control

N 501/01

Combination blind actuator, 4 x 230 V AC, 6 A, 8 x binary inputs

- 8 inputs for DC or AC in the range from 12 to 230 V
- 8 relay contact outputs slaved in pairs for controlling 4 x 230V AC sunblind drives
- Contact rated voltage 230 V AC
- Contact rated current 6 A, p.f. = 1
- Electronics powered by a 230 V AC integrated power supply
- Device functional even without bus connection or if the bus communication fails
- Preset on delivery for direct output control for each blind button function via the buttons connected to the inputs
- LED to indicate standby
- Key for switching between bus and direct mode
- LED for indicate direct mode activated
- Button for each relay contact output, for switching the output in direct mode while the button is held down
- LED per input to indicate the relevant signal status
- Selectable function for each input when using the ETS:
 - Switching status, send binary value
 - Toggle leading edge, Short/Long
 - 1-pushbutton dimming, sunblind control, group control
 - 1-bit/8-bit scene control
 - 8-bit/16-bit value leading edge, Short/Long
 - 16-bit floating point value leading edge, Short/Long
- Or for each pair of inputs:
 - Acting directly on the corresponding outputs as blind button
 - 2-button dimming with stop telegram or with cyclical sending
 - 2-pushbutton sunblind control
- Selectable blocking of each input via a corresponding blocking object
- Sending of input objects after change
- Selectable cyclical input object sending
- Individual or shared configuration of actuator channels
- Communication objects for each blind channel for driving the sun protection into the end positions or for stopping the procedure and adjusting the blind slats in steps
- Communication objects for setting position of slats and blinds in percentage information
- Automatic opening of the blind slats to a preconfigured nominal setting after uninterrupted driving down of the blind from the top to the bottom end position, with integrated 1-bit scene control for storing and calling up (reproduction) of 2 interim blind and slat settings
- Integrated 1-bit/8-bit scene control, 8 scenes can be integrated per channel
- Optional "Sun" object for integration in a sunlight tracking control system
- Differentiation between automatic and manual mode and with automatic switchover from automatic to manual mode for the channel in question by pressing a bus button for manual control of the corresponding sun protection
- Manual mode taking precedence over automatic position commands
- Optional central command for each device or each channel for switching the relevant channels to automatic mode and driving the sun protection into the up or down end position
- Alarm: move to safety position, Locking in this position for as long as alarm is active
- Travel lock (e. g. for cleaning the outer shutter/blinds)
- Status objects for each channel for querying or for automatic sending of sun protection and slat settings as a percentage value
- Optional status objects for reporting that the up or down position has been reached
- Integrated bus coupling unit
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 8 MW

	Stock No.	Product No.
	5WG1501-1AB01	N 501/01

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

N 502/02

Combi switching actuator, 8 x AC 230 V, 16 A, 8 x binary inputs

- 8 inputs 12...230 V AC/DC
- 8 relay contact outputs
- Rated contact voltage 230 V AC
- Rated contact operating current 16 A, p.f. = 1
- Electronics power supply via an integrated power supply unit for 230 V AC
- Device functional even without bus connection or if bus voltage absent or bus communication interrupted or not yet activated
- Green LED to indicate operational readiness
- Push button to switch between bus and direct mode
- Yellow LED to indicate direct mode activated
- Push button for each output to switch the output in direct mode via a toggling function by a short actuation and for changing the output mode between remote control relay and time switch relay by holding down the push button for some seconds
- 1 red LED per output to indicate the switching state
- 1 red LED per input to indicate the current signal state
- Device preset at the factory for direct switching of an output through a toggling function via the input of the same name
- Selectable function for each input when using the Engineering Tool Software (ETS):
 - Switching status / binary value transmission
 - Switching, short / long operation
 - Single button dimming, single button sun protection control, 1-button group control (sequence control)
 - 1-bit scene control
 - 8-bit scene control, 8-bit value, edge-triggered, 8-bit value, short / long operation
 - 16-bit floating point value, edge-triggered, 16-bit value, short / long operation, 16-bit value, edge-triggered, 16-bit floating point value, short / long operation
 - Selectable function for each pair of inputs: 2-button dimming with stop telegram, 2-pushbutton shutter/blind control
 - Selectable blocking / releasing of each input via a corresponding blocking object
 - Sending of the input objects after a change of status
 - Selectable logic operation (AND/OR) for one input with a further communication object and with variable start value of the logic operation at bus voltage recovery
- Setting by means of the ETS, whether all outputs are to be configured identically or individually
- Selectable mode for each output (normal mode, time switch mode)
- Optional addition of a night mode object for each output for time-limited switching On of the output (and hence the illumination) at night
- Variable On and Off delay times for each output
- Variable On period in night mode or in time switch mode
- Selectable warning signal prior to imminent switching-off by means of three-times short off and on switching (flashing) in night mode or in time switch mode
- Status object for reporting direct mode
- Optional status object per output for status reporting
- Sending of status objects on request and/or automatically after a change
- Integrated 8-bit scene control and linking of each output with up to 8 scenes
- Selectable switching state for each output at mains or bus power failure as well as after bus or mains voltage recovery
- Integrated bus coupling units with only half a standard bus load
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 8 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

UP 5..

Switch actuator

- Rated contact voltage 230 V AC
- 2 binary inputs for potential-free contacts
- 20 cm long wires for connecting phase conductor, output, inputs and bus
- Output to be configured as NO or NC contact
- Selectable preferred output state at bus voltage failure and recovery
- Switching status object
- Selectable additional functions:
 - On/off delay
 - Time-switch
 - Logic operation, function forced positioning
 - Forced position
- Selectable function of the binary inputs:
 - Acting as secondary inputs directly on the switching outputs or acting as independant binary inputs with bus communication
 - Free allocation of the functions switching, dimming, solar protection control, send value and scene control to the inputs
 - Two independent switching objects per input
 - Blocking object for each input
 - Separately selectable behaviour per input at bus voltage recovery
 - Telegram rate limitation for both inputs
- Integrated bus coupling units, bus-powered electronics
- Enclosed bus terminal for bus connection
- Installation in a flush-mounting wall or ceiling box with 60 mm diameter

Dimensions (Ø x H) 53 x 28 mm

Venetian blind actuator 1 x 230 V AC, 6 A, 2 x binary inputs

- 1 x 230 V AC, 6 A, 2 x binary inputs
- 1 channels (one up and one down each)
- Electrically interlocked relays (for reversing direction of rotation)
- Max. cable length, unshielded, twisted 5 m
- For 2 signal inputs (floating contact)
- Determination of switching state by means of the voltage generated in the device
- Configurable behavior in the event of a bus voltage failure
- Configurable behavior in the event of a bus voltage recovery
- Transmitting status per channel
- Travel lock (e. g. for cleaning the outer shutter/blinds)
- Alarm: Move to safety position, locking in this position for as long as alarm is active
- Individual configuration of actuator channels
- Travel to end position, stopping, stepwise adjustment
- Bus-powered electronics
- Integrated bus coupling units
- Bus connection via bus terminal
- For installation in flush-mounting switch and socket boxes with Ø 60 mm

Dimension (Ø x H) 53 x 28 mm

Universal dimmer UP 525/31, 210 VA, AC 230 V, 50 Hz (R,L,C load)

UP 525/31

- One output for switching and dimming resistive, inductive or capacitive loads
- With semiconductor output for switching and dimming of lamps
- Rated operational voltage 230 V AC, 50/60 Hz
- Connected load 50...210 VA
- Settable switching and dimming behaviour
- Selectable mode of operation (normal mode, timer mode)
- Soft on, Soft off
- Dimming or jumping to a new dimming value
- Time-delayed switch-off when dimming below a settable dimming value
- Status objects for switching and dimming value
- Short-circuit message
- Message of a load failure
- Integrated 8-bit scene control
- Object for blocking the output
- Configurable brightness value at start and end of a blocking phase
- Adjustable behaviour of the output after bus voltage recovery
- 2 binary inputs for potential-free contacts
- Selectable function of the binary inputs: acting as secondary inputs directly on the switching outputs or acting as independant binary inputs with bus communication
- Free allocation of the functions switching, dimming, solar protection control, send value and scene control to the inputs
- Two independent switching objects per input
- Blocking object for each input
- Separately selectable behaviour per input at bus voltage recovery
- Telegram rate limitation for both inputs
- About 20 cm long wires for connecting phase conductor, output, inputs and bus
- Bus-powered electronics
- Integrated bus coupling unit
- Enclosed bus terminal for bus connection
- For installation in a flush-mounting wall or ceiling box with 60 mm diameter

Universal I/O module

- 2 universal inputs/outputs, each adjustable as
 - Analog input 0...10 V DC, Analog output 0...10 V DC
 - Binary input for 10 V DC, Binary output for 10 V DC
- Analog input with limit value monitoring and signaling, with adjustable limit values and hysteresis
- Analog output with adjustable lower and upper limit of the output voltage with adjustable voltage value in the event of bus voltage failure and recovery
- Binary input with pulse edge evaluation
- Binary output with adjustable switching position in the event of bus voltage failure and recovery
- 2 inputs for the connection of temperature sensors²⁾ with Pt1000 measured element for temperature measurement in the range -25...+45 °C, with limit value monitoring and signaling, with adjustable limit values and hysteresis
- 2 binary outputs, relay contacts rated for 230 V AC, 10 A at p.f. = 1, with
 - Configurable actuated position (NO contact/NC contact)
 - Positively driven operation
 - Configurable switching position in the event of bus voltage failure and recovery
- Electronics powered via an external 24 V AC/DC power supply unit, power consumption approx. 100 mA
- Integrated bus coupling units
- Bus connection via bus terminal and contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.
The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).
For physical sensors, see Chapter, Physical sensors - without KNX connection.

Combination blind actuator, 4 x 230 V AC, 6 A, 8 x binary inputs

N 501/01

4

- 8 inputs for DC or AC in the range from 12 to 230 V
- 8 relay contact outputs slaved in pairs for controlling 4 x 230V AC sunblind drives
- Contact rated voltage 230 V AC
- Contact rated current 6 A, p.f. = 1
- Electronics powered by a 230 V AC integrated power supply
- Device functional even without bus connection or if the bus communication fails
- Preset on delivery for direct output control for each blind button function via the buttons connected to the inputs
- LED to indicate standby
- Key for switching between bus and direct mode
- LED for indicate direct mode activated
- Button for each relay contact output, for switching the output in direct mode while the button is held down
- LED per input to indicate the relevant signal status
- Selectable function for each input when using the ETS:
 - Switching status, send binary value
 - Toggle leading edge, Short/Long
 - 1-pushbutton dimming, sunblind control, group control
 - 1-bit/8-bit scene control
 - 8-bit/16-bit value leading edge, Short/Long
 - 16-bit floating point value leading edge, Short/Long
- Or for each pair of inputs:
 - Acting directly on the corresponding outputs as blind button
 - 2-button dimming with stop telegram or with cyclical sending
 - 2-pushbutton sunblind control
- Selectable blocking of each input via a corresponding blocking object
- Sending of input objects after change
- Selectable cyclical input object sending
- Individual or shared configuration of actuator channels
- Communication objects for each blind channel for driving the sun protection into the end positions or for stopping the procedure and adjusting the blind slats in steps
- Communication objects for setting position of slats and blinds in percentage information
- Automatic opening of the blind slats to a preconfigured nominal setting after uninterrupted driving down of the blind from the top to the bottom end position, with integrated 1-bit scene control for storing and calling up (reproduction) of 2 interim blind and slat settings
- Integrated 1-bit/8-bit scene control, 8 scenes can be integrated per channel
- Optional "Sun" object for integration in a sunlight tracking control system
- Differentiation between automatic and manual mode and with automatic switchover from automatic to manual mode for the channel in question by pressing a bus button for manual control of the corresponding sun protection
- Manual mode taking precedence over automatic position commands
- Optional central command for each device or each channel for switching the relevant channels to automatic mode and driving the sun protection into the up or down end position
- Alarm: move to safety position, Locking in this position for as long as alarm is active
- Travel lock (e. g. for cleaning the outer shutter/blinds)
- Status objects for each channel for querying or for automatic sending of sun protection and slat settings as a percentage value
- Optional status objects for reporting that the up or down position has been reached
- Integrated bus coupling unit
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 8 MW

N 502/02

Combi switching actuator, 8 x AC 230 V, 16 A, 8 x binary inputs

- 8 inputs 12...230 V AC/DC
- 8 relay contact outputs
- Rated contact voltage 230 V AC
- Rated contact operating current 16 A, p.f. = 1
- Electronics power supply via an integrated power supply unit for 230 V AC
- Device functional even without bus connection or if bus voltage absent or bus communication interrupted or not yet activated
- Green LED to indicate operational readiness
- Push button to switch between bus and direct mode
- Yellow LED to indicate direct mode activated
- Push button for each output to switch the output in direct mode via a toggling function by a short actuation and for changing the output mode between remote control relay and time switch relay by holding down the push button for some seconds
- 1 red LED per output to indicate the switching state
- 1 red LED per input to indicate the current signal state
- Device preset at the factory for direct switching of an output through a toggling function via the input of the same name
- Selectable function for each input when using the Engineering Tool Software (ETS):
 - Switching status / binary value transmission
 - Switching, short / long operation
 - Single button dimming, single button sun protection control, 1-button group control (sequence control)
 - 1-bit scene control
 - 8-bit scene control, 8-bit value, edge-triggered, 8-bit value, short / long operation
 - 16-bit floating point value, edge-triggered, 16-bit value, short / long operation, 16-bit value, edge-triggered, 16-bit floating point value, short / long operation
 - Selectable function for each pair of inputs: 2-button dimming with stop telegram, 2-pushbutton shutter/blind control
 - Selectable blocking / releasing of each input via a corresponding blocking object
 - Sending of the input objects after a change of status
 - Selectable logic operation (AND/OR) for one input with a further communication object and with variable start value of the logic operation at bus voltage recovery
- Setting by means of the ETS, whether all outputs are to be configured identically or individually
- Selectable mode for each output (normal mode, time switch mode)
- Optional addition of a night mode object for each output for time-limited switching On of the output (and hence the illumination) at night
- Variable On and Off delay times for each output
- Variable On period in night mode or in time switch mode
- Selectable warning signal prior to imminent switching-off by means of three-times short off and on switching (flashing) in night mode or in time switch mode
- Status object for reporting direct mode
- Optional status object per output for status reporting
- Sending of status objects on request and/or automatically after a change
- Integrated 8-bit scene control and linking of each output with up to 8 scenes
- Selectable switching state for each output at mains or bus power failure as well as after bus or mains voltage recovery
- Integrated bus coupling units with only half a standard bus load
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 8 MW

Stock No.	Product No.

Pushbutton interface

- Inputs / outputs each configurable for potential-free contacts or for control of an LED
- Generation of the sensing voltage for potential-free contacts
- For inserting into flush-mounting switch and socket boxes with Ø = 60 mm
- Inputs max. 10 m cable length, unshielded, twisted
- Bus-powered electronics, Bus connection via bus terminal
- Bus connection via bus terminal
- Input functions: Locking of inputs using blocking objects, Adjustable duration of long button press, Configurable contact type (NO contact/NC contact)
- Transmission parameters: Adjustable cyclic transmission, Configurable transmission in the event of bus voltage recovery
- Short/long button press can be evaluated
- Switching on/off/toggle
- Value transmission 8 Bit, 16 Bit
- Single button dimming
- 2-pushbutton dimming with stop telegram (4 bit)
- 2-pushbutton dimming with cyclic transmission (4 bit)
- 2-pushbutton dimming with value setting (8 bit)
- 1-/2-pushbutton shutter/blind control
- Scene store and call up scene: 8 Bit, in conjunction with scene module 1 Bit
- Pulse counting with/without limit value monitoring (8 bit, 16 bit, 32 bit)
- 1-pushbutton group control

Dimmers

Universal dimmers

Universal dimmers are dimmers which automatically determine the load type connected to their outputs (resistive, inductive or capacitive) and switch over accordingly to leading-edge phase mode (for a resistive or inductive load such as incandescent lamps or LV halogen lamps with an upstream conventional transformer) or trailing-edge phase mode (for a capacitive load such as LV halogen lamps with an upstream electronic transformer).

Block diagram 1:

1-channel operation without KNX, control via conventional pushbuttons at the two inputs (E1, E2)¹⁾

Block diagram 2:

Combination options for universal dimmers, main modules and expansions.¹⁾

Block diagram 3:

Combination options for universal dimmers, main modules and expansions, as well as for increased performance.¹⁾

¹⁾ The block diagrams shown here are just an example of how modules can be interconnected and interfaced. For more detailed information, see www.siemens.com/gamma-td

DALI – simple and easy to manage

Digital Addressable Lighting Interface (DALI) was launched on the market in 2004 as a substitute for the classic 1...10 V interface and is an interface definition for the control of up to 64 DALI devices, primarily ECGs, over a control device that acts as a master.

DALI communication enables the simultaneous control of all DALI devices using the same command (broadcast). In the event of control via broadcast, all DALI devices behave as if they are being mutually controlled over a 1...10 V interface. As a second control option, DALI supports the assignment of a DALI device to one of up to 16 groups (group addressing).

DALI also allows the control of each DALI device individually (individual addressing). Individual addressing means that the control device can be interrogated for the failure of a lamp or ECG, as well as the switching status and current dimming value. This means that the operating state of each lamp group and even each lamp is constantly available to higher-level systems.

DALI supports assignment of DALI devices to a maximum of 16 scenes. The specific settings for each scene are stored in the individual DALI devices and can be called up by a single command. This allows even complex scenes or very fast command sequences to be called up. The cost of dimming with KNX and DALI is no higher than 1...10 V.

Comparing the degree of cabling required for DALI and for 1...10 V, and the difference in cost for material and labor, the cost of implementing a project with DALI is approx. a third cheaper than when using 1...10 V.

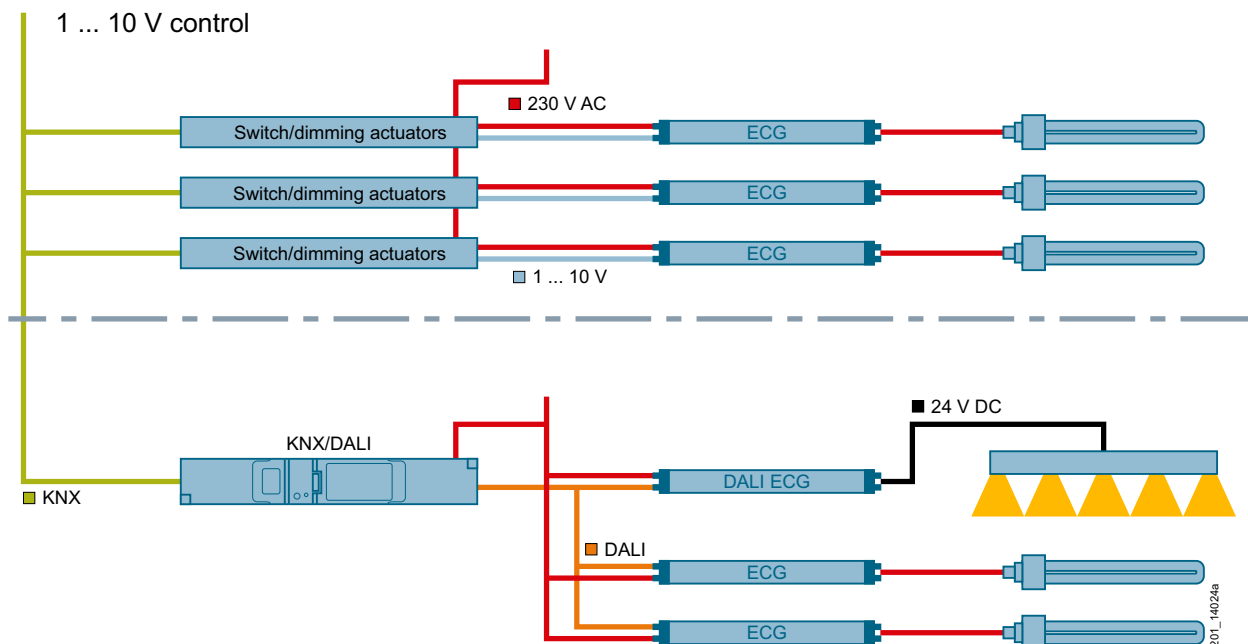

In the simplest of cases, a control device for light control with DALI can comprise a brightness sensor, a presence detector or a combined brightness sensor/presence detector, which can control a group of lamps - depending on occupancy and daylight. With these simple local applications, where DALI is used by sensors as an interface to one or more DALI devices, the broadcast method is used instead of the classic control method over 1...10 V. As such, these applications are not to be regarded as a networked system.

More high-performance control devices, such as the N 141/02 KNX/DALI gateway from Siemens, tap into all the options offered by DALI. A further option for the control of DALI devices is Flexcon. For further information, see Chapter FLEXCON.

OSRAM DALI-ECG corresponds to the DALI standard. This ensures a functionally equivalent exchange of the DALI-ECG for many years to come (investment security).

www.osram.com

Compare 1...10 V control system to DALI with KNX

For further information on DALI:
www.siemens.com/dali

[illegible]

- Light groups are not hard-wired
- Separate planning of control cables and power supply
- Even load distribution in the power supply
- Lower fire load due to fewer cables
- Planning is easier and faster
- New: Integration of emergency lighting in general lighting

Application Example

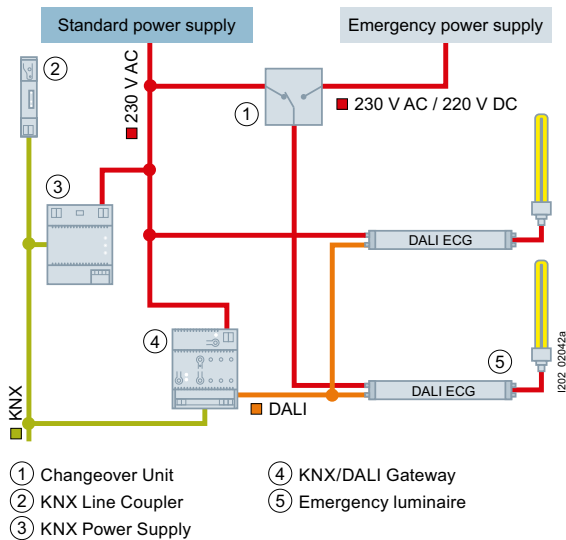

Intelligent solution via safety supply and KNX/DALI gateway with status indication in emergency mode

In emergency mode, communication is maintained via the safety supply from KNX and DALI. The failure detection of the general supply is executed via a KNX binary input, which the KNX/DALI gateway switches to emergency mode. It is not possible to manually operate the emergency lights in emergency mode.

Simple solution with KNX/DALI gateway

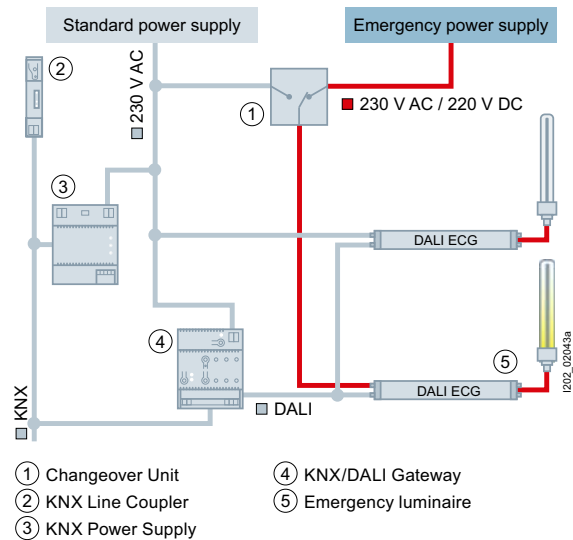

Normal mode

- Lighting control with DALI
- Feedback of fault indications and failure of lighting and ECGs to building control

Emergency operation

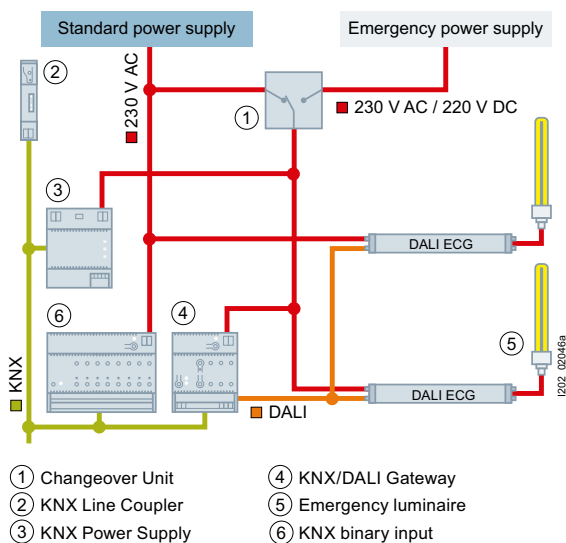

- Automatic emergency lighting in the event of DALI voltage failure
- Parameterization of dimming value of DALI-ECG for emergency lighting via KNX/DALI gateway

Intelligent solution via safety supply and KNX/DALI gateway with status indication in emergency mode

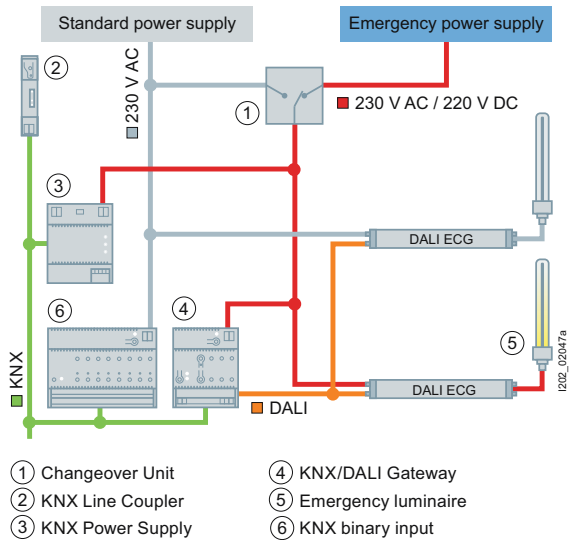

Normal mode

- Lighting control with DALI
- Feedback of fault indications and failure of lighting and ECGs to building control
- Monitoring of operating hours for lamp replacement

Emergency operation

- Parameterization of dimming value of DALI-ECG in emergency operation via KNX/DALI gateway
- The integrated buffer of the KNX power supply ensures an interruption-free switchover (< 200 ms) to emergency operation
- The continued transmission of status indications in emergency operation is possible because there is no interruption of supply to KNX and DALI.

Emergency lighting with single battery KNX/DALI gateway

Lighting

Overview and selection guides

Switch/dimming actuators

Normal mode

- Lighting control with DALI
- Initiate/record tests

Emergency operation

- Automatic emergency lighting acc. to parameterization via KNX/DALI gateway

Universal Dimmer, main modul (R,L,C load)

- One output for switching and dimming resistive, inductive or capacitive loads
- Interface for connecting universal dimmer submodules and with software for controlling up to 5 universal dimmer submodules
- Automatic adjustment to leading edge or trailing edge control, depending on the type of load
- Integrated power supply unit for the electronics, connected to 230 V AC
- A pushbutton on top of the device for switching between bus mode and direct mode and for selecting the device (output A...F) to be switched directly
- Two pushbuttons on top of the device for switching and dimming the selected output in direct operating mode
- 6 bicolor LEDs for indicating the switch status or an error (blinking) in the selected device (output)
- Selectable mode for each output (normal mode, one- or two-level timer mode, blinking)
- Integrated 8-bit scene control and integration of each output in up to 8 scenes
- Integrated bus coupling units, Bus connection via bus terminal
- Electronic protection of the output against overload, short circuit and temperature rise
- 2 subsidiary inputs for 230 V AC (with neutral line as reference potential) for connecting 2 conventional pushbuttons for direct switching and dimming of the output and with selectable additional transmission of these switching and dimming commands via the bus
- Max. length of connecting lines on the subsidiary inputs up to 100 m
- Determination of switching state by means of the voltage generated in the device

Dimension width (1 MW = 18 mm) 3 MW

Low-voltage halogen lamps with electronic transformers require a minimum load of 40 VA.

NEW PRODUCT

N 527../528..

Universal Dimmer, expansions, (R,L,C load)

- One output for switching and dimming resistive, inductive or capacitive loads
- Interface for connecting the universal dimmer submodule to the universal dimmer main module and / or connecting further universal dimmer submodules
- Rotary switch for adjusting the device (output) address to B...F
- Selectable objects and adjustable operation mode of each device (output) as well as for the main module via the main module's application program
- Automatic adjustment to leading edge or trailing edge control, depending on the type of load
- Electronics powered via an integrated power supply unit, for supply voltage 230 V AC
- Integrated 8-bit scene control and integration of each output in up to 8 scenes
- Selectable mode for each output (normal mode, one- or two-level timer mode, blinking)
- Electronic protection of the output against overload, short circuit and temperature rise
- 2 subsidiary inputs for 230 V AC (with neutral line as reference potential) for connecting 2 conventional pushbuttons for direct switching and dimming of the output and with selectable additional transmission of these switching and dimming commands via the bus
- Length of connecting lines on the subsidiary inputs up to 100 m
- Determination of switching state by means of the voltage generated in the device

UP 525/..3

5

Universal Dimmer, (R,L,C load)

- One output for switching and dimming resistive, inductive or capacitive loads
- Automatic adjustment to leading edge or trailing edge control, depending on the type of load
- Rated operational voltage 230 V AC
- Rated frequency 50...60 Hz
- Rated power at +35°C ambient temperature: 10...250 VA
- Electronic protection of the output against overload, short circuit and temperature rise
- Reporting of overload, short circuit and temperature rise via the bus
- Screwless terminals for connection and through-wiring of untreated single-core, stranded or multi-core conductors, 0.5...2.5mm²
- Selectable mode for each output (normal mode, one- or two-level timer mode, blinking)
- Adjustable on- and off-delay
- Separately adjustable dimming time from 0% to 100% for switching on / off and dimming brighter / darker
- Two dimming value objects, each with individually adjustable dimming time from 0...100%
- The ability to switch an output on or off by dimming brighter / darker
- Adjustable dimming value when switching on
- Immediate activation (jumping) or dimming to a new dimming value
- Selectable additional status object switching and / or status object dimming value for each output
- Additional object for each output for blocking / releasing the output
- Sending of status objects on request and / or automatically after a change
- Adjustable blocking time for sending status objects after restart and bus voltage recovery
- Adjustable dimming value for each output in the event of bus voltage failure and recovery, as well as for mains voltage recovery
- Additional night mode object for time-limited switching on the output (and hence illumination) at night
- Adjustable on period at night or with timer mode
- Selectable warning of imminent switching off the illumination by dimming to 50% of the previous dimming value during night mode or timer mode
- Integrated 8-bit scene control and integration of each output in up to 8 scenes
- Separately adjustable dimming time for scene control
- Selectable counting of operating hours and with threshold monitoring of the operating hours
- Selectable counting of load cycles and with threshold monitoring of the load cycles
- Bus-powered electronics
- Integrated bus coupling units, Bus connection via bus terminal

5WG1525-2AB23 RS 525/23

Universal dimmer UP 525/31, 210 VA, AC 230 V, 50 Hz (R,L,C load)

UP 525/31

- One output for switching and dimming resistive, inductive or capacitive loads
- With semiconductor output for switching and dimming of lamps
- Rated operational voltage 230 V AC, 50/60 Hz
- Connected load 50...210 VA
- Settable switching and dimming behaviour
- Selectable mode of operation (normal mode, timer mode)
- Soft on, Soft off
- Dimming or jumping to a new dimming value
- Time-delayed switch-off when dimming below a settable dimming value
- Status objects for switching and dimming value
- Short-circuit message
- Message of a load failure
- Integrated 8-bit scene control
- Object for blocking the output
- Configurable brightness value at start and end of a blocking phase
- Adjustable behaviour of the output after bus voltage recovery
- 2 binary inputs for potential-free contacts
- Selectable function of the binary inputs: acting as secondary inputs directly on the switching outputs or acting as independant binary inputs with bus communication
- Free allocation of the functions switching, dimming, solar protection control, send value and scene control to the inputs
- Two independent switching objects per input
- Blocking object for each input
- Separately selectable behaviour per input at bus voltage recovery
- Telegram rate limitation for both inputs
- About 20 cm long wires for connecting phase conductor, output, inputs and bus
- Bus-powered electronics
- Integrated bus coupling unit
- Enclosed bus terminal for bus connection
- For installation in a flush-mounting wall or ceiling box with 60 mm diameter

Dimension (Ø x H) 53 x 28 mm

KNX / DALI Gateway Twin

- Communication via KNX EIB with electronic ballasts (ECG) with a DALI interface
- Two (2) DALI output acc. to IEC 60929, each for communication with up to 64 DALI ballasts and at least 10 sensors
- Integrated power supply with input voltage 110...240 V AC, 50...60 Hz or 120...240 V DC for powering the gateway electronics and DALI output
- Maximum DALI output voltage of 19 V, short circuit resistant
- Incorrect voltage detection during commissioning, whether incorrect power line is connected to a DALI output
- LC display for displaying operation mode and error messages
- Pushbutton for switching between bus and direct operating mode
- One pair of push buttons for switching On/Off of all connected DALI ballasts
- One LED per DALI output for status signal of all connected luminaires in direct mode
- Configurable assignment of max. 128 DALI ECG to max. 32 DALI groups, exclusive controlled in groups (switching, dimming, set dimming value) and feedback for group status and lamp failure
- Configurable behaviour for bus failure (stand-alone mode)
- Control (switching, dimming, set dimming value) of all connected luminaires together in broad-cast mode
- Status signal and display of lamp and ECG failure per group and per DALI device
- Transformation of dimming commands into a temporary set point adjustment for ballasts with integrated constant light level control and directly connected light level sensor
- One or two level timer
- Integrated scene control for up to 32 scenes
- 16 integrated 2-level-controller for brightness control
- Assignment of DALI ECG to groups and test option for ECG, groups and scenes via ETS during commissioning
- Assignment of DALI sensors and test option of sensors via ETS during commissioning
- Integrated bus coupling unit with only half a standard bus load, bus connection via bus terminal
- Mounting on DIN rail EN 60715-TH35-7.5

Dimension width (1 MW = 18 mm)

KNX / DALI gateway, UL standard

- For communication via KNX EIB with electronic ballasts with a DALI interface
- DALI output acc. to IEC 60929, for communication with up to 64 DALI ballasts
- Integrated power supply with input voltage AC/DC 110...240 V, 50...400 Hz, for powering the gateway electronics and DALI output
- Maximum DALI output voltage of 16 V, short circuit resistant
- Green LED for displaying the operating voltage
- Pushbutton for switching between bus and direct operating mode
- Yellow LED for displaying direct mode
- One pair of push buttons for switching On/Off of all connected DALI ballasts
- One red LED in the switching button for displaying the switching state of all DALI ballasts (permanent LED light) and displaying a DALI fault condition by blinking
- Control (switching, dimming, and setting dimming value) as well as feedback of status and lamp failure of up to 64 DALI ballasts
- Operation of each DALI ballast either as individual device or as member of one of up to 16 DALI groups
- Configurable assignment of the DALI ballasts to up to 16 DALI groups, which can only be switched and dimmed in groups including reporting status and lamp failures in groups
- Control (switching, dimming, setting dimming value) of self-contained emergency luminaires as individual luminaires or as member of a DALI group
- Distinction between self-contained emergency luminaires with one or two DALI devices
- Starting the self-conducted testing of each individual inverter and reporting the test result via bus
- Distinction between function test, short duration test, and long duration test
- Optional configuration of any DALI ballast to dim to a preset dimming value in case of emergency mode
- Locking of switching and dimming commands as well as configuration while emergency mode is activated
- Activation of emergency mode based on a configurable number of failed DALI ballasts
- Transformation of dimming commands into a temporary set point adjustment for ballasts with integrated constant light level control and directly connected light level sensor
- One or two level timer
- Integrated scene control for up to 16 scenes
- Integrated one time or cyclical control of repeatable sequences or color effects
- Possible assignment of a CIN to a DALI ballast and with commissioning of DALI ballasts and test of channel, scene, and effect functionality within ETS
- Integrated bus coupling unit
- Only half a standard bus load
- Bus connection via bus terminal or contact system to data rail
- For mounting on DIN rail EN 60715-TH35-7.5

Dimension width (1 MW = 18 mm) 4 MW

	Stock No.	Product No.
	5WG1141-1AB02	N 141/02

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Switch/dimming actuator, 8 x DALI, 8 ECGs per DALI output

N 525E01

5

- 8 DALI outputs
- Control capacity for up to 8 DALI-ECGs per DALI output
- Power supplied to the electronics and the DALI outputs through an integrated power supply unit for 230 V AC
- Green LED for status display
- Pushbutton for selecting and switching over 4 DALI outputs respectively between bus and direct mode
- Yellow LED for indicating which 4 DALI outputs the direct mode is activated for
- 1 red LED per DALI output for indicating the circuit state or fault (e.g. lighting medium failure) of the connected group
- Four pushbutton pairs for switching and dimming of 4 DALI outputs in direct mode, functional when 230 V AC is applied (also when no bus voltage is connected and also when bus communication has not yet been started or is interrupted)
- Selection of identical or individual configuration of all DALI outputs
- Selectable operating mode per DALI output (normal mode, 1-level or 2-level time-switch mode)
- Per DALI output with command objects for switching on/off, dimming brighter/darker and setting dimming value
- Per DALI output optionally with up to 4 add-on status objects (circuit state and lighting medium failure, dimming value status and DALI status)
- Sending of status objects on request and/or automatically after change
- Per DALI output with add-on object for time-limited switching on of lighting in night mode (cleaning light)
- Warning approx. 1 minute before imminent switching off, by dimming to 50 % of former dimming value in night or timer mode
- Adjustable switching on and/or off of a channel through dimming brighter/darker, dimming value when switching on, actuating or dimming a new dimming value, dimming time from 0% to 100%
- Adjustable behavior on bus voltage or mains voltage failure and bus voltage or mains voltage recovery
- Add-on object and integrated 8bit scene control for saving and restoring up to 16 scenes per DALI output
- Integrated bus coupling unit as only half standard bus load
- Bus connection through bus terminal as well as contact system to data rail
- Device for mounting on rail TH35 DIN EN 60715

Dimension width (1 MW = 18 mm) 4 MW

	Stock No.	Product No.
	5WG1525-1EB01	N 525E01

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Lighting

Switch/dimming actuators

Control outputs 1...10 V

N 526E02

Switch/dimming actuator 8 x AC 230 V, 16 A, 1...10 V, UL standard

- For switching and dimming of eight mutually independent groups (channels) of fluorescent lamps with dimmable electronic control gear (ECG)
- 8 control voltage outputs 1...10 V DC
- Control power min. 60 OSRAM ECG dynamic each
- 8 switching outputs (relay contacts) for 230 V AC, 50/60 Hz, 16 A at p.f. = 1
- Each of them for connection of min. 30 OSRAM ECG dynamic for 58 W fluorescent lamps
- Slide switch per relay output for manual operation and switch position indication
- Selection between identical or individual configuration of all channels
- Command objects for each actuator channel for switching on/off, dimming brighter/darker and set/value
- One 1-bit and one 8-bit-status object (switching state and dimming value) per output
- Per channel configurable time-limited activation of the lighting during night mode (base lighting)
- Warning 30 seconds prior to imminent switch off by dimming to 50 % of the previous dimming value for each channel with time-limited operation
- Switching on or off of a channel by dimming brighter/darker
- Configurable dimming value upon switching on
- Jumping or dimming to a new dimming value
- Configurable dimming time from 0...100%
- Integrated 8 bit scene control and assignment of each output to up to 8 scenes
- Transmission of status objects on request, cyclically and/or automatically after changes
- Configurable behaviour on bus voltage failure and recovery
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 8 MW

	Stock No.	Product No.
	5WG1526-1EB02	N 526E02

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Presence detectors

UP 258.B..1

- Used as passive infrared detector for indoor ceiling installation
- Sensing range, horizontal 360 °, vertical approx. 100°, rotating/swiveling sensor head, optionally for shading off parts of the sensing range
- For monitoring an area for presence up to approx. 6 x 3.5 m, for a mounting height of 2.8 m (presence detection), motion detection up to 5 x 3.5 m
- Mixed light measurement, measuring range 20...1000 lux
- Presence detection for three function blocks (presence detector, motion detector and HVAC detector)
- Functions: Switching on/off, 8-bit value, 16-bit value, temperature value, brightness value, 8-bit scene control
- Blocking object per function module
- Adjustable delay time per function module, which can be optionally set to a fixed time, or two times that can be switched between via bus, or set to one value via bus
- Parallel operation of several presence detectors (master-slave, master-master) without logic modules
- Integrated IR receiver for S 255/11 IR remote control with six pushbutton pairs (see accessories)
- In the case of individual pushbuttons, selectable function per pushbutton: Switching Over, Switching On, Switching Off, call up 8-bit scene, 8-bit value, 16-bit value, temperature value, brightness value
- In the case of pushbutton pairs, selectable function Switching on/off, switching over/over, 2-pushbutton dimming with stop telegram, 2-pushbutton sun protection control, transmit variable 8-bit value, 8-bit scene control
- Blocking object for IR receiver decoder
- LED for display of detected motions in test mode
- Mounting on the ceiling in a flush-mounting device box with 60 mm diameter and at least 40 mm mounting depth, or in an AP 258E surface-mounting enclosure, which must be ordered separately (see accessories)

Dimension (Ø x H)

88 x 63 mm

Presence detector with brightness sensor

UP 258E21

- Integrated constant light level control and 2-step light control, optionally available in fully automatic or semi-automatic version
- 4 channels for offset groups

Stock No.

Product No.

5WG1258-2EB21

UP 258E21

Motion detector with brightness sensor

UP 258D11

- Integrated 2-step light control, optionally available in fully automatic or semi-automatic version
- 3 independent control channels each with 2 start objects and 2 end objects

Stock No.

Product No.

5WG1258-2DB11

UP 258D11

Accessories for UP 258.B..1

S 255/11

IR remote control accessories for UP 258E21 or UP 258D11

- 6 pushbutton pairs for the remote control of lighting, shutter/blinds and scenes via UP 258E21 or UP 258D11 presence detector
- Parameterization is via ETS in the UP 258E21 or UP 258D11 presence detector
- Range: approx. 4.5 m
- Power supply: CR2025 lithium button cell
- Degree of protection (acc. to EN 60529): IP40

Dimensions (W x H x D) 40 x 87 x 6 mm

Stock No.	Product No.

Brightness controller

UP 255/11, AP 255/12, GE 255/13

- For measuring the brightness on an illuminated work area through measurement of the reflected light
- Measuring range 0...2000 lux (with a reflectance of the illuminated area of approx. 30%)
- Including two rigid optical fiber rods:
 - Parallel light-sensitive surface for mounting surface
 - Inclined (30°) light-sensitive surface for mounting surface
- Integrated infrared receiver for calibration of the brightness measurement via the S 255 infrared remote calibration tool
- Transmission of the brightness measured value, either in the event of change and/or cyclically
- Discretionary set-point as a parameter or a communication object
- Optional two-step dimmer control for lights that can only be switched or constant light level control for lights that can be switched and dimmed
- Selectable starting value of the lighting at the start of constant light level control
- Optionally with dimming of up to 4 further lighting groups to the dimming value of the constant light level control or a dimming value that differs from the dimming value of the constant light level controller by an offset value, which can be set per group
- The constant light level control is automatically deactivated by manually dimming, or by dimming to a preset value
- Configurable behavior in the event of a bus voltage recovery

Range overview UP 255/11, AP 255/12, GE 255/13

Dual sensor for brightness measurement, temperature measurement, sun protection control, lighting control

- Brightness measurement, temperature measurement, sun protection control, lighting control
- For the detection and transmission of brightness and temperature
 - Temperature measuring range -25 °C...+55 °C
 - Brightness measuring range 1 Lux...100 kLux
 - Horizontal sensing angle -60°...+60°, vertical -35°...+66.5°
- For the control of switch, dimming and shutter/blind actuators, depending on the ambient luminosity and/or ambient temperature
- One sun protection channel for the automatic control of sun protection equipment, with
 - Starting and stopping of automation by means of an object or a dusk threshold
 - Up to three brightness thresholds for determining the height and position of the shutters/blinds or roller shutters
 - Optional teach-in of dusk thresholds and brightness thresholds by means of a teach-in facility
 - Blocking object for the temporary deactivation of the sun protection channel function
- Up to four universal channels for the control of switch, dimming and shutter/blind actuators, depending on ambient luminosity and/or temperature. Optionally available with:
 - Threshold switches for brightness
 - Threshold switches for temperature
 - Threshold switches with logical combination of brightness and temperature
 - Optional teach-in of brightness threshold for each universal channel by means of an associated teach-in facility
 - Deactivation option for each universal channel by means of an associated blocking object (1 bit)
 - Optional second object for transmission of a second telegram on fulfillment of threshold conditions
- Bus-powered electronics
- Integrated bus coupling units
- Bus connection via bus terminal
- Surface mounting
- Degree of protection: IP54

Dimensions (W x H x D)

Light level control module

- Ten mutually independent light control functions that control the indoor lighting depending on the outdoor brightness
- Shared current outdoor light intensity value for all 10 light control functions, with light intensity measured by an outdoor brightness sensor and sent to an N 342
- Separate brightness curve per light control function
- With configuration option per light control function as continuous dimming control for the detection and transmission of dimming commands to dimming or switch/dimming actuators or as 2-step control with hysteresis for detection and transmission of on/off switching commands to switch actuators
- Automatic adaptation (shifting) of the respective brightness curve to the desired new indoor brightness when the dimming value is manually changed (e. g. using a bus pushbutton) and restoration of the original curve when the lighting is switched off
- Control range up to 32000 lux

Dimension width (1 MW = 18 mm)

1 MW

The matching physical sensors must be ordered separately. See chapter Physical Sensors - sensors with KNX connection.

Sun Protection, Anti-Glare Protection, Utilization of Daylight

Overview and selection guides

General

Sunlight tracking control

When using the sunlight tracking control, the blind slats are not completely closed but track the current sun position so that the sun cannot shine directly into the room. However, the spaces between the slats allow as much diffuse daylight into the room as possible and ensure maximum daylight with minimum glare, while at the same time reducing energy costs. The sunlight tracking function continually adjusts the blind slats so that they are constantly placed vertical to the sun. This optimizes the utilization of daylight.

Shadow outline tracking

With activated shadow outline tracking, the sun protection is not fully extended, rather it is extended for a configurable distance (e. g. 50 cm) to allow a specified amount of sunshine to penetrate the room. Advantages: it is still possible to look out of the lower part of the window, any plants on the window sill still benefit from the sunshine, while occupants of the room are protected from its glare.

Sunlight tracking control and shadow outline tracking combined

It goes without saying that the two principles can be combined, thus offering optimum sun protection.

- ① Total reflection from direct sunshine
- ② Proportion of diffuse daylight

- ③ Maximum depth of sunlight penetration

- ① Total reflection from direct sunshine
- ② Proportion of diffuse daylight
- ③ Maximum depth of sunlight penetration

- ① Total reflection from direct sunshine
- ② Proportion of diffuse daylight

- ③ Maximum depth of sunlight penetration

- ① Total reflection from direct sunshine
- ② Proportion of diffuse daylight
- ③ Maximum depth of sunlight penetration

Venetian blind actuator, 4 x 230 V AC, 8 A, with limit position detection and sunlight tracking

N 522/03

- For the separate control per actuator channel of a sun protection, damper, door or window drive with a motor for 230 V AC and electromechanical or electronic limit switches
- Integrated electronics for detection of the actuation of an electromechanical limit switch and with auto-calibration of the travel time from one limit switch to the other
- Electrically interlocked relays to reverse the direction of rotation
- Relay contacts rated for nominal voltage 230 V AC, 8 A (resistive load)
- 4 terminals per channel for connection of L, R, N and PE conductor of a drive
- Configuration by the user whether all actuator channels are to be identically or individually parameterized
- Communication objects per actuator channel for moving the sun protection to the limit positions or to stop travel and for step-by-step adjustment of the blind slats
- Communication objects for moving the sun protection and adjusting the blind slats directly to a new position (as precisely as drive mechanics permit) by positioning commands as percentage values
- Automatic opening of blind slats up to a set position after the blinds have been lowered without any stop from the upper to the lower limit position
- Integrated 1-bit scene control for save and recall of 2 favored positions of blind and slats
- Integrated 8-bit scene control and assignment of up to 8 scenes per channel
- Optional object "Sunshine" for activation / deactivation of sunlight tracking of the slats for shading with greatest possible daylight component
- Differentiation between automatic and manual mode and with automatic switchover from automatic to manual mode of the respective actuator channel on activation of a bus pushbutton for manual control of the sun blind
- Priority of manual mode over automatic positioning commands
- Alarm object per device or per channel for moving the sun protection to the configured safety position in the event of a wind alarm e.g. and with blocking of travel to another position as long as alarm pending
- Travel blocking object per device or per channel for blocking the sun protection in its current position (needed during cleaning of an outdoor Venetian blind e.g.)
- Status objects per actuator channel for query or automatic transmission of sun blind and slat position as percentage value
- Electronics powered via an integrated power supply unit for 230 V AC
- Green LED for displaying the 230 V operating voltage
- Pushbutton for switchover between bus mode and direct mode
- Yellow LED for display of activated direct mode
- Two pushbuttons each per actuator channel for drive control in direct mode
- Integrated in the actuator housing and operational if the actuator is supplied with 230 V AC (even if bus voltage missing or communication not operational)
- Integrated bus coupling unit with only half a standard bus load
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 6 MW

	Stock No.	Product No.
	5WG1522-1AB03	N 522/03

N 523/..

Shutter/blind actuators

- Rated contact current 6 A
- LED for status indication per output
- Direct operation (local operation)
- Electrically interlocked relays (for reversing direction of rotation)
- Transmitting status per channel
- Status Position Sonnenschutz 8 Bit
- Travel lock (e. g. for cleaning the outer shutter/blinds)
- Alarm: Move to safety position, locking in this position for as long as alarm is active
- Individual or shared configuration of actuator channels
- Adaptation of objects and functions to drive type
- Sun protection control (up/down): travel to end position, stopping, stepwise adjustment
- Integrated power supply unit for the electronics, connected to 230 V AC
- Integrated bus coupling units
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

N 523/02

Venetian blind actuator, 4 x 230 V AC, 6 A

- 4 channels (one up and one down each)
- Rated contact voltage 230 V AC, 50 Hz
- Status position of slats, 8-bit
- Integrated 1-bit scene control, 2 Scenes to be integrated per channel
- Separate raising/lowering protection
- Sun protection control (up/down) using position data (8-bit value)

Dimension width (1 MW = 18 mm) 4 MW

Stock No. Product No.

5WG1523-1AB02 N 523/02

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

N 523/03

Roller shutter actuator, 4 x 230 V AC, 6 A

- 4 channels (one up and one down each)
- Rated contact voltage 230 V AC, 50 Hz
- Integrated 1-bit scene control, 2 Scenes to be integrated per channel
- Separate raising/lowering protection

Dimension width (1 MW = 18 mm) 4 MW

Stock No. Product No.

5WG1523-1AB03 N 523/03

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Venetian blind actuator, 4 x 230 V AC, 6 A, with sunlight tracking of slats, UL standard

N 523/04

- 4 channels (one up and one down each)
- Rated contact voltage 230 V AC, 50 Hz
- Automatic mode for sunlight tracking control
- Manual mode
- Indication of direct operation with status object
- Status position of slats, 8-bit
- Suitable for integration in a sunlight tracking control system
- Sun protection control (up/down) using position data (8-bit value)
- Slat control (open/close) using position data (8-bit value) or travel to end position, stopping, stepwise adjustment

Dimension width (1 MW = 18 mm) 4 MW

Stock No.

Product No.

5WG1523-1AB04

N 523/04

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Venetian blind actuator, 4 x 120 V AC, 6 A, with sunlight tracking of slats, UL standard

N 523C04

- 4 channels (one up and one down each)
- Rated contact voltage 120 V AC, 50 Hz
- Automatic mode for sunlight tracking control
- Manual mode
- Indication of direct operation with status object
- Status position of slats, 8-bit
- Suitable for integration in a sunlight tracking control system
- Sun protection control (up/down) using position data (8-bit value)
- Slat control (open/close) using position data (8-bit value) or travel to end position, stopping, stepwise adjustment

Dimension width (1 MW = 18 mm) 4 MW

Stock No.

Product No.

5WG1523-1CB04

N 523C04

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Venetian blind actuator, 8x 230 V AC, 6A, with sunlight tracking of slats

N 523/11

- 8 channels (one up and one down each)
- Rated contact voltage 230 V AC, 50 Hz
- Configurable behavior in the event of a bus voltage failure
- Configurable behavior in the event of a system voltage recovery
- Automatic mode for sunlight tracking control
- Manual mode
- Indication of direct operation with status object
- Status position of slats, 8-bit
- Integrated 1-/8-bit-scene control, 8 Scenes to be integrated per channel
- Suitable for integration in a sunlight tracking control system
- Sun protection control (up/down) using position data (8-bit value)
- Slat control (open/close) using position data (8-bit value) or travel to end position, stopping, stepwise adjustment

Dimension width (1 MW = 18 mm) 8 MW

Stock No.

Product No.

5WG1523-1AB11

N 523/11

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

N 501/01

Combination blind actuator, 4 x 230 V AC, 6 A, 8 x binary inputs

- 8 inputs for DC or AC in the range from 12 to 230 V
- 8 relay contact outputs slaved in pairs for controlling 4 x 230V AC sunblind drives
- Contact rated voltage 230 V AC
- Contact rated current 6 A, p.f. = 1
- Electronics powered by a 230 V AC integrated power supply
- Device functional even without bus connection or if the bus communication fails
- Preset on delivery for direct output control for each blind button function via the buttons connected to the inputs
- LED to indicate standby
- Key for switching between bus and direct mode
- LED for indicate direct mode activated
- Button for each relay contact output, for switching the output in direct mode while the button is held down
- LED per input to indicate the relevant signal status
- Selectable function for each input when using the ETS:
 - Switching status, send binary value
 - Toggle leading edge, Short/Long
 - 1-pushbutton dimming, sunblind control, group control
 - 1-bit/8-bit scene control
 - 8-bit/16-bit value leading edge, Short/Long
 - 16-bit floating point value leading edge, Short/Long
- Or for each pair of inputs:
 - Acting directly on the corresponding outputs as blind button
 - 2-button dimming with stop telegram or with cyclical sending
 - 2-pushbutton sunblind control
- Selectable blocking of each input via a corresponding blocking object
- Sending of input objects after change
- Selectable cyclical input object sending
- Individual or shared configuration of actuator channels
- Communication objects for each blind channel for driving the sun protection into the end positions or for stopping the procedure and adjusting the blind slats in steps
- Communication objects for setting position of slats and blinds in percentage information
- Automatic opening of the blind slats to a preconfigured nominal setting after uninterrupted driving down of the blind from the top to the bottom end position, with integrated 1-bit scene control for storing and calling up (reproduction) of 2 interim blind and slat settings
- Integrated 1-bit/8-bit scene control, 8 scenes can be integrated per channel
- Optional "Sun" object for integration in a sunlight tracking control system
- Differentiation between automatic and manual mode and with automatic switchover from automatic to manual mode for the channel in question by pressing a bus button for manual control of the corresponding sun protection
- Manual mode taking precedence over automatic position commands
- Optional central command for each device or each channel for switching the relevant channels to automatic mode and driving the sun protection into the up or down end position
- Alarm: move to safety position, Locking in this position for as long as alarm is active
- Travel lock (e. g. for cleaning the outer shutter/blinds)
- Status objects for each channel for querying or for automatic sending of sun protection and slat settings as a percentage value
- Optional status objects for reporting that the up or down position has been reached
- Integrated bus coupling unit
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 8 MW

Stock No.	Product No.
5WG1501-1AB01	N 501/01

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Shutter / blind actuator, 4 x DC 6 ... 24 V, 1 A

N 524/01

- LED for status indication per output
- Direct operation (local operation)
- 4 channels (one up and one down each)
- Electrically interlocked relays (for reversing direction of rotation)
- Configurable behavior in the event of a system voltage recovery
- Configurable behavior in the event of a bus voltage failure
- Automatic mode for sunlight tracking control
- Manual or standard mode
- Transmitting status
 - Per channel
 - Position of sun protection, 8-bit
 - Status position of slats, 8-bit
- Integrated 1-bit/8-bit scene control, 8 scenes to be integrated per channel
- Alarm: Move to safety position, locking in this position for as long as alarm is active
- Adaptation of objects and functions to drive type
- Suitable for integration in a sunlight tracking control system
- Sun protection control (up/down)
 - Using position data (8-bit value)
 - Travel to end position, stopping, stepwise adjustment
- Slat control (open/close)
 - Using position data (8-bit value)
 - Travel to end position, stopping, stepwise adjustment
- Electronics powered via an integrated power supply unit. Supply voltage 230 V AC
- Integrated bus coupling units
- Bus connection via bus terminal

Dimension width (1 MW = 18 mm) 6 MW

Product No.

5WG1524-1AB01

N 524/01

Shutter / blind actuator, 4 x 230 V AC, 6 A (2 x parallel)

N 521/01

- 2 channels (one up and one down each)
- Integrated isolating relay function for connection of 2 drives per channel
- Electrically interlocked relays (for reversing direction of rotation)
- Rated contact voltage 230 V AC, 50 Hz
- Rated contact current 6 A
- Configurable behavior in the event of a bus voltage failure
- Alarm: Move to safety position, locking in this position for as long as alarm is active
- Shared configuration of actuator channels
- Adaptation of objects and functions to drive type
- Sun protection control (up/down)
 - Using position data (8-bit value)
 - Travel to end position, stopping, stepwise adjustment
- Slat control (open/closed)
 - Using position data (8-bit value)
 - Travel to end position, stopping, stepwise adjustment sun protection control (up/down) and slat control (open/close)
- Bus-powered electronics
- Integrated bus coupling units
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 3 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Sun Protection, Anti-Glare Protection, Utilization of Daylight

Anti-glare/sun protection actuators

UP 520/..3

Shutter actuators

- Electrically interlocked relays (for reversing direction of rotation)
- Configurable behavior in the event of a bus voltage failure and recovery
- Automatic mode for sunlight tracking control
- Manual or standard mode
- Status: transmitting status per channel, status position of sun protection 8-bit, status position of slats 8-bit
- Integrated 1-/8-bit scene control
- 8 scenes to be integrated per channel
- Travel lock (e. g. for cleaning the outer shutter/blinds)
- Separate raising/lowering protection
- Alarm: Move to safety position, locking in this position for as long as alarm is active
- Individual or shared configuration of actuator channels
- Adaptation of objects and functions to drive type
- Suitable for integration in a sunlight tracking control system
- End position detection
- Using position data (8-bit value) travel to end position, stopping, stepwise adjustment sun protection control (up/down) and Slat control (open/closed)
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal

Range overview UP 520/..3

Product Title	Dimensions (W x H x D)	Stock No.	Product No.
Shutter Actuator with mounting frame and BTI socket	71 x 71 x 42 mm	5WG1520-2AB03	UP 520/03
Shutter Actuator without mounting frame	50 x 50.9 x 41.3 mm	5WG1520-2AB13	UP 520/13

UP 520/31

Venetian blind actuator 1 x 230 V AC, 6 A, 2 x binary inputs

- 1 x 230 V AC, 6 A, 2 x binary inputs
- 1 channels (one up and one down each)
- Electrically interlocked relays (for reversing direction of rotation)
- Max. cable length, unshielded, twisted 5 m
- For 2 signal inputs (floating contact)
- Determination of switching state by means of the voltage generated in the device
- Configurable behavior in the event of a bus voltage failure
- Configurable behavior in the event of a bus voltage recovery
- Transmitting status per channel
- Travel lock (e. g. for cleaning the outer shutter/blinds)
- Alarm: Move to safety position, locking in this position for as long as alarm is active
- Individual configuration of actuator channels
- Travel to end position, stopping, stepwise adjustment
- Bus-powered electronics
- Integrated bus coupling units
- Bus connection via bus terminal
- For installation in flush-mounting switch and socket boxes with Ø 60 mm

Sun Protection, Anti-Glare Protection, Utilization of Daylight

Central weather/sun protection systems

AP 257/..2

Weather-/sun station

- Receiver for GPS time signal
- Input the assembly location by selecting country and city or by stating the GPS longitude/latitude coordinates
- Transmission and receipt of date and time over bus
- Transmission of all measured values via bus
- Functions:
 - Monitoring of all measured values up to 3 limit values each
 - Sensor monitoring
 - Sunlight tracking control
 - Shadow outline tracking
 - Central command for activation/deactivation of sun protection at the start and end of sunshine
 - 4 AND operations
 - 4 OR operations
 - 8 OR operations for alarm/fault indications
 - Blocking function for window cleaning tasks
 - Safety/alarm objects
- LED for the display of GPS reception
- Electronics powered via an external power supply unit (20 V AC or 24 V DC, max. 185 mA)
- Integrated bus coupling units
- Bus connection via bus terminal
- Integrated sensors
- Heated sensor for measuring wind speed without mechanically moved parts, measuring range at least 0...35 m/s
- Brightness sensor, measuring range min. 0...150 klx
- Dusk detection, measuring range min. 0...1000 lx
- Outdoor temperature sensor, measuring range min. -35...+80 °C
- Heated precipitation monitors

Dimensions (W x H x D) 96 x 77 x 118 mm

The 4AC2402 electronic power pack is recommended for the power supply.

Range overview AP 257/..2

AP 257/42

Wind sensor

- Windspeed Measuring range 0...35 m/s
- Recording, querying and resetting the maximum wind speed
- Automatic indication in the event of a defective sensor
- Mast mountings
- Limit value monitoring (3 limit values)
- Transmission of sensor values via bus
- Logic operations (8 AND, 8 OR)
- Electronics powered via an external power supply unit
- Integrated bus coupling units, bus connection via bus terminal
- Surface mounting, degree of protection IP44

Dimensions (W x H x D) 96 x 77 x 118 mm

Heating, Cooling, Ventilation, Air-Conditioning

Overview and selection guides

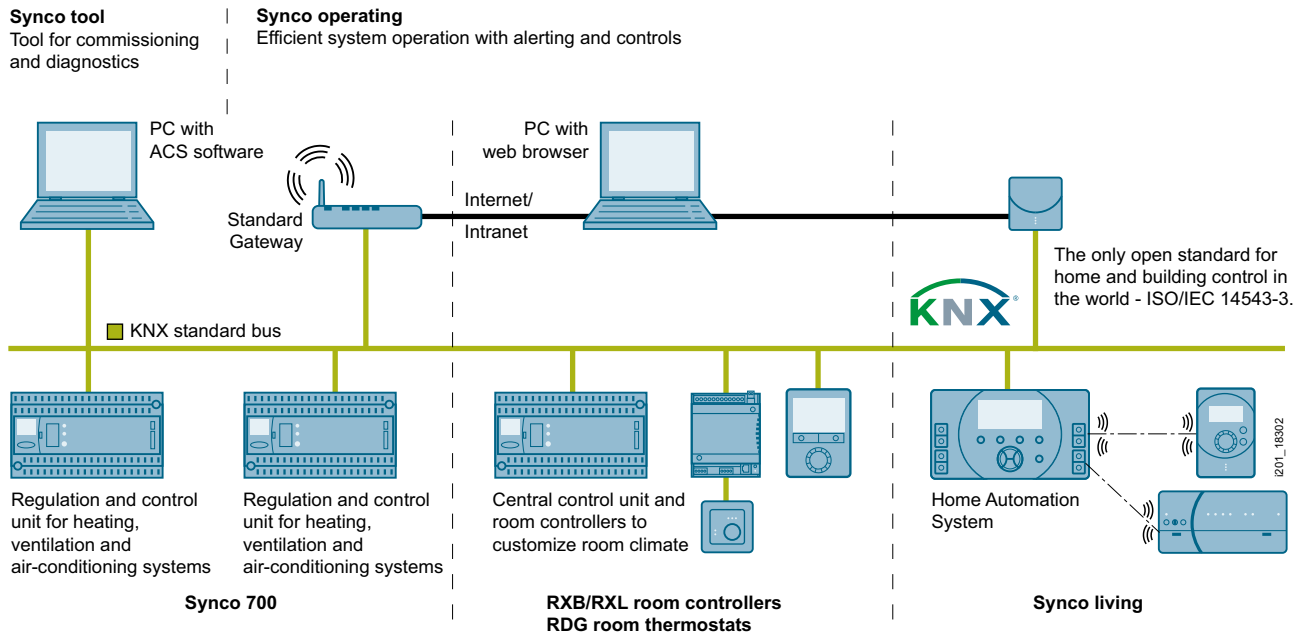

A wide range of HVAC products - optimally coordinated

HVAC products - low energy consumption thanks to efficient products

The Siemens HVAC product range offers a comprehensive assortment of products for every kind of application. The components are optimally coordinated with each other. You benefit not only from minimal installation and running costs, but also from the fact that all our products are extremely failsafe.

Intelligent convenience - for both indoor environment and operation

Easy-to-use components that offer maximum convenience. Adjust your living environment intuitively, quickly and accurately to your needs - no tedious learning curve.

Commissioning software tools

Synco products are commissioned using the software tool ACS. Synco devices use LTE, a protocol specifically for Synco devices. Communication is also implemented via the KNX bus cable. Synco devices can be operated together with GAMMA *instabus* devices using the same KNX bus cable. If you also want to send data between the GAMMA *instabus* (KNX S-mode) and the Synco devices, the data exchange for both product groups is configured using ETS.

A wealth of experience, high quality standards and simple handling

Siemens has now been promoting HVAC control technology for more than 60 years. In this time, it has acquired broad application expertise and skills in this specialist field. As a result, and thanks to a rigorous quality management system, Siemens HVAC products offer the highest quality, efficiency and reliability. They also reflect an in-depth knowledge of the HVAC market, building automation and their processes: furthermore, the components are particularly simple to install, commission and maintain.

²⁾ Closed (NC), open (NO).

Temperature sensor 4 x Pt1000

N 258/02

- For four Pt1000 sensors
- For the measurement and transmission of 4 temperatures in the range -40...+150 °C
- For connection of four Pt1000 temperature sensors²⁾, each via a 2-wire cable up to 50 m in length
- Configurable smoothing of a measured value through mean value generation
- Monitoring of a lower and upper limit value for each measured value, with configurable hysteresis for limit value signals
- Electronics powered via an integrated power supply unit for 230 V AC
- Green LED for displaying ready-to-run status
- Integrated bus coupling units
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The accompanying physical sensors must be ordered separately. See chapter Physical sensors - sensors without KNX connection.

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

	Stock No.	Product No.
	5WG1258-1AB02	N 258/02

Universal I/O module

N 670/03

- 2 universal inputs/outputs, each adjustable as
 - Analog input 0...10 V DC, Analog output 0...10 V DC
 - Binary input for 10 V DC, Binary output for 10 V DC
- Analog input with limit value monitoring and signaling, with adjustable limit values and hysteresis
- Analog output with adjustable lower and upper limit of the output voltage with adjustable voltage value in the event of bus voltage failure and recovery
- Binary input with pulse edge evaluation
- Binary output with adjustable switching position in the event of bus voltage failure and recovery
- 2 inputs for the connection of temperature sensors²⁾ with Pt1000 measured element for temperature measurement in the range -25...+45 °C, with limit value monitoring and signaling, with adjustable limit values and hysteresis
- 2 binary outputs, relay contacts rated for 230 V AC, 10 A at p.f. = 1, with
 - Configurable actuated position (NO contact/NC contact)
 - Positively driven operation
 - Configurable switching position in the event of bus voltage failure and recovery
- Electronics powered via an external 24 V AC/DC power supply unit, power consumption approx. 100 mA
- Integrated bus coupling units
- Bus connection via bus terminal and contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

For physical sensors, see Chapter, Physical sensors - without KNX connection.

AP 254/02

Dual sensor for brightness measurement, temperature measurement, sun protection control, lighting control

- Brightness measurement, temperature measurement, sun protection control, lighting control
- For the detection and transmission of brightness and temperature
 - Temperature measuring range -25 °C...+55 °C
 - Brightness measuring range 1 Lux...100 kLux
 - Horizontal sensing angle -60°...+60°, vertical -35°...+66.5°
- For the control of switch, dimming and shutter/blind actuators, depending on the ambient luminosity and/or ambient temperature
- One sun protection channel for the automatic control of sun protection equipment, with
 - Starting and stopping of automation by means of an object or a dusk threshold
 - Up to three brightness thresholds for determining the height and position of the shutters/blinds or roller shutters
 - Optional teach-in of dusk thresholds and brightness thresholds by means of a teach-in facility
 - Blocking object for the temporary deactivation of the sun protection channel function
- Up to four universal channels for the control of switch, dimming and shutter/blind actuators, depending on ambient luminosity and/or temperature. Optionally available with:
 - Threshold switches for brightness
 - Threshold switches for temperature
 - Threshold switches with logical combination of brightness and temperature
 - Optional teach-in of brightness threshold for each universal channel by means of an associated teach-in facility
 - Deactivation option for each universal channel by means of an associated blocking object (1 bit)
 - Optional second object for transmission of a second telegram on fulfillment of threshold conditions
- Bus-powered electronics
- Integrated bus coupling units
- Bus connection via bus terminal
- Surface mounting
- Degree of protection: IP54

Fan-coil unit controllers for offices, i-system

UP 237E

- For the display and operation of the room temperature control using a REG 540 fan-coil unit controller
- 5 yellow LEDs for the display of manually set fan speed step or automatic speed input
- 10-pole BTI plug (BTI - Bus Transceiver Interface) for plugging into a bus transceiver module (BTM) or UP actuator with bus transceiver module (BTM)
- Pushbutton for switching the room operating mode between comfort and energy-saving mode and for setting the required fan speed step or the automatic input of the speed step by the fan-coil unit controller
- Rotary button for setting the room temperature setpoint value within a user-defined range
- 3 green LEDs for the display of the current room operating mode (comfort, energy-saving or protection mode)
- Design: i-system

Dimensions (W x H x D)

Temperature controller, i-system

UP 237K..

- Integrated room temperature sensors
- Control can be set as a two-point control and/or continuous-action control (P or PI algorithm), for heating only, for cooling only, or for heating and cooling mode
- Operating modes that can be switched via KNX: comfort mode, pre-comfort mode, energy-saving mode and frost or heat protection mode
- Presence pushbutton to locally switch between comfort and pre-comfort mode or comfort and energy-saving mode and to extend comfort mode after operating energy-saving or protection mode
- Pushbutton for switching over between manual and automatic mode
- The room temperature setpoint value for comfort mode can be set via an interchangeable rotary button (+/-) on the controller and via the KNX
- Basic setpoint of the room temperature for comfort mode which can be set via the KNX
- Setpoint value for comfort mode in °C which can be set via an interchangeable rotary button on the controller
- Adjustable dead zone between the heating setpoint and the cooling setpoint for comfort mode
- Two-level heating or cooling
- Output of the control variable(s) either as an on/off switch command or as a positioning command in the range of 0...100 %
- 5 LEDs to display manual mode and the current operating modes
- 4 LEDs to display heating/cooling valve open, dew point alarm and open window
- For plugging onto a bus transceiver module (BTM) or a flush-mounting actuator with bus transceiver module (BTM)

Dimensions (W x H x D)

Heating, Cooling, Ventilation, Air-Conditioning

Room temperature controllers

Design-independent

Semi Flush Mount room thermostat with LCD for fan coil units and compressors in DX-type equipment

- KNX communications
- Operating modes: Comfort, Economy and Protection
- For heating and/or cooling applications
- 2 or 3-position control outputs
- Output for 1-speed or 3-speed fan
- 2 multifunctional inputs for keycard contact, external room / return air temperature (QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- Automatic or manual heating/cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Color of housing: signal white (RAL 9003)
- Backlit display

RDF..KNX Semi Flush Mount

Application selectable:

- 2-pipe system
- 2-pipe system with electrical heater
- 4-pipe system

Operating voltage	AC 230 V
Setpoint setting range	5...40 °C
Analog inputs, number	2
Relay outputs, number	5
Relay outputs	Fan: N.O. contacts, non-floating Valve: N.O. contacts, non-floating
Relay output, switching voltage	AC 230 V
Relay output, switching current	5 (2) A
Type of fixing	Recessed rectangular conduit box BS4662 with fixing centres of 60.3 mm (ARG71)
Degree of protection	IP30

Range overview RDF..KNX Semi Flush Mount

Semi Flush-mount room thermostat for rectangular conduit box with KNX communications, for VAV application

RDU341

Semi Flush-mount room thermostat for VAV application

- KNX communications
- Output for a DC 0...10 V actuator and AC 230V electrical heater (ON-OFF)
- 2 multifunctional inputs for keycard contact, external room / return air temperature (QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- Operating modes: Comfort, Economy and Protection
- Modulating PI control
- Control depending on the room or the return air temperature
- Automatic or manual heating/cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Adjustable minimum and maximum limitation for air flow signal DC 0...10V
- Output signal inversion as an option

Application selectable:

- Single-duct system
- Single-duct system with electrical heater

Operating voltage	AC 24 V
Setpoint setting range	5...40 °C
Analog inputs, number	2
Analog outputs, number	1
Analog output, signal	DC 0...10 V
Analog output, current	Max. ±1 mA
Relay outputs, number	1
Relay outputs	N.O. contact, potential-free
Relay output, switching voltage	AC 230 V
Relay output, switching current	Max. 5 (2) A
Type of fixing	Recessed rectangular conduit box BS4662 (ARG71) with fixing centres of 60.3 mm
Degree of protection	IP30
Dimensions (W x H x D)	86 x 86 x 57 mm

	Stock No.	Product No.
	S55770-T106	RDU341

The matching ARG71 flush-mounting box must be ordered separately. See chapter Display and Operation units - Room Temperature Controller.

RDG100KN

Room thermostat with KNX communications, AC 230 V, for fan coil units and universal applications

- KNX communications
- 3 multifunctional inputs for keycard contact, external room / return air temperature (QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- Operating modes: Comfort, Economy and Protection
- 2-position, 3-position or PWM control outputs
- Automatic or manual fan speed for 1-speed, 3-speed fan
- Automatic or manual heating / cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Backlit display

Application selectable:

- 2-pipe system
- 2-pipe system with electrical heater
- 2-pipe system and radiator / floor heating
- 4-pipe system
- 4-pipe system with electrical heater
- 2-stage heating or cooling system

Operating voltage	AC 230 V
Switching differential	Heating: 0.5...6 K Cooling: 0.5...6 K
Analog inputs, number	2
Analog input, signal	
Digital inputs, number	1
Relay outputs, number	3
Relay outputs	Fan: 1- or 3-speed
Relay output, switching voltage	AC 230 V
Relay output, switching current	5 (4) A
Triac outputs, number	3
Triac outputs	Valve, el. heater 2-position, PWM, 3-position
Triac output, switching voltage	AC 230 V
Triac output, switching current	Max. 1 A
Type of fixing	Wall mounting with screws
Degree of protection	IP30
Dimensions (W x H x D)	93 x 128 x 30.8 mm

RDG100KN

Room thermostat with KNX communications, AC 24 V, for fan coil units and universal applications, fan (1-/3-speed, DC), valves (2-point, DC)

RDG160KN

- KNX communications
- For applications with DC control outputs and DC or 3-speed fan output
- For applications with 2-position control output with DC fan output
- 3 multifunctional inputs for keycard contact, external room / return air temperature (QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- Operating modes: Comfort, Energy Saving and Protection
- Automatic or manual EC fan or 1-/3-speed
- Automatic or manual heating / cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Backlit display

Application selectable:

- 2-pipe system
- 2-pipe system with electrical heater
- 2-pipe system and radiator / floor heating
- 4-pipe system
- 2-stage heating or cooling system

Operating voltage	AC 24 V
Switching differential	Heating: 0.5...6 K Cooling: 0.5...6 K

NEW PRODUCT

RDG400KN

Room thermostat with KNX communications, AC 24 V, VAV heating and cooling systems

- KNX communications
- Output DC 0...10 V for VAV actuator and auxiliary output ON/OFF, PWM or 3-position or 3-position for VAV actuator and auxiliary output DC 0...10 V
- 2 multifunctional inputs for keycard contact, external room / return air temperature (1x, QAH11.1, QAA32), heat / cool changeover, operation mode changeover, window contact on/off, dewpoint monitor, electrical heater enabled, fault contact
- 1 input DC 0...10 V for damper position feedback
- Operating modes: Comfort, Economy and Protection
- Modulating PI control
- Control depending on the room or the return air temperature
- Automatic or manual heating / cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Minimum and maximum limitation of air flow signal
- Output signal inversion (DC 0...10 V) as an option
- Backlit display

Application selectable:

- Single-duct system
- Single-duct system with electrical heater
- Single-duct system and radiator / floor heating
- Single-duct system with heating / cooling coil

Operating voltage	AC 24 V
Setpoint setting range	5...40 °C

Wall-mounted room sensors and operator units for KNX

QMX3..

The wall-mounted room unit QMX3.. consists of:

- Base plate
- Sensor or room operator unit

The following functions are (depending on type):

- Temperature sensor or multisensor (T, r.h., CO2)
- Backlit display or LED display
- Touchkeys
- Switching and control of lighting, blinds, scenes

Measuring range, temperature	0...50 °C
Sensing element, temperature	NTC
Degree of protection	IP30
Mounting	Wall-mounting
Dimensions (W x H x D)	88.4 x 133.4 x 18 mm

Room operator unit KNX with temperature sensor, configurable touchkeys, LED display

QMX3.P02

Functions:

- Temperature sensor
- Configurable touchkeys with LED display
- Switching and control of lighting, blinds, scenes
- Window for labels
- Temperature control, adjustable as PWM control and/or modulating control (PID algorithm), for pure heating mode, pure cooling mode, heating and cooling mode
- Operating modes switchable via KNX or display: Comfort mode, Pre-Comfort, energy savings and protection mode
- Adjustable commissioning and control parameters for radiated heating, slow and fast, floor heating slow and fast
- Integrated bus coupling unit
- 3 independently adjustable switching values for CO2 concentration and relative air humidity for air quality control
- Output for 1, 2, or 3-stage fans (humidity and CO2)
- Output for 1, 2, or 3-point positioning signal (humidity and CO2)
- Setpoint for room temperature and relative humidity and CO2 concentration adjustable via KNX

	Stock No.	Product No.
	S55624-H107	QMX3.P02

NEW PRODUCT

QMX3.P34

Room operator unit KNX with temperature sensor, segmented backlit display, touchkeys

Functions:

- Temperature sensor
- Segmented backlit display and touchkeys
- Temperature control, adjustable as PWM control and/or modulating control (PID algorithm), for pure heating mode, pure cooling mode, heating and cooling mode
- Operating modes switchable via KNX or display: Comfort mode, Pre-Comfort, energy savings and protection mode
- Adjustable commissioning and control parameters for radiated heating, slow and fast, floor heating slow and fast
- Integrated bus coupling unit
- 3 independently adjustable switching values for CO2 concentration and relative air humidity for air quality control
- Output for 1, 2, or 3-stage fans (humidity and CO2)
- Output for 1, 2, or 3-point positioning signal (humidity and CO2)
- Setpoint for room temperature and relative humidity and CO2 concentration adjustable via KNX

N 670/03

Universal I/O module

- 2 universal inputs/outputs, each adjustable as
 - Analog input 0...10 V DC, Analog output 0...10 V DC
 - Binary input for 10 V DC, Binary output for 10 V DC
- Analog input with limit value monitoring and signaling, with adjustable limit values and hysteresis
- Analog output with adjustable lower and upper limit of the output voltage with adjustable voltage value in the event of bus voltage failure and recovery
- Binary input with pulse edge evaluation
- Binary output with adjustable switching position in the event of bus voltage failure and recovery
- 2 inputs for the connection of temperature sensors²⁾ with Pt1000 measured element for temperature measurement in the range -25...+45 °C, with limit value monitoring and signaling, with adjustable limit values and hysteresis
- 2 binary outputs, relay contacts rated for 230 V AC, 10 A at p.f. = 1, with
 - Configurable actuated position (NO contact/NC contact)
 - Positively driven operation
 - Configurable switching position in the event of bus voltage failure and recovery
- Electronics powered via an external 24 V AC/DC power supply unit, power consumption approx. 100 mA
- Integrated bus coupling units
- Bus connection via bus terminal and contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.
The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).
For physical sensors, see Chapter, Physical sensors - without KNX connection.

Thermal drive actuator

- Can be operated with instabus Room temperature controllers
- Direct operation (local operation), LED for operation/status display
- Rated voltage 230 V AC, 6 silent semiconductor switch
- Electronic protection of outputs against overload and short circuit
- 6 signal inputs (floating contacts), Determination of switching state by means of the voltage generated in the device, max. 50 m cable length, unshielded, twisted
- Funktionen Ausgänge: Switching (on/off per channel), Configurable transmission of input status objects
- Configurable behavior in the event of a bus voltage failure/recovery
- Electronics powered via an integrated power supply unit for supply voltage 230 V AC
- Integrated bus coupling units, Bus connection via bus terminal
- Modular installation device for mounting on TH35 EN 60715 mounting rail

Thermal drive actuator, 6 inputs, 2 x 3 outputs for control of 2 heating / cooling ceilings	5WG1605-1AB11	N 605/11

Fan-Coil Unit Controller

REG 540..

- Possible modes: comfort mode, standby mode, Night mode, frost protection mode, Heat protection mode
- Direct operation (test mode)
- Input for M 540 temperature sensor
- Potentiometer input (setpoint adjustment), max. 30 m cable length, unshielded, twisted
- Switching (on/off per channel)
- Value setting per channel, 8-bit
- Integrated controllers with PI algorithms
- Integrated bus coupling units, Bus connection via screw terminals

Fan-Coil Unit Controller, 230 V AC

REG 540/01

- Load outputs:
 - 3 x 230 V AC, 6 A (p.f. = 1)
 - 2 x 24 V AC, 5 W (p.f. = 1)
- Electronics powered via an integrated 24 V AC/DC power supply unit
- 2 signal input (floating contacts), Determination of switching state by means of the voltage generated in the device

Dimension width (1 MW = 18 mm) 6 MW

RXB2..

Room controller with KNX communication

The controllers are used for temperature control in individual rooms.

- For 2-pipe with changeover or 4-pipe fan coil systems
- For radiator and chilled ceiling (RXB24.1 only)
- Control of thermal valve actuators AC 24 V, PDM, valve and damper actuators AC 24 V (3-position) as well as KNX bus actuators
- Potential-free relay contacts for fan speed control
- Relay for electric heating (RXB22.1 only)
- KNX bus communication
- Connection to Desigo building automation and control system via PX KNX
- Commissioning with "Handy Tool" QAX34.3 or Synco ACS

Application description fan coil: CM110672

Application description RAD/CLC: CM110671

Operating voltage	AC 230 V
Frequency	50/60 Hz
Power consumption	Max. 12 VA
Control algorithm	PI
Digital inputs, number	2
Triac outputs	ON/OFF PWM 3-position
Triac output, switching voltage	AC 24 V
Triac output, switching current	0.5 A
Relay output, switching voltage	AC 250 V
Relay output, switching current	5 (4) A
Communication	Bus: KNX (S-mode and LTE mode) Room unit: PPS2
Service plug	RXT20.1
Mounting location	Ceiling voids with cover Fan coil Panel
Mounting	On DIN rail With screws
Dimensions (W x H x D)	113 x 167 x 62 mm

door/window contact

- Opening alarm for the monitoring of windows and doors, comprising:
 - 1 magnet (Ø 8 x 30 mm)
 - 1 magnetically operated contact in a fully cast plastic enclosure (Ø 8 x 30 mm)
 - Switching voltage: max. DC 110 V
 - Switching current: 10 mA...100 mA
 - Contact current carrying capacity: max. 5 W
 - Contact resistance: max. 150 mW
 - VdS-class B
 - 5 m long connection cable LiYY 4 x 0,14 mm²
- Suitable for flush and surface mounting
- 2 surface-mounting enclosure tops (43 x 12 x 12 mm)
- 2 surface-mounting enclosure bottoms
- 4 spacer plates (thickness: 2 x 4 mm or 2 x 2 mm)
- 2 flush-mounting flanges
- 4 antimagnetic countersunk self-tapping screws DIN 7982-ST2, 9 x 16-A2

QAX84.1/PPS2

Flush-mounted room unit complete with PPS2 interface and design frame

The set consists of:

- Operator unit,
- PPS2 bus coupling unit and
- Design frame DELTA line in titanium white.

Functionality:

- Acquisition of room temperature
- Switch for adjustment of room temperature setpoint
- Switch for mode selection (Off/Auto) and for manual fan control with fan coil systems (up to 3 speeds)
- LCD with display of room temperature and control mode

Dimensions (W x H x D)

VAV compact controller KNX

- Networked compact controller with KNX capability for plants with variable or constant air volume flow
- Integrated, highly precise differential pressure sensor, damper actuator and digitally configurable air volume controller
- Nominal torque 5 or 10 Nm, air damper rotation angle mechanically adjustable between 0 and 90°
- Configurable as single device per room or for cascade control with pressure ratio 1:1, positive pressure, or negative pressure
- Prewired with a 0.9 m connecting cable and a 0.9 m KNX bus cable

Can be configured as damper actuator (without air volume control) with ETS.

Dimensions (W x H x D) 71 x 158 x 61 mm

Electromotive valve actuators for HCVA

AP 562/02

Electromotive valve actuator with LED valve position indication

Electromotive, proportional (constant) valve actuator with LED valve position indication and with integrated bus coupling unit for direct connection to KNX:

- For latching to valve adapter
- Delivery with valve adapter rings suitable for Siemens (VDN../VEN../VPD../VPE../VD...CLC, V..I46../V..P47..) Danfoss RA, Heimeier, MNG, Schlösser ab 3/93, Honeywell, Braukmann, Dumser (distribution board), Reich (distribution board), Oventrop, Herb, Onda
- Max. positioning force: 120 N
- Cable permanently connected to the enclosure for bus connection and two additional signaling contacts (e. g. window contacts), which can be connected as binary inputs
- For operation solely with the bus voltage, i. e. without external auxiliary power
- Maintenance-free, silent drive
- Automatic valve stroke detection, through which the actuator travel is adjusted to the valve used

AP 561/01 and AP 561/02 are suitable for N 605 and N 650/11 thermal drive actuators, see chapter Heating, Cooling, Ventilation, Air-Conditioning - Actuators for HCVA.

STA..3

Electrothermal actuators with and without connecting cable for radiator, small, and zone valves

Electrothermal actuators with and without connecting cable for:

- Radiator valves VDN.., VEN.., VUN..
- MCV MiniCombiValves VPD.., VPE..
- Small valves VD1..CLC..
- Zone valves V..I46..
- Combi valves VPP46.., VPI46..
- Valves of other manufacturers

Actuators without connecting cable can be equipped with:

- Connecting cable up to 15 m, also halogen-free
- Connecting cable with LED operation indicator
- Connecting cable with auxiliary switch or DC 0...10 V module

Stroke	4.5 mm
Degree of protection	IP54
Mounting position	Any, 360°
Power consumption	2.5 W

Load Management

Peak load limiter

N 360/01

- For peak load limitation in plants with tariff-based power measurement
- Value of an energy pulse configurable in watt hours
- Configurable peak load limit of 30...1000 kW, with configurable warning limit of 25...1000 kW
- Configurable measuring period of 15, 30 or 60 minutes for the calculation of the power mean value
- Configurable cycle time of 15, 30, 60, 120 or 240 seconds for the load extrapolation interval
- Value of pulse 10...20000 W/h
- Up to 120 loads assignable to peak load limitation
- State monitoring and switching of loads via KNX
- With parameters assignable per load
- Power consumption of the load
- Turn-off priority (1...10)
- Release/locking of load
- Minimum make time
- Minimum break time
- Maximum break time
- Number of permissible switching cycles in 24 h
- Transmission of extrapolation data via KNX after each extrapolation
- Transmission of statistics data via KNX at the end of each measuring period
- 3 LEDs for display of availability (operating voltage), of an impending exceeding of the maximum value and of a missing synchronization pulse
- 5 LEDs for display of the current time interval within the measuring interval
- 8 LEDs for displaying the status of the first 8 loads
- Inputs for connection of energy pulses generated by utility company counters and for connection of synchronous pulses and high/low-tariff contacts
- Electronics powered via an integrated power supply unit for 230 V AC
- Date and time required via bus
- Integrated bus coupling units
- Bus connection via bus terminal and contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.
Like the documentation, the statistics software for the peak load limiter can be downloaded free of charge from the Internet at: www.siemens.com/gamma-td

Safety

Intrusion	9-3
Leakage	9-4

Presence-simulation module

N 345/01

- For recording switching, dimming and shutter/blind activities of up to 32 channels and up to a total of 5000 actions over a maximum period of 4 weeks (corresponds to 5 to 6 actions per channel and day)
- Continuous recording or one-off recording of sample weeks
- Detection of public holidays during recording, which is taken into account during simulation, with replay of the recorded telegrams in the same order, but with time-definable random deviation from the recording
- Return to the start of the simulation after 1 to 4 weeks
- Module-internal clock, which requires regular synchronization by a master clock
- Bus-powered electronics
- Integrated bus coupling units, Bus connection via contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 1 MW

The following devices can be used as a master clock or time source for synchronizing the module-internal real-time clock: a time switch (e. g. 5WG1 372-5EY01) or an N 350E IP controller.
The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

UP 272/11

Water sensor, DELTA profil, titanium white

- For detecting water in rooms with risk of leakages
- With water sensor for mounting near the ground with a 2 m long connecting lead (extendable to max. 20 m) with jack plug and a flush-mounting device
- For plugging onto a UP 110 or UP 114 bus coupling unit
- Indication of water/no water
- Alarm indication with adjustable cyclic transmission time
- Indication of defective device / cable
- Alarm indication for resetting the alarm
- Bus-powered electronics

Dimensions (W x H x D) 65 x 65 x 42 mm

Quick-Assembly System, Room Control Box

Overview and selection guides

Modular Room control

A new chapter for GAMMA instabus – decentralized and yet modular room automation with its own KNX components for flexible use in the room, based on one platform – regardless of installation location and type.

For surface mounting, for example, in a room or hallway, we recommend the new room automation box, providing space for eight KNX sensor/actuator modules. Moreover, the automation module box further permits the addition of an independent KNX sensor/actuator module close to the actual application, for example, in wall ducts, blind boxes or light housings.

Both automation boxes are assembled with RS or RL sensor/actuator modules in a special quick-mount design. The available modules are full KNX bus participants functioning as binary inputs and outputs, as well as blind actuators, universal dimmer, and switch actuators. The RS and RL modules have the same functionality for flush-mounting actuators as well. Identical functionality is available for different installation types or locations featuring the same configuration possibilities. As a result, the devices use a common application program regardless of mounting variant – i.e. devices for installation in the room automation box and automation module box as well as flush-mount with or without mounting frame.

Control Module Box, 1 slot for a sensor/actuator module, type RS or RL

AP 118/01

- 1 slot for a sensor/actuator module, type RS or RL
- Separate connection compartment and strain relief for bus cable and functional lines
- Modular installation device with screw fixing for installation in linking ducts, under raised floors or for surface mounting on the ceiling
- Enclosure: Plastic
- Degree of protection: IP20

Dimensions (W x H x D) 180 x 50 x 41.1 mm

Stock No.

Product No.

5WG1118-4AB01

AP 118/01

Room Control Box, 8 slots for a sensor/actuator module, type RS or RL

AP 641/01

- 8 slots for a sensor/actuator module, type RS or RL
- Internal bus cable for connection of the sensor/actuator module to the bus
- Separate connection compartment and strain relief for functional lines
- Two PE/N bars for accommodation of the PE and neutral conductor of the functional lines
- Bus connection via bus terminal
- Modular installation device with screw fixing for installation under raised floors, on the wall or ceiling or in wet rooms
- Enclosure: Plastic
- Degree of protection: IP54

Dimensions (W x H x D) 300 x 300 x 50 mm

RL 260/23

Binary Input, 4 inputs for 12 ... 230 V AC/DC

- 4 Inputs for AC/DC 12...230 V
- Max. cable length, unshielded, twisted 100 m
- screwless terminals for connection and through-wiring of untreated single-core, stranded or multi-core conductors, 0.5 ... 2.5 mm [1/2]
- The following functions can be selected per input:
 - Switching state/send binary value
 - Switch edge/short/long switch
 - Dimming, shading control, single button group control
 - 1/8-bit scene control
 - 8-bit value edge
 - 8-bit value short/long
 - 16-bit floating-point value edge
 - 16-bit floating-point short/long
 - pulse counting with/without limit value monitoring (8/16/32 Bit)
- The following functions can be selected per input pair:
 - 2-pushbutton dimming with stop telegram (4 bit)
 - 2-pushbutton shading control
- Optional blocking of each input by means of the respective blocking object
- Transmission of the input objects after change
- Optional cyclic transmission of input objects
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal

Dimensions (W x H x D) 86.5 x 47.8 x 36.2 mm

The AP 641 room control box and AP 118 automation module box must be ordered separately. See chapter Quick-Assembly System - Room Control Box.

Stock No. Product No.

5WG1260-4AB23 RL 260/23

RS 510/23

Binary output devices, 2 x 230 V AC, 10 A (ohmic load), modular installation device

- 2 Floating relay contacts
- Rated contact voltage 230 V AC
- Rated contact current 10 A
- Integrated bus coupling unit
- Modular installation device for mounting in AP 118 automation module box or AP 641 room control box
- Bus-powered electronics
- Bus connection via bus terminal, Integrated bus coupling units
- Configurable behavior in the event of a bus voltage failure/recovery
- Unchanged switching state of outputs in the event of system voltage failure
- Integrated 8-bit scene control
- Time functions: off delay, on delay, timer mode (automatic stairwell switch), night mode (lighting for cleaning), Warning of impending off
- Logical functions: Positively driven operation, Logic function (1 object), Logic function (2 objects), Can be inverted per output (NO contact/NC contact)
- Transmitting status per channel
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal

Dimensions (W x H x D) 50.2 x 48.8 x 35.5 mm

The AP 641 room control box and AP 118 automation module box must be ordered separately. See chapter Quick-Assembly System - Room Control Box.

Stock No. Product No.

5WG1510-2AB23 RS 510/23

Switching actuator, 1 x 230 V AC, 20 A, 16 A, C load**RL 512/23**

- 1 floating relay contact
- Rated contact voltage, 230 V AC
- Rated contact current 16 AX / 20 A
- Modular installation device for mounting in AP 118 automation module box or AP 641 room control box
- Switching operation and operating hours counter
- Configurable behavior in the event of a bus voltage failure/recovery
- Unchanged switching state of outputs in the event of system voltage failure
- Integrated 8-bit scene control
- Time functions: off delay, on delay, timer mode (automatic stairwell switch), night mode (lighting for cleaning), Warning of impending off
- Logical functions: Positively driven operation, logic function (1 object), logic function (2 objects), can be inverted per output (NO contact/NC contact)
- Transmitting status per channel
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal

Dimensions (W x H x D) 86.5 x 47.8 x 36.2 mm

The AP 641 room control box and AP 118 automation module box must be ordered separately.

Shutter Actuator, 1 x 230 V AC, 6 A**RS 520/23**

- 1 channels (one up and one down each)
- Electrically interlocked relays (for reversing direction of rotation)
- Configurable behavior in the event of a bus voltage failure/recovery
- Automatic mode for sunlight tracking control
- Manual and standard mode
- Status: Transmitting status per channel, status position of sun protection, 8-bit, status position of slats, 8-bit
- Integrated 1-bit/8-bit scene control
- 8 scenes to be integrated per channel
- Travel lock (e. g. for cleaning the outer shutter/blinds)
- Separate raising/lowering protection
- Alarm: Move to safety position, locking in this position for as long as alarm is active
- Individual configuration of actuator channels
- Adaptation of objects and functions to drive type
- Suitable for integration in a sunlight tracking control system
- End position detection
- Using position data (8-bit value) for sun protection control (up/down) and slat control (open/closed)
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal

Dimensions (W x H x D) 50.2 x 48.8 x 35.5 mm

The AP 641 room control box and AP 118 automation module box must be ordered separately. See chapter Quick-Assembly System - Room Control Box.

Gateways, Interface Converters

Overview and selection guides

Gateways in the KNX network

The KNX network

GAMMA *instabus* offers interfaces to many other technologies, such as Ethernet (LAN) and lighting controls with DALI, making it easy to exchange information and data via the KNX network. In particular, the KNXnet/IP supports connection to building control (OPC, PROFINET, SIMATIC S7, etc.).

KNX/Ethernet

Faster downloads save time

With the KNXnet/IP standard, KNX telegrams can be transmitted via Ethernet (LAN). This enables applications and solutions. Existing network infrastructures and technologies are used to transmit KNX data over greater distances. Links between buildings and/or building levels can be clearly and easily implemented using KNXnet/IP.

KNX/infrared

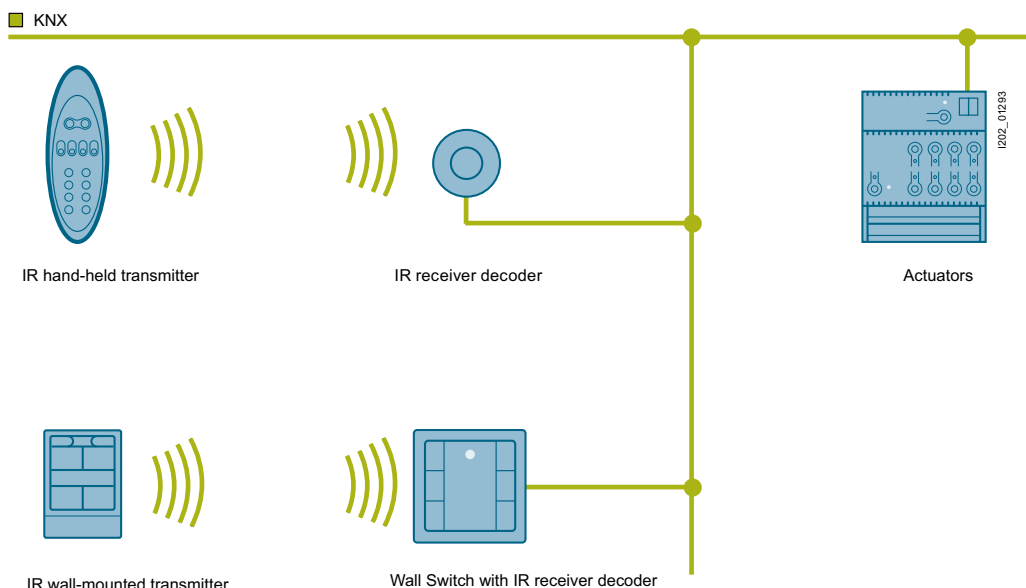

IR products

IR products are available for the remote control of room functions. Compared to radio solutions, IR is particularly interesting because

- there are applications in which radio-based remote control is not permitted (e. g. hospitals)
- the frequencies used are not allowed in all countries

Application

- Remote control of room functions: Lighting, shading, room climate, scenes, etc.
- Mounting on "movable" walls
- Use in hospitals where radio solutions are often prohibited
- Additional room functions which can be operated only by remote control (e. g. by service personnel, doctors, teachers, etc.)

System overview of IR products

For IR remote controls and IR wall-mounted transmitters (see chapter Display and Operation Units)

Gateways, Interface Converters

Overview and selection guides

KNX/SIMATIC S7

The level of automated applications is also increasing in the area of building automation. Customers are interested in using components from the field of industrial automation for the automation of infrastructure facilities. This is now possible using SIEMENS IP/Ethernet components.

Benefits

Use of tried and tested industrial components in the field of building automation, i. e. utilization of building automation data for the automation of factories. Simple transfer of configuration data from ETS3.

Application

Automation and monitoring of buildings using KNX devices with components from the SIMATIC product range.

Function

Modules for communication of a SIMATIC S7 with KNX bus via IP/Ethernet using a KNXnet/IP interface:

- N 146/02 IP routers
- N 148/22 IP interfaces
- N 350E IP controllers
- N 151 IP viewers

The KNX/EIB2S7 program package comprises modules for communication to the IP router/interface/controller/viewer and an editor for user-friendly parameterization of the modules.

Addressing is implemented by means of group addresses in the case of KNX and with DB and DW in the case of SIMATIC. Assignment of the various address terms to one another is implemented largely automatically in the KNX/EIB2S7 Editor.

One SIMATIC S7 can be connected to up to 5 KNXnet/IP interfaces, which permits the monitoring, operation and reading of a total of up to 7000 group addresses (depending on control type and the number of KNXnet/IP interfaces connected).

The modules also support the cyclic reading of values in 5 different, freely configurable cycles (10 min. - 1 x daily).

The following data point types are supported:

Data point type	Application	Length	Receive	Write	Read
EIS 1	Switching	1 Bit	X	X	X
EIS 2	Dimming	4 Bit	X	X	X
EIS 3	Time	3 Byte		X	
EIS 4	Date	3 Byte		X	
EIS 5	Floating-point	2 Byte	X	X	X
EIS 6	Scaling	8 Bit	X	X	X
EIS 7	Motor control	1 Bit	X	X	X
EIS 8	Priority	2 Bit	X	X	
EIS 9	Floating-point	4 Byte	X	X	X
EIS 11	32-bit counter	4 Byte	X	X	X
EIS 14	8-bit counter	1 Byte	X	X	X
EIS 15	String	14 Byte		X	

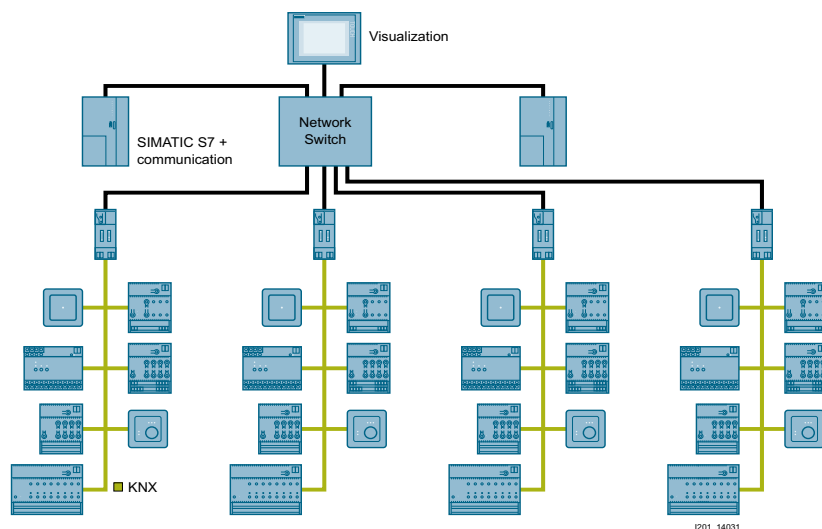

KNX/EIB2S7 supports the following SIMATIC S7 CPUs:

- ET 200
 - IM 151-8 PN/DP CPU
- S7 300/400
 - CPU 315-2 PN/DP
 - CPU 317-2 PN/DP
 - CPU 319-3 PN/DP
 - CPU 414-3 PN/DP
 - CPU 416-3 PN/DP
- Soft PLC
 - SIMATIC WinAC RTX 2008 SP 1
- SIMATIC S7 300 with CP 343 - 1
 - CPU 315-2 DP
 - CPU 317-2 DP
 - CPU 319-3 PN/DP
- SIMATIC S7 400 with CP 443 - 1 Advanced
 - CPU 412-2 MPI/DP
 - CPU 414-2 MPI/DP
 - CPU 416-2 MPI

IP interface

N 148/22

- LEDs for indicating that the device is ready-to-run, KNX communication, IP communication
- Electronics powered via an external nominal 24 V AC/DC power supply unit
- Power consumption at 24 V DC, 57 mA
- Power supply for the electronics via "Power over Ethernet" according to IEEE 802.3af
- Integrated bus coupling units, Bus connection via bus terminal
- Ethernet connection via RJ45 socket
- Plug-in terminal block for the connection of an external power supply unit
- Supports KNXnet/IP
- 4 Interface functions (Tunneling)
- 1 Interface functions (object server)
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 2 MW

The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

Stock No.	Product No.

IP controller

- LEDs for indicating that the device is ready-to-run, KNX communication, IP communication
- LC-Display
- Electronics powered via an external nominal 24 V AC/DC power supply unit
- Integrated bus coupling units
- Bus connection via bus terminal
- Ethernet connection via RJ45 socket
- Plug-in terminal block for the connection of an external power supply unit
- Supports KNXnet/IP
- 1 Interface functions (Tunneling)
- 1 Interface functions (object server)
- Integrated real-time clock weekly scheduling program for 100 scheduled entries/Astro function
- Yearly time switching functions
- 200 Event entries
- 30 Logic gates
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

Stock No. Product No.

5WG1350-1EB01 **N 350E01**

N 151/01

IP viewer

Interface converter between a KNX and an IP network, with the following simultaneously executable functions:

- As a WebServer for monitoring and control of up to 40 states and values transmitted via the KNX network, which can be displayed on up to 5 image pages of a PC connected to the IP network using Internet Explorer 6.0, 7.0, 8.0 or Firefox 3.0 (for other browsers, see documentation at www.siemens.com/gamma-td)
- For the parameterization of a KNX system using ETS3.0f/ETS4
- For communication between the KNX network and a ComBridge Studio visualization software
- Special WEB page for the multilanguage adaptation of the presentation of an image page and a special WEB page for firmware upgrades
- Ethernet interface for connection to the IP network using the Internet Protocol
- RJ45 socket for connection to Ethernet 10 Mbits/s
- 2 LED displays for indication of ready-to-run state and for IP communication
- Integrated bus coupling units
- KNX bus connection via bus terminal
- Electronics powered via an external 24 V AC/DC power supply unit
- Connection of external power supply unit via an extra-lowvoltage terminal
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

KNX / DALI Gateway Twin

N 141/31

- Communication via KNX EIB with electronic ballasts (ECG) with a DALI interface
- Two (2) DALI output acc. to IEC 60929, each for communication with up to 64 DALI ballasts and at least 10 sensors
- Integrated power supply with input voltage 110...240 V AC, 50...60 Hz or 120...240 V DC for powering the gateway electronics and DALI output
- Maximum DALI output voltage of 19 V, short circuit resistant
- Incorrect voltage detection during commissioning, whether incorrect power line is connected to a DALI output
- LC display for displaying operation mode and error messages
- Pushbutton for switching between bus and direct operating mode
- One pair of push buttons for switching On/Off of all connected DALI ballasts
- One LED per DALI output for status signal of all connected luminaries in direct mode
- Configurable assignment of max. 128 DALI ECG to max. 32 DALI groups, exclusive controlled in groups (switching, dimming, set dimming value) and feedback for group status and lamp failure
- Configurable behaviour for bus failure (stand-alone mode)
- Control (switching, dimming, set dimming value) of all connected luminaries together in broad-cast mode
- Status signal and display of lamp and ECG failure per group and per DALI device
- Transformation of dimming commands into a temporary set point adjustment for ballasts with integrated constant light level control and directly connected light level sensor
- One or two level timer
- Integrated scene control for up to 32 scenes
- 16 integrated 2-level-controller for brightness control
- Assignment of DALI ECG to groups and test option for ECG, groups and scenes via ETS during commissioning
- Assignment of DALI sensors and test option of sensors via ETS during commissioning
- Integrated bus coupling unit with only half a standard bus load, bus connection via bus terminal
- Mounting on DIN rail EN 60715-TH35-7.5

Dimension width (1 MW = 18 mm)

	Stock No.	Product No.

Accessories for N 141/31

UP 141/51

DALI Multisensor office

- Used as passive infrared detector for indoor ceiling installation
- Sensing range, horizontal 360 °, vertical approx. 80 °
- For monitoring an area with a diameter of approx. 4 m to approx. 7 m (depending on mounting and room height)
- LED on sensor head for display
- Used as brightness sensor
- Cone-shaped detection area, opening angle 90 °
- Measuring range 20 to 1000 lx
- Integrated DALI bus coupling unit for communicating with a central DALI controller
- Power supply through DALI line with 5 mA DALI bus load
- Plug-in terminals for connecting the DALI line
- For installation in suspended ceilings

Dimensions (Ø x H) 40 x 19 mm

Stock No. Product No.

5WG1141-2AB51 UP 141/51

UP 141/71

DALI Push button interface 4fold

- Binary input device
- 4 inputs to connect installation buttons
- Supported actions per input
- Short button press
- Long button press
- Integrated DALI bus coupling unit for communicating with a central DALI controller
- Power supply through DALI line with 6 mA DALI bus load
- For flush-mounting wall or ceiling outlet installations with a 60 mm diameter and depth of 60 mm
- Plug-in terminals for connecting the DALI line
- Cable set for connecting pushbuttons

Dimensions (W x H x D) 43 x 43 x 11 mm

Stock No. Product No.

5WG1141-2AB71 UP 141/71

KNX / DALI gateway, UL standard

N 141/02

- For communication via KNX EIB with electronic ballasts with a DALI interface
- DALI output acc. to IEC 60929, for communication with up to 64 DALI ballasts
- Integrated power supply with input voltage AC/DC 110...240 V, 50...400 Hz, for powering the gateway electronics and DALI output
- Maximum DALI output voltage of 16 V, short circuit resistant
- Green LED for displaying the operating voltage
- Pushbutton for switching between bus and direct operating mode
- Yellow LED for displaying direct mode
- One pair of push buttons for switching On/Off of all connected DALI ballasts
- One red LED in the switching button for displaying the switching state of all DALI ballasts (permanent LED light) and displaying a DALI fault condition by blinking
- Control (switching, dimming, and setting dimming value) as well as feedback of status and lamp failure of up to 64 DALI ballasts
- Operation of each DALI ballast either as individual device or as member of one of up to 16 DALI groups
- Configurable assignment of the DALI ballasts to up to 16 DALI groups, which can only be switched and dimmed in groups including reporting status and lamp failures in groups
- Control (switching, dimming, setting dimming value) of self-contained emergency luminaires as individual luminaires or as member of a DALI group
- Distinction between self-contained emergency luminaires with one or two DALI devices
- Starting the self-conducted testing of each individual inverter and reporting the test result via bus
- Distinction between function test, short duration test, and long duration test
- Optional configuration of any DALI ballast to dim to a preset dimming value in case of emergency mode
- Locking of switching and dimming commands as well as configuration while emergency mode is activated
- Activation of emergency mode based on a configurable number of failed DALI ballasts
- Transformation of dimming commands into a temporary set point adjustment for ballasts with integrated constant light level control and directly connected light level sensor
- One or two level timer
- Integrated scene control for up to 16 scenes
- Integrated one time or cyclical control of repeatable sequences or color effects
- Possible assignment of a CIN to a DALI ballast and with commissioning of DALI ballasts and test of channel, scene, and effect functionality within ETS
- Integrated bus coupling unit
- Only half a standard bus load
- Bus connection via bus terminal or contact system to data rail
- For mounting on DIN rail EN 60715-TH35-7.5

Dimension width (1 MW = 18 mm) 4 MW

	Stock No.	Product No.
	5WG1141-1AB02	N 141/02

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

N 525E01

Switch/dimming actuator, 8 x DALI, 8 ECGs per DALI output

- 8 DALI outputs
- Control capacity for up to 8 DALI-ECGs per DALI output
- Power supplied to the electronics and the DALI outputs through an integrated power supply unit for 230 V AC
- Green LED for status display
- Pushbutton for selecting and switching over 4 DALI outputs respectively between bus and direct mode
- Yellow LED for indicating which 4 DALI outputs the direct mode is activated for
- 1 red LED per DALI output for indicating the circuit state or fault (e.g. lighting medium failure) of the connected group
- Four pushbutton pairs for switching and dimming of 4 DALI outputs in direct mode, functional when 230 V AC is applied (also when no bus voltage is connected and also when bus communication has not yet been started or is interrupted)
- Selection of identical or individual configuration of all DALI outputs
- Selectable operating mode per DALI output (normal mode, 1-level or 2-level time-switch mode)
- Per DALI output with command objects for switching on/off, dimming brighter/darker and setting dimming value
- Per DALI output optionally with up to 4 add-on status objects (circuit state and lighting medium failure, dimming value status and DALI status)
- Sending of status objects on request and/or automatically after change
- Per DALI output with add-on object for time-limited switching on of lighting in night mode (cleaning light)
- Warning approx. 1 minute before imminent switching off, by dimming to 50 % of former dimming value in night or timer mode
- Adjustable switching on and/or off of a channel through dimming brighter/darker, dimming value when switching on, actuating or dimming a new dimming value, dimming time from 0% to 100%
- Adjustable behavior on bus voltage or mains voltage failure and bus voltage or mains voltage recovery
- Add-on object and integrated 8bit scene control for saving and restoring up to 16 scenes per DALI output
- Integrated bus coupling unit as only half standard bus load
- Bus connection through bus terminal as well as contact system to data rail
- Device for mounting on rail TH35 DIN EN 60715

Dimension width (1 MW = 18 mm) 4 MW

		Stock No.	Product No.
		5WG1525-1EB01	N 525E01

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

USB interface

N 148/11

- Electronics powered via bus voltage or via USB by a connected PC
- Integrated bus coupling units
- Bus connection via bus terminal or contact system to data rail
- Transmission PC – USB 1.1 or higher
- Electrically isolated access to the bus line via integrated socket USB (Typ B)
- Access to all bus devices in the system
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 1 MW

Stock No.	Product No.
5WG1148-1AB11	N 148/11

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

USB interface, DELTA profil, titanium white

UP 146E11

- Electronics powered via bus voltage or via USB by a connected PC
- Plug onto UP 110 or UP 114 bus coupling unit
- Transmission PC – USB 1.1 or higher
- Electrically isolated access to the bus line via integrated socket USB (type B)
- Access to all bus devices in the system

Dimensions (W x H x D) 65 x 65 x 42 mm

The bus transceiver module BCU1/2 must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

The matching design frame must be ordered separately. See chapter Display and Operation Units.

Stock No.	Product No.
5WG1146-2EB11	UP 146E11

UP 223/..5

Pushbutton with scene controller and IR receiver decoder, i-system

Dimensions (W x H x D)

55 x 55 x 11 mm

Range overview UP 223/..5

Product Title	Stock No.	Product No.
Pushbutton, triple, with status LED, with scene controller, with IR receiver decoder, titanium white	5WG1223-2DB15	UP 223/15
Pushbutton, triple, with status LED, with scene controller, with IR receiver decoder, aluminum metallic	5WG1223-2DB35	UP 223/35

The bus transceiver module (BTM) (see Chapter System Products and Accessories) or flush-mounting actuator with bus transceiver module (BTM) must be ordered separately. The matching design frame must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

IR remote controls and IR wall-mounted transmitters must be ordered separately. See chapter Display and Operation Units - Remote controls.

UP 287/..5

Pushbutton with scene controller and IR receiver decoder, DELTA style

Dimensions (W x H x D)

68 x 68 x 14 mm

Range overview UP 287/..5

Product Title	Stock No.	Product No.
Pushbutton, quadruple, with status LED, with scene controller, with IR receiver decoder, titanium white	5WG1287-2DB15	UP 287/15
Pushbutton, quadruple, with status LED, with scene controller, with IR receiver decoder, platinum metallic	5WG1287-2DB45	UP 287/45

The bus transceiver module (BTM) (see Chapter System Products and Accessories) or flush-mounting actuator with bus transceiver module (BTM) must be ordered separately. The matching design frame must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

IR remote controls and IR wall-mounted transmitters must be ordered separately. See chapter Display and Operation Units - Remote controls.

IR Receiver decoder**S 450/03**

- For receiving IR signals transmitted from IR wall-mounted transmitters or IR hand-held transmitters
- Conversion of IR signals received from up to 32 IR channels into bus telegrams
- Configurable evaluation of the IR signals per IR channel as single button or as button pair
- Per IR button selectable functions
 - Switching on/off/over
 - Switching on or off at either rising or falling edge
 - Single button dimming
 - Single button sun protection control
 - 1-/8-bit scene control
 - 8-/16-bit value
 - Percentage value
 - Temperature value
 - Brightness value
 - Positively driven operation
- Depending on the selected main function
 - Per IR button selectable additional function executed either after a time delay (time delay configurable from 100 ms to 6550 s) or alternatively on a long button press
- Per IR button pair selectable functions
 - 2-button dimming with stop telegram
 - 2-button sun protection control
 - Transmission variable percentage value
 - Transmission variable 8-bit value
 - 1-/8-bit scene control
 - Positively driven operation
- Depending on the selected main function: per IR button selectable additional functions
 - Switching on/off
 - 8-16-bit value
 - Percentage value
 - Temperature value
 - Brightness value
 - Recall/save 1-bit scene 1
 - Recall/save 1-bit scene 2
 - Recall 8-bit scene
 - Positively driven on/off/deactivate
- Blocking can be selected for each IR button and configured individually
- Integrated bus coupling units, Bus connection via bus terminal
- Bus-powered electronics
- Including clamping spring and rosette for installation in ceilings, walls or lights
- For commissioning when mounted, a magnet is required, such as a 5WG1 590-8AH01 programming magnet

**11**

Dimensions (W x H x D) 25 x 26 x 75 mm

The programming magnet must be ordered separately.

	Stock No.	Product No.
	5WG1450-7AB03	S 450/03

Programming magnet for IR receiver decoders**S 590H01**

Programming magnet for S 450 IR receiver decoders

The matching IR remote controls and IR wall-mounted transmitters must be ordered separately. See
Chapter Display and Operation Units - Remote controls.

	Stock No.	Product No.
	5WG1590-8AH01	S 590H01

UP 140H..

Coupler wave / instabus, i-system

- For coupling GAMMA wave with GAMMA instabus
- Coupling of a total of up to 50 GAMMA wave sensor channels with GAMMA instabus actuator channels or GAMMA instabus sensor channels with GAMMA wave actuator channels
- Pushbutton rocker, single with intermediate position
- Vertical operation
- ETS3 and higher supports configuration of the functions: switching, switching and dimming, shutter/blind control and scene control
- Short and long button press for on/off, brighter/darker for dimming or up/down and adjustment of slats for shutter/blind control
- Storage and call up of up to two scenes
- 1 LED for the indication of telegram transmissions
- KNX-RF transmitter/receiver for 868.3 MHz
- 10-pole plug for plugging onto a UP 114 bus coupling unit, version BCU 2.1. or higher

Dimensions (W x H x D) 55 x 55 x 13 mm

Range overview U 140..

Product Title	Stock No.	Product No.
Coupler wave / instabus, titanium white	5WG3140-2HB11	UP 140H11
Coupler wave / instabus, aluminum metallic	5WG3140-2HB31	UP 140H31

The UP 114/02 bus coupling unit must be ordered separately. See chapter System Products and Accessories - Bus coupling units and accessories. The matching design frame must be ordered separately. See chapter Display and Operation Units.

Radio frequency receiver with Gateway EnOcean/KNX

RXZ97.1/KNX

- Evaluation of up to 32 EnOcean channels
- With RXB, other EnOcean functions may also be integrated: switches, window contacts, motion detectors
- Other EnOcean functions (dimming, blinds, light sensors) can be realized in KNX systems
- Powered via KNX bus
- With internal antenna

Operating voltage	DC 24 V
Power consumption	0.6 VA
Ambient temperature, operation	-5...45 °C
Ambient humidity, operation	5...93 % r.H.
Degree of protection	IP20
Dimensions (W x H x D)	71 x 71 x 27 mm
Weight	0.07 kg

For more products, see Chapter Radio system – EnOcean.

	Stock No.	Product No.

CM KNX

LOGO! communication module KNX/LOGO!

- For connection of LOGO! to KNX, as communication module for the LOGO! logic module (12/24 V or 115/240 V) and as bus device on KNX
- For linking transmitted KNX data points and LOGO! inputs and outputs via logic and control functions through LOGO!
- For the linking and transmitting via KNX of up to
 - 8 LOGO! binary inputs and 4 LOGO! binary outputs
 - 16 virtual KNX binary inputs
 - 12 virtual KNX binary outputs
 - 8 virtual KNX analog inputs
 - 8 virtual KNX analog outputs
- Transmission of date and time of the LOGO! real-time clock via KNX
- Two LEDs for the display of the communication status of LOGO! and KNX
- Electronics powered via an external 24 V AC/DC power supply unit, 25 mA
- Integrated bus coupling units, bus connection via screw terminals
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 2 MW

For more LOGO! Products, see Chapter Control and Automation Devices.
The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

⁴⁾ Can be connected to the Universal N 670/03 I/O module (5WG1670-1AB03), see Input devices - Analog input devices.

Motion detector, i-system

UP 258H

- For detecting movement and measuring indoor brightness
- Horizontal sensing angle 180°
- Adjustable range: range to the front 10 m, range on each side, up to 6 m
- Measuring range 1...1000 Lux
- Transmission of sensor values via bus
- Flush mounting, Degree of protection IP20
- Plug onto UP 110 or UP 114 bus coupling unit
- Bus-powered electronics

Dimensions (W x H x D) 55 x 55 x 23 mm

Range overview UP 258H

Product Title	Stock No.	Product No.

The bus transceiver module BCU1/2 must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories
The matching design frame must be ordered separately. See Chapter Display and Operation Units - Pushbutton accessories.

12

Physical Sensors With KNX connection Motion/presence

UP 258.B..1

Presence detectors

- Used as passive infrared detector for indoor ceiling installation
- Sensing range, horizontal 360°, vertical approx. 100°, rotating/swiveling sensor head, optionally for shading off parts of the sensing range
- For monitoring an area for presence up to approx. 6 x 3.5 m, for a mounting height of 2.8 m (presence detection), motion detection up to 5 x 3.5 m
- Mixed light measurement, measuring range 20...1000 lux
- Presence detection for three function blocks (presence detector, motion detector and HVAC detector)
- Functions: Switching on/off, 8-bit value, 16-bit value, temperature value, brightness value, 8-bit scene control
- Blocking object per function module
- Adjustable delay time per function module, which can be optionally set to a fixed time, or two times that can be switched between via bus, or set to one value via bus
- Parallel operation of several presence detectors (master-slave, master-master) without logic modules
- Integrated IR receiver for S 255/11 IR remote control with six pushbutton pairs (see accessories)
- In the case of individual pushbuttons, selectable function per pushbutton: Switching Over, Switching On, Switching Off, call up 8-bit scene, 8-bit value, 16-bit value, temperature value, brightness value
- In the case of pushbutton pairs, selectable function Switching on/off, switching over/over, 2-pushbutton dimming with stop telegram, 2-pushbutton sun protection control, transmit variable 8-bit value, 8-bit scene control
- Blocking object for IR receiver decoder
- LED for display of detected motions in test mode
- Mounting on the ceiling in a flush-mounting device box with 60 mm diameter and at least 40 mm mounting depth, or in an AP 258E surface-mounting enclosure, which must be ordered separately (see accessories)

Motion/presence

AP 251

Motion detector

- To detect and report motion, optionally with or without a brightness threshold taken into consideration
- Sensing angle 290°, including masking to limit the capture zone, range at least 16 m (radius) with mounting height 2...4 m and at 22 °C
- Integrated infrared receiver to set brightness threshold and delay time, as well as operating mode (test mode, standard mode, pulse mode) via an infrared remote control
- Blocking and release of reporting mode through a communication object
- Bus-powered electronics
- Integrated bus coupling units, Bus connection via bus terminal
- Device for wall or ceiling mounting
- Degree of protection IP 55 zur Montage auch im Außenbereich

Physical Sensors With KNX connection Brightness

UP 255/11, AP 255/12, GE 255/13

Brightness controller

- For measuring the brightness on an illuminated work area through measurement of the reflected light
- Measuring range 0...2000 lux (with a reflectance of the illuminated area of approx. 30%)
- Including two rigid optical fiber rods:
 - Parallel light-sensitive surface for mounting surface
 - Inclined (30°) light-sensitive surface for mounting surface
- Integrated infrared receiver for calibration of the brightness measurement via the S 255 infrared remote calibration tool
- Transmission of the brightness measured value, either in the event of change and/or cyclically
- Discretionary set-point as a parameter or a communication object
- Optional two-step dimmer control for lights that can only be switched or constant light level control for lights that can be switched and dimmed
- Selectable starting value of the lighting at the start of constant light level control
- Optionally with dimming of up to 4 further lighting groups to the dimming value of the constant light level control or a dimming value that differs from the dimming value of the constant light level controller by an offset value, which can be set per group
- The constant light level control is automatically deactivated by manually dimming, or by dimming to a preset value
- Configurable behavior in the event of a bus voltage recovery

Dual sensor for brightness measurement, temperature measurement, sun protection control, lighting control

AP 254/02

- Brightness measurement, temperature measurement, sun protection control, lighting control
- For the detection and transmission of brightness and temperature
 - Temperature measuring range -25 °C...+55 °C
 - Brightness measuring range 1 Lux...100 kLux
 - Horizontal sensing angle -60°...+60°, vertical -35°...+66.5°
- For the control of switch, dimming and shutter/blind actuators, depending on the ambient luminosity and/or ambient temperature
- One sun protection channel for the automatic control of sun protection equipment, with
 - Starting and stopping of automation by means of an object or a dusk threshold
 - Up to three brightness thresholds for determining the height and position of the shutters/blinds or roller shutters
 - Optional teach-in of dusk thresholds and brightness thresholds by means of a teach-in facility
 - Blocking object for the temporary deactivation of the sun protection channel function
- Up to four universal channels for the control of switch, dimming and shutter/blind actuators, depending on ambient luminosity and/or temperature. Optionally available with:
 - Threshold switches for brightness
 - Threshold switches for temperature
 - Threshold switches with logical combination of brightness and temperature
 - Optional teach-in of brightness threshold for each universal channel by means of an associated teach-in facility
 - Deactivation option for each universal channel by means of an associated blocking object (1 bit)
 - Optional second object for transmission of a second telegram on fulfillment of threshold conditions
- Bus-powered electronics
- Integrated bus coupling units
- Bus connection via bus terminal
- Surface mounting
- Degree of protection: IP54

Dimensions (W x H x D)

72 x 110 x 54 mm

Wind

AP 257/42

Wind sensor

- Windspeed Measuring range 0...35 m/s
- Recording, querying and resetting the maximum wind speed
- Automatic indication in the event of a defective sensor
- Mast mountings
- Limit value monitoring (3 limit values)
- Transmission of sensor values via bus
- Logic operations (8 AND, 8 OR)
- Electronics powered via an external power supply unit
- Integrated bus coupling units, bus connection via bus terminal
- Surface mounting, degree of protection IP44

Dimensions (W x H x D) 96 x 77 x 118 mm

The 4AC2402 electronic power supply unit is recommended.

Water sensor, DELTA profil, titanium white

UP 272/11

- For detecting water in rooms with risk of leakages
- With water sensor for mounting near the ground with a 2 m long connecting lead (extendable to max. 20 m) with jack plug and a flush-mounting device
- For plugging onto a UP 110 or UP 114 bus coupling unit
- Indication of water/no water
- Alarm indication with adjustable cyclic transmission time
- Indication of defective device / cable
- Alarm indication for resetting the alarm
- Bus-powered electronics

Dimensions (W x H x D) 65 x 65 x 42 mm

Physical Sensors With KNX connection Temperature

N 258/02

Temperature sensor 4 x Pt1000

- For four Pt1000 sensors
- For the measurement and transmission of 4 temperatures in the range -40...+150 °C
- For connection of four Pt1000 temperature sensors2), each via a 2-wire cable up to 50 m in length
- Configurable smoothing of a measured value through mean value generation
- Monitoring of a lower and upper limit value for each measured value, with configurable hysteresis for limit value signals
- Electronics powered via an integrated power supply unit for 230 V AC
- Green LED for displaying ready-to-run status
- Integrated bus coupling units
- Bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The accompanying physical sensors must be ordered separately. See chapter Physical sensors - sensors without KNX connection.

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

Dual sensor for brightness measurement, temperature measurement, sun protection control, lighting control

- Brightness measurement, temperature measurement, sun protection control, lighting control
- For the detection and transmission of brightness and temperature
 - Temperature measuring range -25 °C...+55 °C
 - Brightness measuring range 1 Lux...100 kLux
 - Horizontal sensing angle -60°...+60°, vertical -35°...+66.5°
- For the control of switch, dimming and shutter/blind actuators, depending on the ambient luminosity and/or ambient temperature
- One sun protection channel for the automatic control of sun protection equipment, with
 - Starting and stopping of automation by means of an object or a dusk threshold
 - Up to three brightness thresholds for determining the height and position of the shutters/blinds or roller shutters
 - Optional teach-in of dusk thresholds and brightness thresholds by means of a teach-in facility
 - Blocking object for the temporary deactivation of the sun protection channel function
- Up to four universal channels for the control of switch, dimming and shutter/blind actuators, depending on ambient luminosity and/or temperature. Optionally available with:
 - Threshold switches for brightness
 - Threshold switches for temperature
 - Threshold switches with logical combination of brightness and temperature
 - Optional teach-in of brightness threshold for each universal channel by means of an associated teach-in facility
 - Deactivation option for each universal channel by means of an associated blocking object (1 bit)
 - Optional second object for transmission of a second telegram on fulfillment of threshold conditions
- Bus-powered electronics
- Integrated bus coupling units
- Bus connection via bus terminal
- Surface mounting
- Degree of protection: IP54

Dimensions (W x H x D) 72 x 110 x 54 mm

Base module with KNX for temperature and humidity measurement

AQR2570..

- The room sensor for flush mounting consists of a base - and front module
- Temperature control as continuous control (PID algorithm) for pure heating operation, heating and cooling operation, and adjustable control value as continuous control value 0...100%, or as pulse-width modulated (PWM) switching signal On/Off
- Ventilation control across 3 settable switching points for relative humidity, and 3 switching signal objects On/Off, or one control value object 0...100% to control a ventilation actuator
- Setpoints for room temperature and relative humidity adjustable via KNX bus
- 1 analog input to connect temperature sensors with NTC 10k sensing element to measure room, floor, or ceiling temperature
- 2 multi-functional binary inputs to control window contacts or switches for blinds and/or lighting control
- Settable commissioning and control parameters
- Power supply via KNX-bus, bus load < 5 mA
- Integrated bus coupler with programming button and LED

Voltage supply	KNX bus
Analog inputs	Passive temperature sensor NTC 10k
Analog inputs, number	1
Digital inputs	Potential-free contacts
Digital inputs, number	2
Connection, electrical	Bus connection: spring terminal sensor inputs: 4 screw terminals

QMX3..

Wall-mounted room sensors and operator units for KNX

The wall-mounted room unit QMX3.. consists of:

- Base plate
- Sensor or room operator unit

The following functions are (depending on type):

- Temperature sensor or multisensor (T, r.h., CO2)
- Backlit display or LED display
- Touchkeys
- Switching and control of lighting, blinds, scenes

Measuring range, temperature	0...50 °C
Sensing element, temperature	NTC
Degree of protection	IP30
Mounting	Wall-mounting
Dimensions (W x H x D)	88.4 x 133.4 x 18 mm

QMX3.P30

Room sensor KNX for temperature

Functions:

- Temperature sensor
- Temperature control, adjustable as PWM control and/or modulating control (PID algorithm), for pure heating mode, pure cooling mode, heating and cooling mode
- Operating modes switchable via KNX or display: Comfort mode, Pre-Comfort, energy savings and protection mode
- Adjustable commissioning and control parameters for radiated heating, slow and fast, floor heating slow and fast
- Integrated bus coupling unit
- 3 independently adjustable switching values for CO2 concentration and relative air humidity for air quality control
- Output for 1, 2, or 3-stage fans (humidity and CO2)
- Output for 1, 2, or 3-point positioning signal (humidity and CO2)
- Setpoint for room temperature and relative humidity and CO2 concentration adjustable via KNX

Can be connected to the Universal I/O-Modul N 670 (5WG1670-1AB03) - see chapter Sensors for HCVA.

Solar sensor

QLS60

For measuring the solar radiation intensity.

Operating voltage	AC 24 V DC 18...30 V
Power consumption	2.5 VA
Analog output, signal	DC 0...10 V DC 4...20 mA
Measuring range	0...1000 W/m ²
Time constant	≤2 s
Connection, electrical	Screw terminals
Degree of protection	IP65
Dimensions (W x H x D)	51 x 92 x 46 mm

Connectable with Universal I/O-Module N 670 (5WG1670-1AB03) - see chapter sensors for HCVA

Scene- / Event Controller

N 305/01

- 80 Event entries, 8 Event trigger, Sequence control
- 1-bit-/8-bit integrated scene control, 8 scenes to be integrated
- Bus-powered electronics
- Integrated bus coupling units, bus connection via bus terminal or contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 1 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

	Stock No.	Product No.
	5WG1305-1AB01	N 305/01

Logic operation module

N 347/02

- 255 configurable inverting of inputs (virtual)/ configurable inverting of outputs
- 127 free definable logic gate
- Configurable transmission conditions
- Time functions: 100 Scheduled entries, Weekly program
- Internal clock, can be synchronized via master clock
- 100 Event entries, 10 Event trigger, Sequence control
- Bus-powered electronics
- Integrated bus coupling units, Bus connection via contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 1 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

	Stock No.	Product No.
	5WG1347-1AB02	N 347/02

Event program, weekly time switching program, logic module

N 350/01

- Inputs for logic functions 60 (virtual)
- Configurable inverting of outputs 10
- User-definable logic gate 10
- Configurable transmission conditions
- Time functions: 100 Scheduled entries, Weekly program
- Internal clock, can be synchronized via master clock
- 100 Event entries, 10 Event trigger, Sequence control
- Bus-powered electronics
- Integrated bus coupling units, Bus connection via contact system to data rail
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 1 MW

The data rail must be ordered separately. See chapter System Products and Accessories - data rails.

N 350E01

IP controller

- LEDs for indicating that the device is ready-to-run, KNX communication, IP communication
- LC-Display
- Electronics powered via an external nominal 24 V AC/DC power supply unit
- Integrated bus coupling units
- Bus connection via bus terminal
- Ethernet connection via RJ45 socket
- Plug-in terminal block for the connection of an external power supply unit
- Supports KNXnet/IP
- 1 Interface functions (Tunneling)
- 1 Interface functions (object server)
- Integrated real-time clock weekly scheduling program for 100 scheduled entries/Astro function
- Yearly time switching functions
- 200 Event entries
- 30 Logic gates
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

13

6EP13211SH03

LOGO! Power 12 V/1.9 A

- Controlled power supply 12 V/1.9 A DC
- For connection to a 1-phase AC system
- Rated input voltage 100...240 V AC wide-range input
- Range input voltage 85...264 V AC
- Nominal output voltage 12 V DC, setting range 10.5...16.1 V
- Nominal output current 1.9 A
- Efficiency during operation at rated value typ. 80 %
- Ambient temperature -20...70 °C
- Protection class II, Degree of protection: IP20
- Potential separation SELV acc. to EN 60950 and EN 50178
- Emitted interference class B acc. to EN 55022
- Approval acc. to CE, UL/cUL, FM
- Marine approval GL, ABS

Dimension width (1 MW = 18 mm)

CM KNX

LOGO! communication module KNX/LOGO!

- For connection of LOGO! to KNX, as communication module for the LOGO! logic module (12/24 V or 115/240 V) and as bus device on KNX
- For linking transmitted KNX data points and LOGO! inputs and outputs via logic and control functions through LOGO!
- For the linking and transmitting via KNX of up to
 - 8 LOGO! binary inputs and 4 LOGO! binary outputs
 - 16 virtual KNX binary inputs
 - 12 virtual KNX binary outputs
 - 8 virtual KNX analog inputs
 - 8 virtual KNX analog outputs
- Transmission of date and time of the LOGO! real-time clock via KNX
- Two LEDs for the display of the communication status of LOGO! and KNX
- Electronics powered via an external 24 V AC/DC power supply unit, 25 mA
- Integrated bus coupling units, bus connection via screw terminals
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Bus coupling units and accessories

Modular bus coupling unit and flush-mounting actuator

A key feature of the GAMMA *instabus* is its uniform bus coupling unit. The bus transceiver module (BTM) can be used as a stand-alone unit, as well as a combined version in various devices of the flush-mounting actuator range.

Implementation of the BTI interface (Bus Transceiver Interface) with the bus transceiver module (BTM) ensures maximum flexibility and an impressive range of functions. Bus coupling units (BTM) and flush-mounting actuators with integrated bus transceiver modules (BTM) enable the use of GAMMA display/operator interfaces, such as pushbuttons, text displays, room temperature controllers and operation units in a wide range of designs. Thus, all GAMMA instabus operator interfaces with BTI interface in the design lines i-system and DELTA style/profil can be combined with either a bus transceiver module (BTM) or a flush-mounting actuator with bus transceiver module (BTM).

This reduces planning work and facilitates installation and commissioning. The application programs of the flush-mounting actuators are identical to those of the functionally equivalent devices from the modular room control range. This means that all devices have the same standard application program – regardless of mounting type – whether flush-mounting, with or without mounting frame – or whether designed for installation in the room control box and automation module box.

Operator interfaces with DELTA bus coupling unit

Overview and selection guides

Power supply units

Application Example

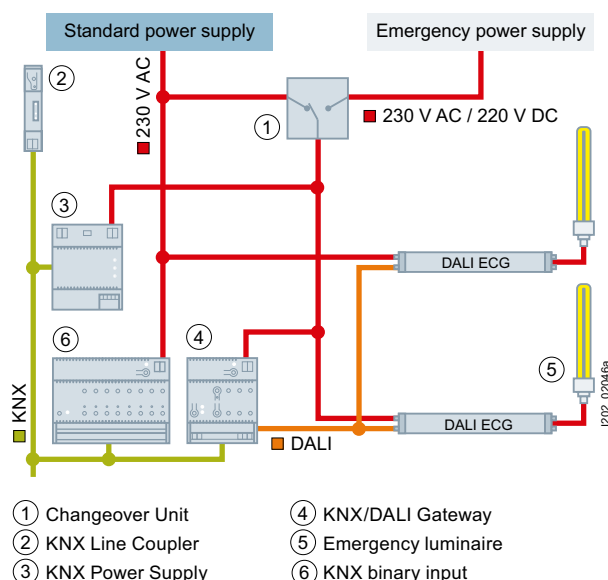

Intelligent solution via safety supply and KNX/DALI gateway with status indication in emergency mode

In emergency mode, communication is maintained via the safety supply from KNX and DALI.

The failure detection of the general supply is executed via a KNX binary input, which the KNX/DALI gateway switches to emergency mode. It is not possible to manually operate the emergency lights in emergency mode.

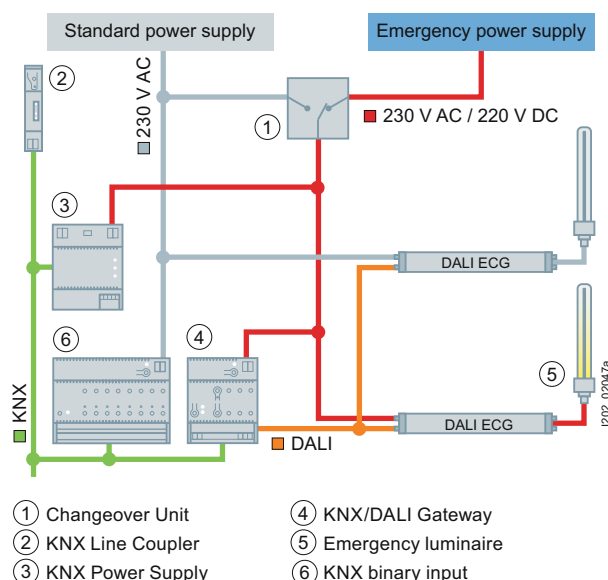

Normal mode

- Lighting control with DALI
- Feedback of fault indications and failure of lighting and ECGs to building control
- Monitoring of operating hours for lamp replacement

Emergency operation

- Parameterization of dimming value of DALI-ECG in emergency operation via KNX/DALI gateway
- The integrated buffer of the KNX power supply ensures an interruption-free switchover to emergency operation
- The continued transmission of status indications in emergency operation is possible because there is no interruption of supply to KNX and DALI.

14 Emergency lighting with single battery KNX/DALI gateway

Normal mode

- Lighting control with DALI
- Initiate/record tests

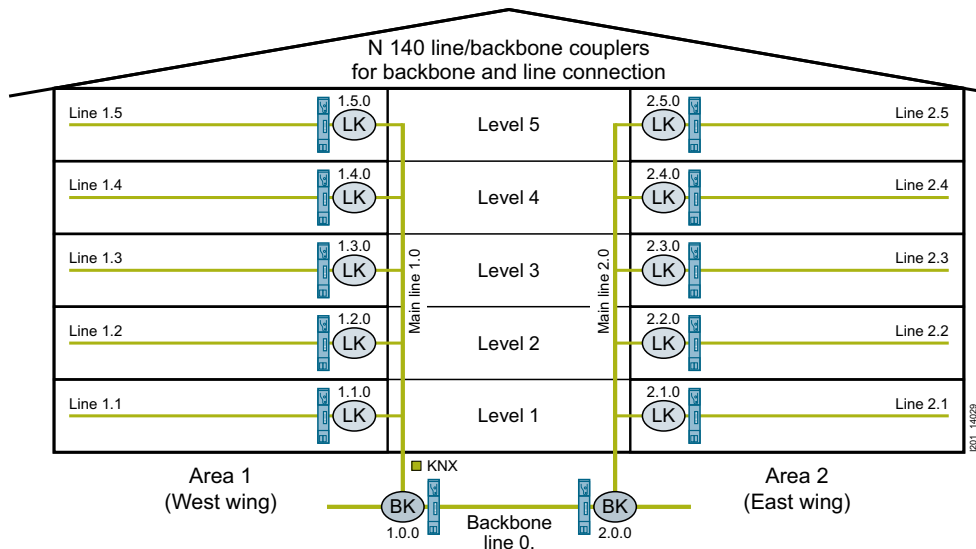

Emergency operation

- Automatic emergency lighting acc. to parameterization via KNX/DALI gateway

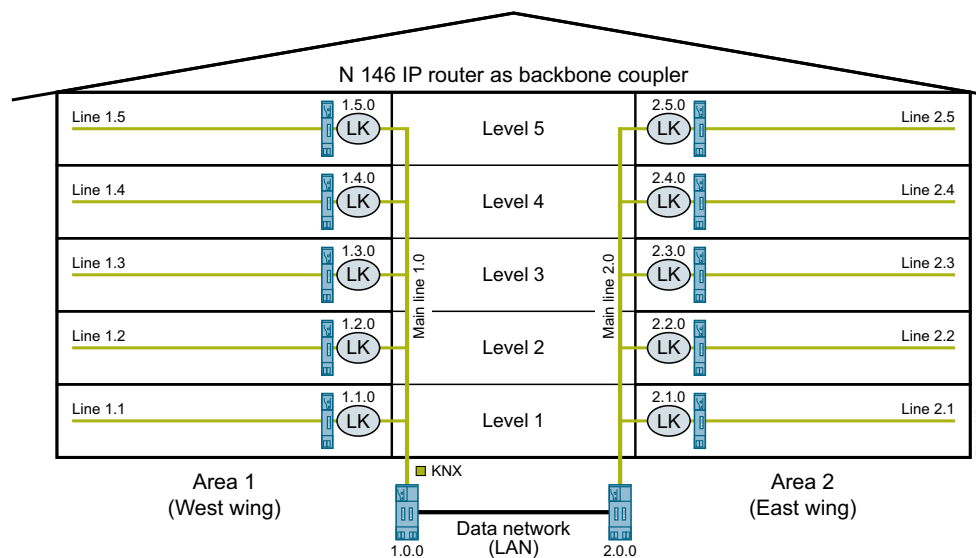

For example
Classic topology

In the classic topology, all the line and backbone couplers are traditionally KNX couplers.

Tried and tested, this topology is widely deployed. The bus cable lengths are generally limited to a single building.

Modern topology

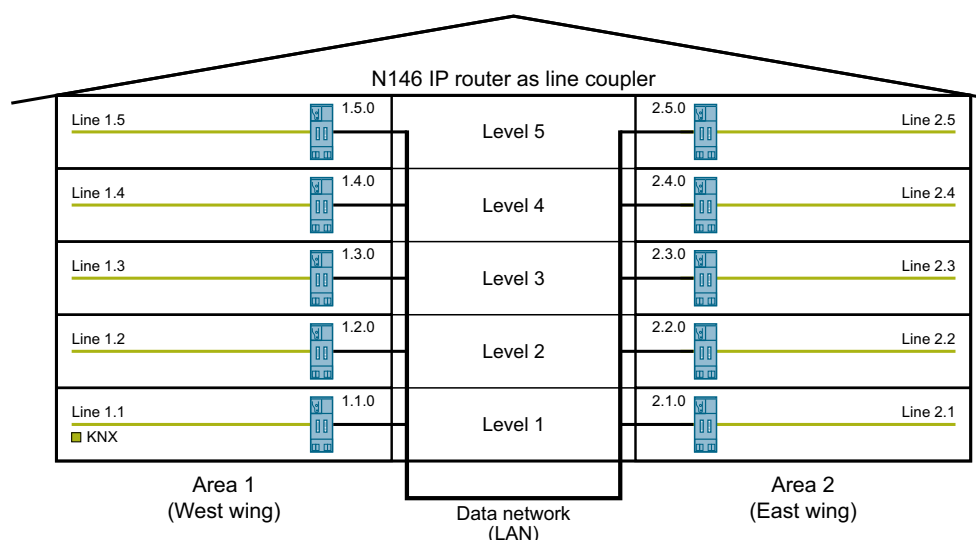

In this modern topology, the backbone couplers are replaced by N146/02 IP routers.

Due to the use of standard network components, the linking of 2 building sections is no longer restricted by the lengths of the bus cable.

Other media, such as optical fiber cables or W-LAN, can also be used to couple separate buildings and for the exchange of group address telegrams.

Innovative topology

In this innovative topology all line couplers are replaced by N 146/02 IP routers.

Backbone couplers are no longer required. This configuration enables the linking of each individual building level via Ethernet (LAN) and by using existing LAN networks.

Furthermore, the correct configuration of the N 146/02 IP router makes the commissioning of both large projects and smaller individual projects quicker and easier to manage.

An exchange of group address telegrams is still possible even if projects are broken down into individual projects.

DELTA Bus coupling unit

- For installation in flush-mounting switch and socket boxes with diameter = 60 mm, for Screw fixing and prepared for Claw fixing
- LED per pushbutton pair for status indication or configurable as orientation light
- Mounting of rockers from the DELTA product ranges
- Integrated bus coupling units, bus connection via bus terminal

Dimensions (W x H x D)

71 x 71 x 32 mm

UP 116/01

DELTA bus coupling unit, single, intermediate position, with 2 LEDs

- One Rocker button, intermediate position (pushbutton with 2 operating points)
- The following functions can be assigned per operating point as required:
 - Switching on/off/over
 - Dimming with stop telegram (4-bit) Short button press, on/off Long button press, brighter/darker
 - Dimming with cyclic transmission (4-bit) Short button press, on/off Long button press, brighter/darker
 - Shutter/blind control Short button press, slat open/closed or stop Long button press, up/down
 - Store and call up scene, 1-bit in conjunction with scene module
 - Short or long button press (store/call up scene), configurable
 - Display of any status objects (1-bit)
 - Display of pushbutton objects

The required single or multiple rocker (with or without window) must be ordered separately.

Line/backbone coupler**N 140/..3**

- For data exchange between two KNX bus lines with telegrams of up to 64 byte
- For use as line coupler for connecting a line to the main line or as backbone coupler for connecting a main line to the backbone line or as repeater for connecting two segments of the same line, with electrical isolation of the two bus lines
- Loadable filter table for control of the data exchange between the two bus lines
- Additional loadable filter table for telegrams with LTE addressing
- Detection of a communication fault on the lower-level line and signaling to the higher-level line
- 3 LEDs for display of availability and receipt of a telegram per line
- Power supply from the main line
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Line/backbone coupler for data rail**N 140/03**

Bus connection to the line and to the main line via bus terminal

- Electronics powered via an external nominal 24 V AC/DC power supply unit
- Integrated bus coupling units
- Bus connection via bus terminal
- Ethernet connection via RJ45 socket
- Plug-in terminal block for the connection of an external power supply unit
- Supports KNXnet/IP
- 1 Interface functions (Tunneling)
- 1 Interface functions (object server)
- Integrated real-time clock weekly scheduling program for 100 scheduled entries/Astro function
- Yearly time switching functions
- 200 Event entries
- 30 Logic gates
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

Stock No.	Product No.
5WG1350-1EB01	N 350E01

IP viewer**N 151/01**

Interface converter between a KNX and an IP network, with the following simultaneously executable functions:

- As a WebServer for monitoring and control of up to 40 states and values transmitted via the KNX network, which can be displayed on up to 5 image pages of a PC connected to the IP network using Internet Explorer 6.0, 7.0, 8.0 or Firefox 3.0 (for other browsers, see documentation at www.siemens.com/gamma-td)
- For the parameterization of a KNX system using ETS3.0f/ETS4
- For communication between the KNX network and a ComBridge Studio visualization software
- Special WEB page for the multilanguage adaptation of the presentation of an image page and a special WEB page for firmware upgrades
- Ethernet interface for connection to the IP network using the Internet Protocol
- RJ45 socket for connection to Ethernet 10 Mbits/s
- 2 LED displays for indication of ready-to-run state and for IP communication
- Integrated bus coupling units
- KNX bus connection via bus terminal
- Electronics powered via an external 24 V AC/DC power supply unit
- Connection of external power supply unit via an extra-lowvoltage terminal
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 4 MW

The external 24 V AC/DC power supply unit must be ordered separately (e. g. 4AC2402).

Counters

7KT PAC KNX expansion modules for connecting PAC1500 counters to KNX

7KT1900

The 7KT1 900 KNX communication module can be parameterized upwards of ETS 3.0 and provides the following values via communication objects:

- Active power (phase 1, 2, 3 and sum)
- Reactive power (phase 1, 2, 3 and sum)
- Can be retrofitted to already installed E-counters
- Data transmission between the counters and the expansion modules is implemented via the IrDA infrared interface
- Status indication by LED on the module
- Bus-powered electronics
- Integrated bus coupling units
- Bus connection via bus terminal

Dimension width (1 MW = 18 mm) 1 WM

Stock No.	Product No.
7KT1900	7KT1900

7KT PAC1500 single-phase counters

7KT153..

- Compliant with the new counter standard EN 50470 (Part 1 and 3)
- Easy-to-read LCD display
- Versions calibrated in accordance with the new Measuring Instruments Directive 2004/22/EC (MID) can be used for invoicing purposes
- Exact recording thanks to accuracy class 1 (for active energy).
- Rated control supply voltage $U_n = 230\text{ V AC}$
- Voltage range 184 ... 276 V
- Rated frequency $f_n 50\text{ Hz}$
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 2 MW

Radio system KNX RF - GAAMA wave / Synco living

Overview and selection guides

GAMMA wave und Synco living in combination

1 Central apartment unit

The heart and brain of the system. From here you can control all different functions for up to 12 rooms quickly and easily and monitor them via the display.

2 Room unit / room temperature sensor

The room unit measures the room temperature and allows the settings entered into the central apartment unit, such as temperature and operating parameters, to be adjusted for individual rooms. The comfort settings can be extended at the push of a button.

The room temperature sensor measures the room temperature and communicates this by radio to the central apartment unit.

3 Radiator control actuator

Receives the pre-set desired temperature for this room by radio signal from the central apartment unit and regulates room temperature by adjusting the radiator valve. It can also regulate up to 5 additional radiators per room, thereby ensuring an even temperature between radiators.

4 Heating circuit controller / multi-controller / consumption data interface

Compares the actual values and setpoints for each room communicated to the central apartment unit via RF and regulates the temperature by adjusting the valve settings of the heat distributor.

For precontrol of up to 2 independent hydraulic room groups (e.g. radiators, floor heating) or control of ventilation plant with up to 3 stages.

The consumption data interface collects consumption meter data of heat/cool, electricity, water and gas

5 Web server

Connects the home automation system to the internet, allowing you to access and operate the system from a remote location and remotely read the consumption data and smart phone App.

6 Socket outlet switches

For remote control of electrical appliances. Operated via central apartment unit, a handheld remote control unit or external button, all via KNX RF.

7 Weather sensor

Acquires the outside temperature and atmospheric pressure and communicates this via RF to the central apartment unit.

8 Lighting and blind control

Wireless and therefore convenient control of lighting and blinds – centrally, locally in the room, or as a scene.

Naturally, the components can also be operated automatically, e.g. via time programs or simulation of presence.

9 Door/window contact

Monitors the status of windows, doors and gates and transmits the relevant data to the central apartment unit.

In the case of deviations from the norm, the system can alert you in a variety of ways, increases comfort.

More information about Synco living see www.siemens.com/syncoliving

Radio system KNX RF GAMMA wave / Synco living

Overview and selection guides

GAMMA wave and Synco living in combination

Enjoy all the advantages of a modern building management system without the need for additional cable installation the GAMMA wave radio system makes it possible. Sensors, actuators, etc. do not require any additional cable installation. This means that this type of radio transmission is particularly suitable for renovation work, the expansion of existing systems and all types of new installations. And all complete with absolutely failsafe and problem-free transmission.

Furthermore:

GAMMA wave is a unique bi-directional radio system – this means that the products and components can be both transmitter and receiver.

And:

GAMMA wave is based on the uniform standard for building management systems KNX in the 868.3 MHz range.

Synco living – Saving energy with attractive home automation

The home automation system Synco™ living enables ultra-convenient and demand-oriented adjustment and control of heating, ventilation and air-conditioning systems, as well as lighting, shutter/blinds and much, much more. This can save up to 30 % in heating energy, as well as reduce the CO₂ emissions of your home. With Synco living, you can achieve energy efficiency class A acc. to EN 15232.

The equipment range's pioneering technology makes it ideal for the renovation or conversion of room control functions in existing buildings.

These products offer simple installation and commissioning, thus enabling the wireless remote control of switching, dimming and shutter/blind/scene functions.

The system operates in the 868.3 MHz fail-safe frequency band that is reserved for safety and system applications. A sensor can control an unlimited number of actuators within its range (e. g. closed residential unit).

As well as wave pushbuttons for lighting control and wave shutter/blind pushbuttons for shutter/blind control, the range includes numerous wall-mounted transmitters, hand-held transmitters, door/window contacts and smoke detectors.

The wave pushbuttons and wave shutter/blind pushbuttons must be used in combination with universal dimmer sys inserts, switch sys inserts or shutter/blind control sys inserts. This enables the local operation and remote control of the inserts contained in these product lines, as well as the remote control of additional KNX RF universal dimmers or switching or sys shutter/blind control inserts.

The *instabus* pushbuttons (single or double) must be plugged into the wave wall-mounted transmitters as an operator interface. In accordance with their intended purpose, pushbutton rockers enable the remote control of universal dimmer sys inserts, switch sys inserts or shutter/blind control sys inserts, which are equipped with wave pushbuttons or wave shutter/blind pushbuttons.

The device contact units are fitted with fixing claws and have a maximum mounting depth of 32 mm. This greatly facilitates mounting standard flush-mounting switch boxes.

Radio system KNX RF - GAMMA wave / Synco living

Overview and selection guides

Installation with GAMMA wave

¹⁾ See Chapter DELTA Control and Regulation Devices Switching/Pushbutton control/ Dimming / Shutter/blind controls.

Previously

Lighting and shutter/blind control of a conventional installation

Example of a conventional installation with lighting and electrically operated shutters/blinds.

- Light (C) can only be switched with switch (A)
- Light (D) can only be switched with switch (B)
- Shutter/blind (E) can only be moved with switch (G)
- Shutter/blind (F) can only be moved with switch (H)

Disadvantages

- Inflexible
- No convenience (each light must be switched individually)

Now

Lighting and shutter/blind control with GAMMA wave ("bi-directional" radio system)

Modification of the installation for shared operation of lighting and shutters/blinds from various operating points.

Replacement of conventional switch inserts (A, B) with

- Universal dimmer sys inserts
- DELTA UP 210 wave pushbuttons

Replacement of conventional shutter/blind switches (G, H) with

- Shutter/blind control sys inserts
- DELTA UP 211 wave shutter/blind pushbuttons

With this switch you can:

- Dim lights C and D from A and/or B
- Operate shutters/blinds E and F from G and/or H

For additional operation of the lights and shutters/blinds

- A UP 110 wall-mounted transmitter "Batterie" wave (I) with mounted double *instabus* pushbutton must be installed

Advantages

- Flexible
- Greater operational ease
- Supports group formation
- Few devices required/lower costs
- Simple and clean retrofitting – no structural alterations required

HVAC products - low energy consumption thanks to efficient products

A wide range of HVAC products - optimally coordinated

The Siemens HVAC product range offers a comprehensive assortment of products for every kind of application. The components are optimally coordinated with each other. You benefit not only from minimal installation and running costs, but also from the fact that all our products are extremely failsafe.

Intelligent convenience - for both indoor environment and operation

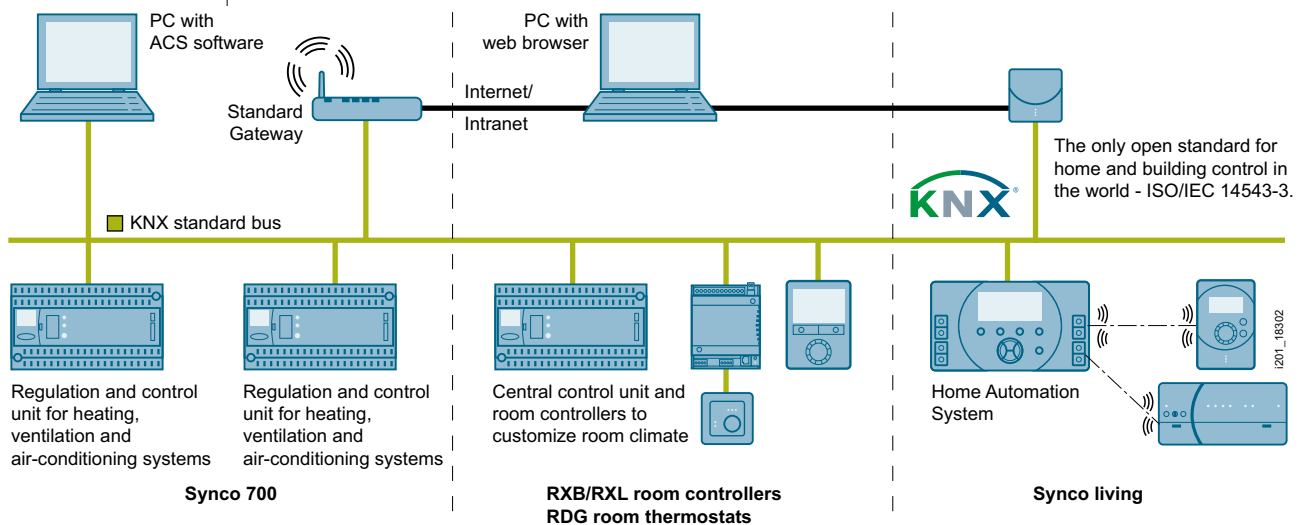

Easy-to-use components that offer maximum convenience. Adjust your living environment intuitively, quickly and accurately to your needs - no tedious learning curve.

Synco tool

Tool for commissioning and diagnostics

Synco operating

Efficient system operation with alerting and controls

Commissioning software tools

Synco products are commissioned using the software tool ACS. Synco devices use LTE, a protocol specifically for Synco devices. Communication is also implemented via the KNX bus cable. Synco devices can be operated together with GAMMA *instabus* devices using the same KNX bus cable. If you also want to send data between the GAMMA *instabus* (KNX S-mode) and the Synco devices, the data exchange for both product groups is configured using ETS.

A wealth of experience, high quality standards and simple handling

Siemens has now been promoting HVAC control technology for more than 60 years. In this time, it has acquired broad application expertise and skills in this specialist field. As a result, and thanks to a rigorous quality management system, Siemens HVAC products offer the highest quality, efficiency and reliability. They also reflect an in-depth knowledge of the HVAC market, building automation and their processes: furthermore, the components are particularly simple to install, commission and maintain.

UP 560/01

Transmitter actuator 230 V wave

- For the wireless operation of up to 2 different room functions and for the control of actuators via KNX-RF
- 10-pole plug-in connector for plugging in an instabus pushbutton, single or double, as operator interface
- Adjustable function; switching, switching and dimming, shutter/blind control and scene control
- Short and long button press for on/off, brighter/darker for dimming or up/down and adjustment of slats for shutter/blind control
- Storage and call up of up to four scenes
- With integrated switch actuator with relay contact, rated for 230 V AC, 6 A (resistive load), with option for setting whether load should be permanently switched on or off (normal mode) or whether actuator should operate in timer mode with an adjustable on period of 1, 5 or 15 minutes
- KNX-RF transmitter/receiver for 868.3 MHz
- Electronics powered via 230 V AC
- Commissioning using six DIL switches located on the front panel – no additional aids required
- For mounting in an installation box (Ø 60 mm, depth: 40 mm) with screw or claw fixing

Dimensions (W x H x D)

71 x 71 x 32 mm

Outlet switch wave**S 564/11**

- For plugging into a grounding contact socket outlet
- Switchable SCHUKO socket outlet integrated in the intermediate connector
- Integrated actuator for on/off switching of SCHUKO socket outlet, relay contact rated for 230 V AC, 16 A (resistive load)
- Can also be controlled via up to 10 KNX sensors and be integrated into up to 16 KNX scenes
- Pushbutton for local operation and commissioning – no additional aids required
- LED to indicate the operation/switching state
- KNX-RF transmitter/receiver 868.3 MHz
- Powered over socket outlet
- Titanium white

Binary input wave, with battery, titanium white

- For detecting the state of an external contact connected to the sensor and transmission of the state as on/off information to an actuator with KNX radio communication
- Additional reed contact integrated in the device, activated through the solenoid included in delivery, and electrically connected in series to the external contact
- 4 plug-in terminals for wire cross-sections of 0.14 ... 0.5 mm² (solid or finely stranded) for connection of the external contact and to allow a wire jumper to be used to set, whether monitoring is to cover internal contact only, external contact only, or both contacts
- KNX-RF transmitter for 868.3 MHz
- Electronics powered by a lithium battery (1/2 AA 3.6 V), with a battery service life of approx. 5 years, with signaling of battery status every 24 hours, and with an LED that flashes every 10 seconds to indicate that the battery needs replacing
- Commissioning using a pushbutton located on the front of the sensor – no additional aids required
- Comprising one mounting plate for screw or adhesive fastening, clip-on radio sensor with integrated reed contact and trigger solenoid
- Titanium white

Universal dimmer insert sys, flush mounting

5TC1230

- For switching and dimming different electronic loads
- Operation by UP 210 wave button (radio)
- 2-Leitertechnik
- Automatic load detection
- Lamp friendly soft start
- Storing and switching on at one brightness value
- Memory value retained even after power failure
- Electronic short-circuit protection and overtemperature protection
- On elimination of the short circuit/cooling, automatic return to normal mode
- Extension unit operation by conventional pushbuttons
- Rated voltage: 230 V AC, 50 Hz (2-wire system)
- Only mixed loads between incandescent lamp ratings and electric transformers are permissible
- Connected load
 - Incandescent lamp rating: 50...420 W
 - Magnetic transformers: 50...420 VA
 - Electronic transformers: 70...420 VA
- Installation in switch and socket boxes with (60 mm Ø, 40 mm deep) according to DIN 49073-1, Claw fixing or screw fixing

Dimensions (W x H x D) 71 x 71 x 32 mm

The UP 210 wave pushbutton with KNX-RF communication must be ordered separately. See chapter Display and Operation Units. Battery included in delivery.

Sun protection, anti-glare protection, utilization of daylight

GE 520/01

Venetian blind actuator wave 1x AC 230 V, 6 A

- 1 x 230 V AC, 6 A
- KNX-RF transmitter/receiver for 868.3 MHz
- For control of a sun protection drive with AC motor for 230 V AC and electromechanical limit switches
- Electrically interlocked relays for reversing direction of rotation
- Relay contacts designed for rated voltage 230 V AC, 6 A
- Electronics powered via 230 V AC
- Commissioning using a pushbutton located on the top – no additional aids required

Dimensions (W x H x D)

274.5 x 42 x 32 mm

Shutter control insert sys

- For controlling a blind or shutter motor with mechanical or electronic limit switches
- Operation by sys shutter/blind pushbuttons and UP 211 wave shutter/blind pushbuttons (radio)
- Two electrically interlocked relays, minimum switchover time of 1 s
- Group and central controls through a combination of several sys shutter/blind control inserts
- "Wind alarm" safety function can be implemented through the secondary input "UP"
- Multiphase operation (i.e. different phases at the main and extension unit) is possible
- Bridging of voltage interruptions 0.2 sec
- Relay on period at STEP command: 100 ms
- Max. relay on period: 120 s
- Conventional shutter/blind pushbuttons (5TA2 114) or switches (5TA2 154) can be connected through secondary inputs
- Rated voltage: 230V~, 50 Hz (N conductor required)
- Connected load: max. 1 motor 1000 VA (8 A resistive load)
- For mounting in an installation box (Ø 60 mm, depth: 40 mm) with screw or claw fixing

Dimensions (W x H x D)

71 x 71 x 32 mm

Matching frames must be ordered separately. UP 211 wave shutter/blind pushbuttons must be ordered separately.

AP 260/11

Door/window contact wave with battery, titanium white

- For detecting the state (closed/open) of a door or window via the reed contact integrated in the device, with actuation of the reed contact through the supplied magnet for attachment to the moving part of the door or window
- Connection for an external floating contact
- 4 plug-in terminals for wire cross-sections (solid or finely stranded) of 0.14...0.5 mm² for connection of the external contact and to allow setting via a wire jumper, whether monitoring is to cover internal contact only, external contact only, or both contacts
- KNX-RF transmitter for 868.3 MHz
- Electronics powered by a lithium battery (1/2 AA 3.6 V), with a battery service life of approx. 5 years, with signaling of battery status every 24 hours, and with an LED that flashes every 10 seconds to indicate that the battery needs replacing
- Commissioning using a pushbutton located on the front of the sensor – no additional aids required
- Surface mounting
- Comprising one mounting plate for screw or adhesive fastening, clip-on radio sensor with integrated reed contact and trigger solenoid

Dimensions (W x H x D)

87 x 36 x 27 mm

Battery included in delivery.

Coupler wave / instabus, i-system

UP 140H..

- For coupling GAMMA wave with GAMMA instabus
- Coupling of a total of up to 50 GAMMA wave sensor channels with GAMMA instabus actuator channels or GAMMA instabus sensor channels with GAMMA wave actuator channels
- Pushbutton rocker, single with intermediate position
- Vertical operation
- ETS3 and higher supports configuration of the functions: switching, switching and dimming, shutter/blind control and scene control
- Short and long button press for on/off, brighter/darker for dimming or up/down and adjustment of slats for shutter/blind control
- Storage and call up of up to two scenes
- 1 LED for the indication of telegram transmissions
- KNX-RF transmitter/receiver for 868.3 MHz
- 10-pole plug for plugging onto a UP 114 bus coupling unit, version BCU 2.1. or higher

Dimensions (W x H x D) 55 x 55 x 13 mm

Range overview U 140..

The UP 114/02 bus coupling unit must be ordered separately. See chapter System Products and Accessories - Bus coupling units and accessories.
The matching design frame must be ordered separately. See chapter Display and Operation Units.

Radio System – GAMMA wave / Synco living KNX-RF
Gateways, interface converters
EnOcean/KNX-RF

GE 561/11

Switch actuator wave 2 x AC 230 V, 16 A, with converter EnOcean

- KNX-RF transmitter/receiver for 868.3 MHz
- Converter of EnOcean radio to KNX-RF for the control of KNX radio actuators over EnOcean radio pushbuttons
- Control of internal actuator channels via KNX and/or EnOcean radio pushbuttons
- One relay contact per output
- Contact rated operational voltage, 230 V AC
- Rated current 16 A at p.f. = 1
- With option for setting whether load should be permanently switched on or off (normal mode) or whether actuator should operate in timer mode with an adjustable on period of 1...60 minutes
- Electronics powered via 230 V AC
- Commissioning using a pushbutton located on the top – no additional aids required
- Modular installation device

Dimensions (W x H x D) 274.5 x 42 x 32 mm

For more products, see Chapter Radio system – EnOcean.

Transmitter**UP 110..**

- For the wireless operation of up to 2 different room functions and for the control of actuators via KNX-RF
- 10-pole plug-in connector for plugging in an instabus pushbutton, single or double, as operator interface
- Adjustable function; switching, switching and dimming, shutter/blind control and scene control
- Short and long button press for on/off, brighter/darker for dimming or up/down and adjustment of slats for shutter/blind control
- Storage and call up of up to four scenes
- KNX-RF transmitter/receiver for 868.3 MHz
- Commissioning over four DIL switches located on the front panel – no additional aids required
- For mounting in an installation box (Ø 60 mm, depth: 40 mm) with screw or claw fixing

5WG3141-2AB01	UP 141

Blanking cover plates must be ordered separately. See chapter Display and Operation Units.

Central apartment unit for HVAC and energy consumption data collection

QAX903..

The central apartment unit serves as an operator and display unit for an apartment.

It manages individual room control (heating/cooling) of up to 12 rooms, comfort ventilation, precontrol, control of air conditioning equipment, and acquires the consumption data of heat, water, electricity and gas.

- Management of heating and cooling control for one apartment
- Suited for heating and cooling plants with central distribution (e.g. underfloor heating) and radiators with decentral connections
- Selection of operating mode, timer and holidays / special day function for the apartment
- Independent time switches and operating modes for 12 rooms
- Flow temperature control of 2 independent room groups including limitation (min. / max.) and maintained return temperature (high / low)
- Increase of economy room temperature setpoint and minimum flow temperature setpoint depending on the composite outside temperature
- Collection of heat / cooling requests from the individual rooms and forwarding the requests to the heat/cooling sources via wired bus, heat/cooling demand relay or DC 0...10 V output to the RRV912 or RRV934
- Absence function (heating, cooling, ventilation)
- Management of 3-stage ventilation plant via RRV934 multicontroller, incl. night cooling
- Control of air conditioners (split units) via universal outputs (locally and RRV91x) or via S-Mode (KNX TP1)
- Display of meteorological data
- Presentation of key data on info pages
- Remote access via Siemens web server OZW772.xx
- Intuitive and simple control with Android or IOS App
- Collection of meter data (heat / cool, electricity, water, gas) to support automated meter reading & billing

Operating voltage	AC 230 V
Power consumption	7 VA
Communication	KNX RF-compatible, 868.3 MHz bidirectional (RF) and KNX TP1 (wired bus)
Indoor wireless range	30 m
Display	Full graphic backlit display
Universal input, signal	Digital 0/1 LG-Ni1000
Universal inputs, number	1
Measuring range, temperature	0...120 °C
Relay output, switching voltage	AC 24...230 V NO - contact
Relay output, switching current	AC 0.02...2 (2) A
Relay outputs, number	1
Degree of protection	IP20D
Dimensions (W x H x D)	230 x 130 x 29.7 mm

Range overview QAX903..

Central apartment unit for HVAC and energy consumption data collection in German	S55621-H110	QAX903-DE

QAX913..

Central apartment unit with energy consumption data collection

The central apartment unit serves as an operator and display unit for an apartment. It manages individual room control (heating/cooling) of up to 12 rooms, comfort ventilation, precontrol and DHW control, control of air conditioning equipment, and acquires the consumption data of heat, water, electricity and gas. Additional functions include the control of lights and blinds. Door and window contacts plus smoke detectors and water monitors can be integrated for monitoring purposes.

- Management of heating and cooling control for one apartment
- Suited for heating and cooling plants with central distribution (e.g. underfloor heating) and radiators with decentral connections
- Selection of operating mode, timer and holidays / special day function for the apartment
- Independent time switches and operating modes for 12 rooms
- Flow temperature control of 2 independent room groups including limitation (min. / max.) and maintained return temperature (high / low)
- Increase of economy room temperature setpoint and minimum flow temperature setpoint depending on the composite outside temperature
- Collection of heat / cooling requests from the individual rooms and forwarding the requests to the heat/cooling sources via wired bus, heat/cooling demand relay or DC 0...10 V output to the RRV912 or RRV934
- Absence function (heating, cooling, ventilation, lights) with simulation of presence (lights)
- DHW heating with time switch and selection of operating mode
- Management of 3-stage ventilation plant via RRV934 multicontroller, incl. night cooling
- Control of air conditioners (split units) via universal outputs (locally and RRV91x) or via S-Mode (KNX TP1)
- Operation of lights and blinds via 4 softkeys, time switch and events
- Monitoring door contacts, window contacts and smoke detectors
- Display of meteorological data
- Presentation of key data on info pages
- Wireless communication with the devices of GAMMA wave and Hager tebis TX product ranges
- Remote access via Siemens web server OZW772.xx
- Intuitive and simple control with Android or IOS App
- Collection of meter data (heat / cool, electricity, water, gas) to support automated meter reading & billing

Central apartment unit with energy consumption data collection in German	S55621-H111	QAX913-DE

Consumption data interface

WRI982

The consumption data interface collects consumption (meter) data and communicates these data using KNX RF directly to the central apartment unit (QAX913 or QAX903). Meters may be connected either via Impulse inputs or via M-Bus (wired). There is an additional interface for communication with the Synerg central communication device, OW30, for the purpose system migration.

- M-Bus MiniMaster for up to 3 M-Bus meters
- 2 Impulse inputs for impulse meters
- BatiBus communication to Synerg OZW30
- KNX RF communication to QAX913 or QAX903

Operating voltage	AC 230 V
Power consumption	7 VA
Communication	KNX RF-compatible, 868.3 MHz bidirectional (RF) BatiBus communication to Synerg OZW30
Indoor wireless range	30 m
Degree of protection	IP30
Mounting	On DIN rail or with screws
Dimensions (W x H x D)	120 x 90 x 50 mm

WRI982

Room unit

QAW910

Wireless room unit.

The QAW910 is used for the operation and display of basic space heating functions. It also forwards the acquired room temperature to the central apartment unit QAX9.., either periodically or when changes occur. The room temperature is shown on the display of the QAW910.

- Operation and display of space heating functions
 - Selection of room operating mode, timer function and room temperature setpoint readjustment
 - Display of space heating function and status messages
- Acquisition of the room temperature
- Battery-powered by commercially available 1.5 V batteries (contained in the scope of delivery)
- Especially suited for:
 - Renovation projects (old buildings, museums, churches, historical buildings, etc.)
 - Difficult wall-mounting situations (sandstone, glass, etc.)
 - Variable floor plans (different décors, furniture changes)
 - New houses and buildings
- RF communication based on KNX standard (868 MHz, bidirectional)

Voltage supply	Mignon (2xAA) LR6
Battery life	3 years
Battery capacity	2.5 Ah
Communication	KNX RF-compatible, 868.3 MHz bidirectional (RF)
Indoor wireless range	30 m
Measuring range, temperature	0...50 °C
Display	Segment LCD
Display size	Resolution 0.1 °C
Degree of protection	IP40
Dimensions (W x H x D)	84 x 130 x 23.6 mm

OZW772..

Web server for KNX devices

Web server OZW772 allows for remote plant control and monitoring via the web.

- Operate web browser via PC/laptop and Smartphone
- Operate ACS (PC/laptop with ACS plant operating software)
- Connections: USB and Ethernet
- Display fault messages in the web browser
- Send fault messages to a maximum of 4 e-mail recipients
- Periodically send system reports to e-mail recipients
- Visualize the plants in the web browser based on standard plant diagrams and customized plant web pages
- Acquire and display consumption data
- Send consumption data file to 2 email recipients
- Function "Energy indicator" to monitor data points for energy-related limit values, or "Green limits"
- Web services for external applications via Web API (Web Application Programming Interface)
- Encrypted with https and TLS for emails
- Trend function with ACS790
- Direct commissioning with web browser or ACS service tool

Operating voltage	Power pack: AC 230 V Web server: DC 24 V
Communication	KNX TP1 (wire-Bus) Ethernet, RJ45 plug socket (shielded) USB V2.0 (universal serial bus)
Mounting	On DIN rails With Screws
Dimensions (W x H x D)	87.5 x 90 x 40 mm

Range overview OZW772..

Web server for 1 KNX device	BPZ:OZW772.01	OZW772.01

QAA910

Room temperature sensor

Wireless room temperature sensor for acquiring the room temperature.
During operation, the QAA910 forwards the acquired room temperature to the central apartment unit QAX9.., either periodically or in the case of changes.

- Battery-powered by commercially available 1.5 V batteries (contained in the scope of delivery)
- Especially suited for:
 - Renovation projects (old buildings, museums, churches, historical buildings, etc.)
 - Difficult wall-mounting situations (sandstone, glass, etc.)
 - Variable floor plans (different décors, furniture changes)
 - New construction projects
- RF communication based on KNX standard (868 MHz, unidirectional)

Voltage supply	Mignon (2xAA) LR6
Battery life	3 years
Battery capacity	2.5 Ah
Communication	KNX RF-compatible, 868.3 MHz unidirectional (RF)
Indoor wireless range	30 m
Measuring range, temperature	0...50 °C

	BPZ:QAA910	QAA910

Meteo sensor

QAC910

Wireless sensor for acquiring outside temperature and atmospheric pressure.
In operation, the QAC910 forwards the acquired outside temperature and atmospheric pressure to the central apartment unit QAX9..., either periodically or when changes occur.

- Battery-powered by commercially available 1.5 V batteries (contained in the scope of delivery)
- Especially suited for:
 - Renovation projects (old buildings, museums, churches, historical buildings, etc.)
 - Difficult wall-mounting situations (sandstone, glass, etc.)
 - Variable floor plans (different décors, other furniture)
 - New houses or buildings
- RF communication based on KNX standard (868 MHz, unidirectional)
 - 2-Wire cable between meteo sensor and transmitter required

Voltage supply	Mignon (2xAA) LR6
Battery life	3 years
Battery capacity	2.5 Ah
Communication	KNX RF-compatible, 868.3 MHz unidirectional (RF)
Indoor wireless range	30 m
Measuring range, temperature	-50...50 °C
Degree of protection	IP40
Additional info	Dimensions (W x H x D): Outside sensor: 80 X 92 x 50 mm RF transmitter: 84 x 84 x 23 mm

	BPZ:QAC910	QAC910

RRV912

Heating circuit controller, 2 heating circuits

RF-based heating circuit controller for up to 2 heating circuits and DHW heating.
In operation, the RRV912 maintains the required room temperature of the individual heating circuits.
The central apartment unit QAX9.. forwards the relevant data via RF.

- Suited for use in heating and cooling plants
- With central distributors (e.g. underfloor heating or soft steel piping system)
- For use with motorized radiator valves (e.g. with sill covers)
- Heating circuit control with 2- or 3-position actuators
- 2 universal relay outputs, e.g. for control of the room group pump and DHW heating
- 1 universal input, e.g. for connection of a DHW temperature sensor or an alarm
- 1 universal output DC 0...10 V for forwarding the heat / cooling demand signal
- RF communication based on KNX standard (868 MHz, bidirectional)

Operating voltage	AC 230 V
Power consumption	7 VA
Communication	KNX RF-compatible, 868.3 MHz bidirectional (RF)
Indoor wireless range	30 m
Control algorithm	2-position: PID, 3-position: PID
Triac output, switching voltage	AC 230 V
Triac output, switching current	30 mA
Triac outputs, number	2
Universal output, signal	DC 0...10 V
Universal output, current	max. DC 1 mA
Universal outputs, number	1
Universal input, signal	Digital 0/1 LG-Ni1000
Universal inputs, number	1
Measuring range, temperature	0...120 °C
Relay output, switching voltage	AC 24...230 V
	NO - contact
Relay output, switching current	AC 0.02...2 (2) A
Relay outputs, number	2
Degree of protection	IP30
Mounting	On DIN rail With screws
Dimensions (W x H x D)	180 x 98 x 50 mm

BPZ:RRV912

RRV912

Heating circuit controller, 8 heating circuits

RRV918

RF-based heating circuit controller for up to 8 heating circuits.

In operation, the RRV918 maintains the required room temperature of the individual heating circuits.
The central apartment unit QAX9.. forwards the relevant data via RF.

- Suited for use in heating and cooling plants
 - With central distributors (e.g. underfloor heating or soft steel piping system)
 - For use with motorized radiator valves (e.g. with sill covers)
- Connection facility for up to eight 2-position actuators
- 1 Universal relay output, e.g. for control of the room group pump and DHW heating
- 1 Universal input, e.g. for connection of a DHW temperature sensor or an alarm
- RF communication based on KNX standard (868 MHz, bidirectional)

Operating voltage	AC 230 V
Power consumption	7 VA
Communication	KNX RF-compatible, 868.3 MHz bidirectional (RF)
Indoor wireless range	30 m
Control algorithm	2-position PID
Triac output, switching voltage	AC 230 V
Triac output, switching current	30 mA
Triac outputs, number	8
Universal input, signal	Digital 0/1 LG-Ni1000

Multicontroller

RF-based multicontroller for precontrol of up to 2 room groups or control of ventilation plant with up to 3 stages. All inputs and outputs are also suited for universal use. The relevant data are forwarded wirelessly by the central apartment unit QAX9...

- Suited for use in heating and cooling plants for precontrol of up to 2 room groups
 - 2 primary controllers each with a DC 0...10 V actuator
 - 1 primary controller with a DC 0...10 V actuator and 1 primary controller with a 3-position actuator
- Suited for control of 3-stage ventilation plant incl. HR bypass, with impact from humidity, indoor air quality or CO₂- level, incl. fault monitoring
- Forwarding the heat / cooling demand signal to primary energy plant
- RF communication based on KNX standard (868 MHz, bidirectional)

Operating voltage	AC 230 V
Power consumption	7 VA
Communication	KNX RF-compatible, 868.3 MHz bidirectional (RF)
Indoor wireless range	30 m
Control algorithm	Precontroller: PI
Universal output, signal	DC 0...10 V
Universal output, current	max. DC 1 mA
Universal outputs, number	2
Universal input, signal	Digital 0/1 LG-Ni1000 DC 0...10 V
Universal inputs, number	4
Measuring range, temperature	0...120 °C
Relay output, switching voltage	AC 24...230 V NO - contact
Relay output, switching current	AC 0,02...2 (2) A
Relay outputs, number	4
Degree of protection	IP30
Mounting	On DIN rail With screws

	BPZ:RRV934	RRV934

RF repeater

ERF910

Wireless RF repeater for extending plant.

In operation, the ERF910 repeats the RF telegrams from the devices attuned to it.

- Extending and ensuring RF coverage in the Siemens Synco living system
- Especially suited for:
 - Renovation projects (old buildings, museums, churches, historical buildings, etc.)
 - Difficult wall-mounting situations (sandstone, glass, etc.)
 - Variable floor plans (different décors, furniture changes)
 - New houses and buildings
- External power pack
- RF communication based on KNX standard (868 MHz, bidirectional)

Operating voltage	AC 230 V
Power consumption	0.2 VA
Communication	KNX RF-compatible, 868.3 MHz bidirectional (RF)
Indoor wireless range	30 m
Degree of protection	IP40
Dimensions (W x H x D)	84 x 84 x 23 mm

Water monitor

QFP910

Wireless sensor for detecting water leaks.

The QFP910 sends its status (dry / water leak) to the Central Apartment Unit QAX913 periodically or if there is a change in status.

- Battery-powered by commercially available 1.5 V batteries (contained in the scope of delivery)
- External water leak sensor
- RF communication based on KNX standard (868 MHz, unidirectional)

Voltage supply	Mignon (2xAA) LR6
Battery life	3 years
Battery capacity	2.5 Ah
Communication	KNX RF-compatible, 868.3 MHz unidirectional (RF)
Indoor wireless range	30 m
Degree of protection	IP40
Dimensions (W x H x D)	84 x 84 x 23 mm

AFK914/C01

Handheld control

Handheld device for remotely operating predefined functions of the Central Apartment Unit QAX913

- Up to 4 different functions may be initiated, one for each of the four buttons
- The function of each button may be individually configured on the Central Apartment Unit
- Battery powered by commercially available lithium batteries, type CR2032 (contained in the scope of delivery)
- RF communication based on the KNX standard (868 MHz, bidirectional)
- Colored LEDs to indicate status and confirmation from the Central Apartment Unit

Voltage supply	Lithium button cell (1xCR2032)
Battery life	≥3 years (when operated 2.5 times per day)
Battery capacity	0.230 mAh
Communication	KNX RF-compatible, 868.3 MHz, bidirectional (RF)
Indoor wireless range	30 m
Degree of protection	IP41

Radiator control actuator

RF-based actuator for radiator valves.

The SSA955 controls the room temperature based on the data forwarded by the central apartment unit QAX9...

- Battery-powered by commercially available 1.5 V batteries (contained in the scope of delivery)
- Silent mode (e.g. for use in sleeping rooms)
- Automatic identification of valve stroke
- Parallel connection of multiple actuators possible
- Integrated temperature sensor
- For direct mounting with coupling nut (no tools required)
- Manual adjustment
- RF communication based on KNX standard (868 MHz, bidirectional)

Voltage supply	Mignon (3xAA) LR6
Battery life	3 years (2 years in silent mode)
Battery capacity	2.5 Ah
Communication	KNX RF-compatible, 868.3 MHz bidirectional (RF)
Indoor wireless range	30 m
Sound power level	Silent mode: <25 dB (A) Normal mode: <30 dB (A)
Stroke	2.5 mm
Positioning force	110 N
Medium temperature	1...110 °C
Measuring range, temperature	0...50 °C
Ambient temperature, operation	1...50 °C
Connecting thread	M30 x 1.5
Degree of protection	IP40
Mounting position	Upright to 90° inclined
Dimensions (W x H x D)	48 x 95 x 80.6 mm

BPZ:SSA955

SSA955

Starter kit

- Wireless starter kit for radiator application, consisting of:
- One QAW912 room unit - 2 heating zones
 - One or 4 SSA955 radiator control actuators

The starter kit can be complemented by additional SSA955 - up to a total of 6

Communication

Indoor wireless range

KNX RF-compatible, bidirectional, 868.3 MHz

30 m

Radio System – EnOcean

Overview and selection guides

EnOcean

EnOcean is ratified since March 2012 to an international standard based on the International Electrotechnical Commission (IEC) with ISO/IEC 14543-3-10. Batteryless sensors are independent of energy sources and therefore are completely maintenance-free and enormously flexible. The use of battery-less sensors therefore opens up new possibilities.

As a result of the flexible installation of maintenance-free products from Siemens with EnOcean technology, universal and individual solutions can be offered from a single room to an entire building complex without extra cables. With an EnOcean gateway, the integration of sensors for lighting, sun protection and air-conditioning applications into building automation systems is possible.

What are the benefits of EnOcean technology?

- Ecological, because no battery to dispose of and minimum radiant energy (less than with wired pushbuttons)
- Extensive energy savings
- Maintenance-free
- Short installation times
- Reduction in fire load
- Flexibility of the applications

Further information on EnOcean technology is available on the Internet at: www.siemens.com/enOcean

Display and operation units

As a result of their flexible installation, the maintenance-free operating devices with EnOcean technology can be fitted anywhere without extra cables. An EnOcean gateway enables the integration of the operating devices for light, sun protection and HVAC applications in building automation systems.

Completely flexible

EnOcean operating devices can be mounted on any surface without cables. Simply screw or stick – done. The EnOcean operating devices can be combined with all DELTA miro and DELTA line frames.

Completely maintenance-free

The EnOcean operating devices are battery-free: It is not necessary to change batteries. The operating devices are therefore maintenance-free and environmentally friendly.

Further information on EnOcean technology is available on the Internet at: www.siemens.com/enOcean

17-2

Wall transmitter, EnOcean, single, DELTA i-system

AP 221

- One or two centered rockers
- Vertical operation
- Energy generation at the button press by means of induction, without batteries, maintenance-free
- Up to 2 pushbutton functions per rocker
- Selectable function per pushbutton: Switching Over, Switching On, Switching Off, 8-bit value, 1 pushbutton dimming, 1 pushbutton sun protection control
- For the pushbutton pair selectable function Switching ON/OFF, 2-button dimming with stop telegram, 2-button sun protection control
- Radio telegram according to EnOcean standard at 868.3 MHz
- Transmitting power of max. 10 mW
- As surface-mounting unit for screwing or sticking

Dimensions (W x H x D) 55 x 55 x 7.3 mm

Room unit with EnOcean interface

QAX95.4

- Acquisition of the room temperature
- Powered by solar cell
- A gateway is mandatory (EnOcean / KNX)
- Optional use of battery if light conditions are insufficient
- Including design frame DELTA line, titan white

For use with units from the following product ranges:

- RXB (together with gateway EnOcean/KNX, RXZ97.1/KNX)
- Devices with KNX Communication

Voltage supply	Solar cell
Measuring range, temperature	0...50 °C
Measurement accuracy	±0.4 K
Time constant	≤16 min
Degree of protection	IP30
Dimensions (W x H x D)	55 x 55 x 19 mm
Weight	0.05 kg

	Stock No.	Product No.
	S55623-H104	QAX95.4

Room unit with EnOcean interface, setpoint adjuster

QAX96.4

- Acquisition of the room temperature
- Room temperature setpoint adjustment
- Powered by solar cell
- A gateway is mandatory (EnOcean / KNX)
- Optional use of battery if light conditions are insufficient
- Including design frame DELTA line, titan white

For use with units from the following product ranges:

- RXB (together with gateway EnOcean/KNX, RXZ97.1/KNX)
- Devices with KNX Communication

Voltage supply	Solar cell
Measuring range, temperature	0...50 °C
Measurement accuracy	±0.4 K
Time constant	≤16 min
Setpoint readjustment range	±10 K
Degree of protection	IP30
Dimensions (W x H x D)	55 x 55 x 28 mm
Weight	0.05 kg

QAX97.4

QAX98.4

Room unit with EnOcean interface, setpoint adjuster, button and switch for fan stages

- Acquisition of the room temperature
- Room temperature setpoint adjustment
- Freely-programmable button
- Step switch (5 stages)
- Powered by solar cell
- A gateway is mandatory (EnOcean / KNX)
- Optional use of battery if light conditions are insufficient
- Including design frame DELTA line, titan white

For use with units from the following product ranges:

- RXB (together with gateway EnOcean/KNX, RXZ97.1/KNX)
- Devices with KNX Communication

Voltage supply	Solar cell
Measuring range, temperature	0...50 °C
Measurement accuracy	±0.4 K
Time constant	≤16 min

QAX98.4

Radio frequency receiver with Gateway EnOcean/KNX

RXZ97.1/KNX

- Evaluation of up to 32 EnOcean channels
- With RXB, other EnOcean functions may also be integrated: switches, window contacts, motion detectors
- Other EnOcean functions (dimming, blinds, light sensors) can be realized in KNX systems
- Powered via KNX bus
- With internal antenna

Operating voltage	DC 24 V
Voltage supply	KNX bus
Power consumption	0.6 VA
Ambient temperature, operation	-5...45 °C
Ambient humidity, operation	5...93 % r.H.
Degree of protection	IP20
Dimensions (W x H x D)	71 x 71 x 27 mm
Weight	0.07 kg

Radio System - EnOcean
Gateways, interface converters
EnOcean/KNX-RF

GE 561/11

Switch actuator wave 2 x AC 230 V, 16 A, with converter EnOcean

- KNX-RF transmitter/receiver for 868.3 MHz
- Converter of EnOcean radio to KNX-RF for the control of KNX radio actuators over EnOcean radio pushbuttons
- Control of internal actuator channels via KNX and/or EnOcean radio pushbuttons
- One relay contact per output
- Contact rated operational voltage, 230 V AC
- Rated current 16 A at p.f. = 1
- With option for setting whether load should be permanently switched on or off (normal mode) or whether actuator should operate in timer mode with an adjustable on period of 1...60 minutes
- Electronics powered via 230 V AC
- Commissioning using a pushbutton located on the top – no additional aids required
- Modular installation device

Dimensions (W x H x D) 274.5 x 42 x 32 mm

Flexcon

Overview and selection guides	18-2
Flexcon	18-3

Flexcon Overview and selection guides

DALI Controller-4 is a central element in any system. The DALI Controller-4 communicates with the DALI multi sensor and DALI quadruple pushbutton interface through the DALI line. The new Flexcon software is used to start the system. Download the software Flexcon at: www.siemens.com/flexcon

Supported by the room layout plan, the system is largely configured using drag&drop.

Functions

- Scene control
- Sequence control
- Constant light level control through light sensors
- Switching/dimming using operator buttons
- Switching through presence detectors
- Central OFF function
- Timer functions (stairwells, corridors, ...)

System description

- Controls four DALI lines with a single central controller (up to 256 electronic controlgears)
- Communicates with DALI sensors and DALI actuators
- DALI power supply integrated in the controller
- System is started with easy to use start-up software

More information about DALI and Flexcon

www.siemens.com/dali

www.siemens.com/flexcon

DALI Controller-4**5TC83000**

- Light controller
- Start-up option using software via USB
- For communicating with electronic controlgears with DALI protocol according to IEC 62386
- Supported by 4 DALI lines according to IEC 62386
- Support 64 electronic controlgears per line
- For communicating with DALI quadruple pushbutton interface and DALI multi sensor for offices
- Supports a maximum of 64 input channels
- Switching and dimming of electronic controlgears according to IEC 62386
- Scene control
- Sequence control for scenes
- Timer mode
- Constant light level control
- Groups can be combined over all lines
- Integrated 230 V supply unit powers the electronics and 4 DALI lines
- LEDs for status display
- LED for displaying lamp faults on device
- Pushbuttons for local operation
- Plug-in terminals for connecting the DALI line, power supply and relay contacts
- Modular installation devices for mounting on TH35 EN 60715 mounting rail

Dimension width (1 MW = 18 mm) 9 MW

Stock No.	Product No.
5TC8300-0	5TC83000

DALI Multisensor office**UP 141/51**

- Used as passive infrared detector for indoor ceiling installation
- Sensing range, horizontal 360 °, vertical approx. 80 °
- For monitoring an area with a diameter of approx. 4 m to approx. 7 m (depending on mounting and room height)
- LED on sensor head for display
- Used as brightness sensor
- Cone-shaped detection area, opening angle 90 °
- Measuring range 20 to 1000 lx
- Integrated DALI bus coupling unit for communicating with a central DALI controller
- Power supply through DALI line with 5 mA DALI bus load
- Plug-in terminals for connecting the DALI line
- For installation in suspended ceilings

Dimensions (Ø x H) 40 x 19 mm

Stock No.	Product No.
5WG1141-2AB51	UP 141/51

DALI Push button interface 4fold**UP 141/71**

- Binary input device
- 4 inputs to connect installation buttons
- Supported actions per input
- Short button press
- Long button press
- Integrated DALI bus coupling unit for communicating with a central DALI controller
- Power supply through DALI line with 6 mA DALI bus load
- For flush-mounting wall or ceiling outlet installations with a 60 mm diameter and depth of 60 mm
- Plug-in terminals for connecting the DALI line
- Cable set for connecting pushbuttons

Dimensions (W x H x D) 43 x 43 x 11 mm

Stock No.	Product No.

DELTA Control and Regulation Devices

Overview and selection guides

Motion detectors

Motion detector tops

- Responds to heat motions and initiates a switching operation
- The lighting remains ON as long as motions are detected, otherwise it is switched off after the overrun time has elapsed
- The lighting is only switched on again after a locking time of 3 sec
- Only in combination with a motion detector insert
- Two different versions are available, depending on the required assembly height (1.10 or 2.20 m)
- Thanks to their modular design, tops and inserts can be freely combined
- The sensing range of a main unit can be extended by connecting a maximum of 10 motion detector extension units
- The number of connectable passive extension units is unlimited (e.g. pushbutton, 1 NO contact)
- Sensitivity is infinitely adjustable between 20 and 100 %

The comfort motion detector top also offers:

- Short-time duty setting, e.g. to control acoustic signal transducers (bells) for monitoring of an entry door
- The operating mode (continuous OFF/automatic/continuous ON) can be selected by means of a slide switch which can be secured in the automatic position

Device tops

Type	
Technical specifications	5TC115.. and 5TC15..K
Sensing angle	Approx. 180°
Mounting height [m]	1.10 m / 2.20 m (depending on the version)
Sensing range	
• 1.10 m lens / 2.20 m lens [m]	approx. 12 x 12
Number of lenses/ lens levels	
• 1.10 m lens	18 / 2
• 2.20 m lens	26 / 3
Rated voltage flush-mounting inserts	230 V AC, 50 Hz
Operating temperature [°C]	Approx. -20...+45
Overrun time	
• Motion detector tops	Approx. 2 min, non-adjustable
• Comfort motion detector top	Approx. 10 s...30 min
Locking time after switch-off [s]	Approx. 3 s
Brightness threshold value [Lux]	Approx. 0...80 / daytime operation
Sensitivity	Approx. 20...100 %
Dimensions (W x L) [mm]:	
• Width [mm]	i-system: 55 , style: 68
• Height [mm]	i-system: 55 , style: 68
Type of protection	IP20

The matching Inserts must be ordered separately, see DELTA Control and Regulation Devices - Motion detectors. The following table provides an overview.

5TC1230

- For switching and dimming different electronic loads
- Operation by UP 210 wave button (radio)
- 2-Leitertechnik
- Automatic load detection
- Lamp friendly soft start
- Storing and switching on at one brightness value
- Memory value retained even after power failure
- Electronic short-circuit protection and overtemperature protection
- On elimination of the short circuit/cooling, automatic return to normal mode
- Extension unit operation by conventional pushbuttons
- Rated voltage: 230 V AC, 50 Hz (2-wire system)
- Only mixed loads between incandescent lamp ratings and electric transformers are permissible
- Connected load
 - Incandescent lamp rating: 50...420 W
 - Magnetic transformers: 50...420 VA
 - Electronic transformers: 70...420 VA
- Installation in switch and socket boxes with (60 mm Ø, 40 mm deep) according to DIN 49073-1, Claw fixing or screw fixing

Dimensions (W x H x D) 71 x 71 x 32 mm

The UP 210 wave pushbutton with KNX-RF communication must be ordered separately. See chapter Display and Operation Units. Battery included in delivery.

5TC1231

Shutter control insert sys

- For controlling a blind or shutter motor with mechanical or electronic limit switches
- Operation by sys shutter/blind pushbuttons and UP 211 wave shutter/blind pushbuttons (radio)
- Two electrically interlocked relays, minimum switchover time of 1 s
- Group and central controls through a combination of several sys shutter/blind control inserts
- "Wind alarm" safety function can be implemented through the secondary input "UP"
- Multiphase operation (i.e. different phases at the main and extension unit) is possible
- Bridging of voltage interruptions 0.2 sec
- Relay on period at STEP command: 100 ms
- Max. relay on period: 120 s
- Conventional shutter/blind pushbuttons (5TA2 114) or switches (5TA2 154) can be connected through secondary inputs
- Rated voltage: 230V~, 50 Hz (N conductor required)
- Connected load: max. 1 motor 1000 VA (8 A resistive load)
- For mounting in an installation box (Ø 60 mm, depth: 40 mm) with screw or claw fixing

Dimensions (W x H x D) 71 x 71 x 32 mm

Matching frames must be ordered separately. UP 211 wave shutter/blind pushbuttons must be ordered separately.

Motion detector top

5TC15..

- Sensing angle approx. 180°
- Mounting height 1,10/ 2,20 m (depending on the version)
- Sensing range: approx. 12 x 12 m
- Number of lenses/ lens levels
 - 1,10-m-lens 18 / 2
 - 2,20-m-lens 26 / 3
- Rated voltage flush-mounting inserts AC 230 V, 50 Hz
- Operating temperature approx. -20...+45 °C
- Overrun time approx. 2 min, non-adjustable
- Locking time after switch-off approx. 3 s
- Brightness threshold value approx. 0...80 Lux / daytime operation
- Sensitivity approx. 20...100 %
- Degree of protection IP20

Range overview 5TC15..

Product Title	Dimensions (W x H)	Stock No.	Product No.
Motion detector top, i-system/DELTA profil, mounting height 1,10 m, titanium white (similar to RAL 9010)	55 x 55 mm	5TC1503	5TC1503

Motion detector top, DELTA style, Mounting height 2,20 m, titanium white (similar to RAL 9010)	68 x 68 mm	5TC1542	5TC1542
Motion detector top, DELTA style, Mounting height 1,10 m, platinum metallic (similar to RAL 9007)	68 x 68 mm	5TC1537-1	5TC1537-1
Motion detector top, DELTA style, Mounting height 2,20 m, platinum metallic (similar to RAL 9007)	68 x 68 mm	5TC1542-1	5TC1542-1

An intermediate frame must be used for DELTA profil.

DELTA Control and Regulation Devices

Motion detectors

5TC15..K

Comfort motion detector top

- Sensing angle approx. 180°
- Mounting height 1,10/ 2,20 m (depending on the version)
- Sensing range: approx. 12 x 12 m
- Number of lenses/ lens levels
 - 1,10-m-lens 18 / 2
 - 2,20-m-lens 26 / 3
- Rated voltage flush-mounting inserts AC 230 V, 50 Hz
- Operating temperature approx. -20...+45 °C
- Overrun time approx. 10 s...30 min
- Locking time after switch-off approx. 3 s
- Brightness threshold value approx. 0...80 Lux / daytime operation
- Sensitivity approx. 20...100 %
- Degree of protection IP20

Motion detector relay inserts

5TC1500

- Flush-mounting insert for motion detector tops for switching
- Rated voltage 230 V AC, 50/60 Hz
- Connected loads
 - Filament-lamp load 40...400 W
 - HV halogen lamps 40...400 W
 - Conventional transformers max. 400 VA
- Short-circuit protection
- Extension units
 - 10 motion detector extension unit inserts
 - Unlimited mechanical pushbuttons
- Maximum cable length (in total) 100 m
- Mounting type: claw fixing, screw fixing
- Installation in switch and socket boxes with 60 mm Ø, 40 mm deep according to DIN 49073-1
- Degree of protection IP20

Dimensions (W x H x D) 71 x 71 x 32 mm

	Stock No.	Product No.
	5TC1500	5TC1500

Motion detector triac insert

5TC1501

- Flush-mounting insert for motion detector tops for switching
- The lamps are switch on by means of a soft start
- Rated voltage 230 V AC, 50/60 Hz
- Connected loads
 - Filament-lamp load 2300 W
 - HV halogen lamps 2300 W
 - Conventional transformers max. 1000 VA
 - Electronic transformers 1500 W
 - Fluorescent lamps, uncorrected 1200 VA
 - Fluorescent lamps, parallel corrected 920 VA
 - Fluorescent lamps in duo connection 2300 VA
- Extension units
 - 10 motion detector extension unit inserts
 - Unlimited mechanical pushbuttons
- Maximum cable length (in total) 100 m
- Mounting type: claw fixing, screw fixing
- Elektrische Sicherheit
- Installation in switch and socket boxes with 60 mm Ø, 40 mm deep according to DIN 49073-1
- Degree of protection IP20

Dimensions (W x H x D) 71 x 71 x 32 mm

	Stock No.	Product No.
	5TC1501	5TC1501

5TC1502

Motion detector extension unit inserts

- Flush-mounting insert for motion detector tops
- 3-wire extension unit, only in combination with a motion detector relay insert or a motion detector triac insert
- When motion is detected, a brightness-independent switching signal is sent to the main unit
- Minimum time between two switching signals is approx. 5 s
- Evaluation takes place in the top of the main unit
- Cannot be assigned to several main units
- Not suitable for the direct switching of loads
- The lamps are switch on by means of a soft start
- Rated voltage 230 V AC, 50/60 Hz
- Maximum cable length (in total) 100 m
- Mounting type: claw fixing, screw fixing
- Electrical safety
- Installation in switch and socket boxes with 60 mm Ø, 40 mm deep according to DIN 49073-1
- Degree of protection IP20

Dimensions (W x H x D) 71 x 71 x 32 mm

		Stock No.	Product No.
		5TC1502	5TC1502

DELTA reflex motion detector, IP55

5TC721..

- For surface-mounting on the wall or ceiling; the detector is plugged on when the wiring has been completed
- Range: 120° approx. 10 m / 290° ca. 16 m
- Comfortable two-button operation:
 - Any brightness value can be saved
 - Any overrun time between 5 s and 30 min can be saved
 - Test mode for commissioning
 - Switchover to brightness-independent mode and pulse mode
 - Resetting of detector to 7 lux and 2 min delay time
- Rear view monitoring (only 290° types)
- Automatic range stabilization (290° types only)
- Automatic maloperation suppression
- Vacation function on 290° IR type
- Artificial light suppression (glare shield)
- Control via NC pushbutton
- Output: one NO contact, non-isolated

Dimensions (W x H x D) 180 x 86 x 74 mm

Range overview 5TC721..

Accessories for 5TC721..

Special base, accessory for AP 251 surface-mounting motion detectors, IP55, titanium white (similar to RAL9010)

5TC7900

- For outside or inside-angle mounting
- Cable entry surface or flush-mounted
- Titanium white

Dimensions (W x H x D) 88 x 64 x 105 mm

Stock No.	Product No.
5TC7900	5TC7900

Special base, accessory for AP 251 surface-mounting motion detectors, IP55, anthracite

5TC7901

- For outside or inside-angle mounting
- Cable entry surface or flush-mounted
- Anthracite

Dimensions (W x H x D) 88 x 64 x 105 mm

Stock No.	Product No.
5TC7901	5TC7901

5TC7902

IR remote control accessory for motion detectors AP 251 and 5TC721..

- Infrared remote control
- Range: Approx. 5 m
- Functions
 - Vacation function / Presence
 - Continuous on (4h) / Normal mode
 - Test mode
 - Programming of the currently measured brightness value and the overrun time of 5s to 30 min
 - Direct selection of an overrun time of 10 min
 - Switchover to brightness-independent mode and pulse mode
 - Resetting of detector to 7 lux and 2 min delay time
- Power supply through CR2025 lithium button cell, included in delivery

Dimensions (W x H x D) 40 x 87 x 6 mm

		Stock No.	Product No.
		5TC7902	5TC7902

Room thermostat 1 NC contact

5TC9200

- Standard version with nighttime reduction
- For electric and warm water convectors, pumps and tank control
- Operates as two-position controller with thermal feedback
- If the temperature at the bimetal increases and the setpoint value is reached, the NC contact (heating contact) will switch off
- If the temperature at the bimetal drops below the selected setpoint value minus the hysteresis, the NC contact will switch on again
- The temperature range is shifted downward by approx. 5 K during temperature reduction control
- Screwless connecting terminals

Setpoint setting range	5...30 °C
Switch-off point	5...30 °C
Sensing element, temperature	Bimetal
Digital outputs	1-pin Potential-free NC contact
Digital output, switching voltage	AC 250 V
Digital output, switching current	10 (4) A
Mounting	For screw fixing Flush or wall-mounted conduit box
Degree of protection	IP30
Dimensions (W x H x D)	70 x 70 x 39 mm

Stock No.

Product No.

5TC9200

5TC9200

Room thermostat, 1 NO contact

5TC9201

- Standard version
- For electric and warm water convectors, pumps and tank control
- Operates as two-position controller with thermal feedback
- If the temperature at the bimetal increases and the setpoint value is reached, the NC contact (heating contact) will switch off and the NO contact (cooling contact) will close
- If the temperature at the bimetal drops below the selected setpoint value minus the hysteresis, the NC contact will switch on again
- Screwless connecting terminals

Setpoint setting range	5...30 °C
Switch-off point	5...30 °C
Sensing element, temperature	Bimetal
Digital outputs	1-pin Potential-free CO contact
Digital output, switching voltage	AC 250 V
Digital output, switching current	10 (4) A
Mounting	For screw fixing Flush or wall-mounted conduit box
Degree of protection	IP30
Dimensions (W x H x D)	70 x 70 x 39 mm

Product No.

5TC9201

5TC9201

5TC9202

Room thermostat, 3-position switch

- 3-position switch: automatic timing, constant day temperature, constant nighttime reduction
- For electric and warm water convectors, pumps and tank control
- The switch S1 can be used to preselect the temperature reduction between clock/day and night
- Operates as two-position controller with thermal feedback
- If the temperature at the bimetal increases and the setpoint value is reached, the NC contact (heating contact) will switch off
- If the temperature at the bimetal drops below the selected setpoint value minus the hysteresis, the NC contact will switch on again
- The temperature range is shifted downward by approx. 5 K during temperature reduction control
- Screwless connecting terminals

Setpoint setting range	5...30 °C
Switch-off point	5...30 °C
Sensing element, temperature	Bimetal
Digital outputs	1-pin Potential-free NC contact
Digital output, switching voltage	AC 250 V
Digital output, switching current	10 (4) A
Mounting	For screw fixing Flush or wall-mounted conduit box
Degree of protection	IP30
Dimensions (W x H x D)	70 x 70 x 39 mm

5TC9202

5TC9202

5TC9203

Room thermostat, direct floor heating

- With remote sensor
- NO switching contact
- For regulating floor storage heating systems and electric floor heating systems with heating mats
- Comprising two parts: Controller (for setting the desired floor temperature) and remote sensor (in the floor for monitoring the set temperature)
- Rotary knob for setting the floor temperature
- If the temperature drops below this value, the controller will request heat; this is indicated optically by a red LED
- A nighttime reduction can be activated via the connection (time switch); this is indicated by a green LED
- Temperature reduction approx. 5 K
- Screwless connecting terminals

Setpoint setting range	10...50 °C
Switch-off point	10...50 °C
Sensing element, temperature	Bimetal
Digital outputs	1-pin Potential-free NO contact
Digital output, switching voltage	AC 250 V
Digital output, switching current	10 (4) A
Mounting	For screw fixing Flush or wall-mounted conduit box
Degree of protection	IP30
Dimensions (W x H x D)	70 x 70 x 39 mm

Technical specifications

UL-Standards

GAMMA instabus Devices comply with UL standard

Broad spectrum

UL standards are used in North America, but also in several other countries. This is of particular importance to European exporters of electrical switchgear equipment for machines who export to the USA, as their products will only be accepted if they meet the relevant UL standards. UL 508A describes the design of control cabinets and implementation of integral components with reference to other pertinent UL standards where applicable. It therefore represents the basic standard for all electrical systems used in North America. A wide range of GAMMA instabus devices comply with UL standards and are therefore suitable for implementation worldwide in both IEC/EN and UL applications within the framework of their specified use.

Further links:

www.ul.com for general UL information

www.ul.com/database for UL-listed devices

www.siemens.de/gamma for information on GAMMA products

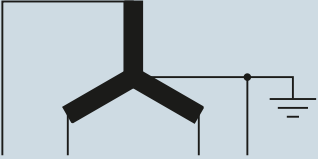

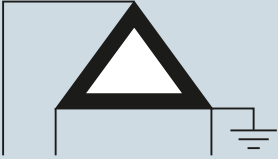

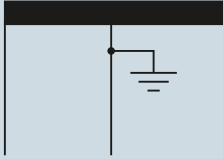

Overview of IEC – UL standards

Worldwide application of EN/IEC or UL standards

Low-voltage systems in the USA

While a variety of different systems are used in the USA, three-phase systems with 240 V and 480 V and 3- and 4-wire systems are the most common, with 208 V and 600 V playing a considerably smaller role. Residential buildings are primarily fitted with 120 to 240 V single-phase systems. A frequency of 60 Hz is standard in North America.

Industry and Commercial		Residential
		
Three-phase, 4 wires	Three-phase, 3 wires	Single-phase, 3 wires
Three-phase wye, 4 wires	Three-phase delta, 3 wires, grounded corner	Single phase, 120 V/240 V, grounded midpoint
Caution: The PE must not be used for electricity. There is no PEN conductor => N = "Grounded Conductor" (white or gray), separate wires must be used for PE and N.		
480 V Y/277 V ¹⁾	240 V	240 V, phase conductor
600 V Y/347 V ¹⁾	480 V	120 V to ground
240 V Y/131 V ¹⁾	600 V	
208 V Y/120 V ¹⁾		

¹⁾ Y describes the "Solidly grounded circuit". The "Y" value specifies the voltage between the phases (e. g. 480 V), the value after the slash specifies the voltage between the phase and the grounding (e.g. 277 V at 480 V voltage between the phases).

Explanation of UL symbols

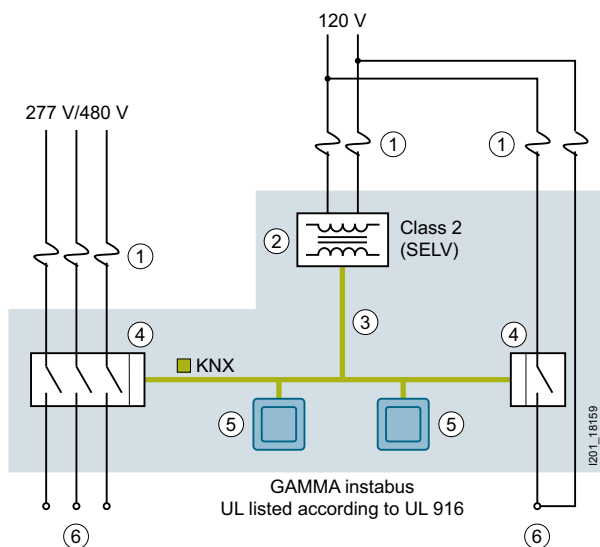

All symbols and descriptions of UL symbols can be found on the Internet: www.ul.com/mark/art.htm

General information about UL can be found at: www.ul.com

Symbol	Application
	UL symbol This is the most used UL symbol. If a product has this mark, it means that the device samples tested by UL have met the UL safety requirements. These requirements are largely based on the UL standards published by UL. This mark can be found on all types of devices, such as household appliances, computers, fuses, electrical switchgear, fire extinguishers, life belts and thousands of other devices.
	c-UL symbol This mark applies to the Canadian market. Products with this mark have been examined by UL in accordance with Canadian safety directives, which differ in some points from the US directives.
	c-UL US symbol This symbol was introduced at the beginning of 1998. It means that the device bearing this mark complies with both UL and Canadian regulations.
	UR-, c-UR- und c-UR US symbol Recognized component mark and Canadian recognized component mark These symbols are seldom seen by consumers as they are affixed to special components that are part of a larger system or product. These components may have technical or design restrictions.
	The Component Recognition symbol can be on a large number of products, such as switches, power supplies, printed boards, switching devices and many other products. Products for Canada have an additional "c".
	The c UR US symbol was introduced in 1998 and means that the marked components meet both the UL and CSA regulations.

The "UL listed" symbol ® is applied to devices that can be installed universally and without further instructions or any restriction of their respective applicability, e. g. contactors to UL 508, miniature circuit breakers to UL 489, energy management devices according to UL 916 ...

The "UL Recognized" symbol  is intended for devices that may only be installed by experts as components, e. g. miniature circuit breakers to UL 1077, time switches to UL 917, SITOP fuses, ...

- ① Feeder protection
- ② Bus power supply
- ③ Bus line
- ④ Load switch
- ⑤ Wall switch
- ⑥ Load

5WG1 energy management devices ... according to UL 916

The UL 916 requirements cover energy management equipment rated 600 V or less intended for installation in accordance with the National Electrical Code NFPA 70. This primarily applies to devices for the control of electrical loads to achieve the desired use of electrical power. Such equipment controls electrical loads by responding to sensors and actuators.

All devices that are powered by the bus voltage or by an external < 30 V DC and < 1.5 A power supply, and that are not connected to voltages greater than 30 V AC/DC, meet the conditions of Class 2 equipment. These devices can be used as energy management equipment according to UL 916 (energy management equipment accessories).
